Introduction

Researchers and scientists at locations around the world, including state hospitals, children's homes, prisons, military bases, and universities, many locations have never been identified, cooperated sometimes knowingly and sometimes unknowingly in research on human subjects.

Academic researchers are funded through grants funnelled to them from CIA front organisations, other government institutions, and foundations while remaining unaware the government organisations sought to use their work for its own purposes. In other instances, however, top officials at these institutions knew about the government's role.

The experiments sought to identify and develop drugs and procedures to weaken subjects and implement mind control. They involved surreptitious administration of drugs and other chemicals, hypnosis, sensory deprivation, isolation, and verbal and sexual abuse.

These experiments continue today.

Throughout the years I have kept notes on identified locations and human experiments. I have decided to share these notes with the intention of assisting survivors and their families.

"Torture remains an essential instrument of many governments. They use psychiatrists, surgeons and the whole range of associated disciplines to pressure people to confess. There is no sign of it ending; there is ample evidence it will only get worse in the twenty-first century."

— Albert Joyce, Professor of Ethics in Medicine, UCLA

Names

A

Bernard S. Aaronson- Effects of personality on drug reactions. Human Ecology Fund, CIA.

Preston S. Abbott- Psychiatric rating scales. Human Ecology Fund, CIA.

Wolfgang Abel -An Austrian anthropologist and one of Nazi Germany's top racial biologists. He was the son of the Austrian palaeontologist Othenio Abel. He was involved in compulsory sterilisation of children, who resulted from relationships between German women and dark-skinned French soldiers.

Stephen I. Abrams- Experiments in extrasensory perception. Human Ecology Fund, CIA.

Joe K. Adams- The first psychologist to lead a seminar at the Esalen Institute. He also worked with LSD at the Mental Research Institute in Palo Alto, under grants from the National Institute of Mental Health. This was during the time that NIMH was channelling funds for the CIA's MK-ULTRA LSD experiments.

Dr. Harold Abramson- MK-ULTRA contractor (CIA). Geschickter Foundation for Medical Research. LSD basic research. The studies included the use of LSD in therapy. As far as is known, subjects in this experimentation were witting . Funds are included for the payment of subjects. Mount Sinai Hospital, MKSearch, The civilian researchers in Baltimore were instructed to attempt to find chemicals that could induce anything from the desire for kinky sex, to stimulating death by carbon dioxide, that is, to produce a chemical that could fake suicide.

V. Adamenko- Aphysicist who reportedly has invented the CCAP (Conductivity of the Channels of Acupuncture Points) device. This machine, it is claimed, registers energy flow In the body using as check points for its electrodes the acupuncture points of traditional Chinese medicine. Adamenko reportedly detects changes in body energy caused by alterations of consciousness and varying emotional states. With subjects attached to the CCAP. At the end of many

sessions the graphs from the CCAP were checked by Raikov and Adamenko. They claim to have found a pronounced difference between the different forms of hypnosis.

Dr. W. Ross Adey -O f the University of California's Brain Research Institute, a CIA MK-ULTRA (mind control) contractor, was also one of the first to conduct research on EMF and brain waves, confirming that brainwaves could be entrained to externally generated signals. The U.S. Navy underwrote his research. Dr. William Ross Adey, brain electrode researcher.

A.E. Akimov (А.Е.Акимов) -H ead of the Centre of unconventional technologies 1989 to 199A.E.Akimov in 1977-1983 worked at the Moscow Scientific Research Institute of Radio, in 1983-1987 at the Research Institute for Communication Systems and Control, and in 1987-1991 as the department head at the Research Institute of Microdevices.

Al'bitskaya -S tudied the effect of 136~ 400nm ultraviolet radiation on 15-16 year-old technical school students as measured by their response in a conditioned reflex situation and the length of the latent period in motor and speech reactions.

Roger Aldrich- Mitchell Jessen and Associates. Spivey, Sporleder, and Aldrich a company called the Center For Personal Protection and Safety, which counts both the Department of Defense and the FBI among its clients.

Stephen Aldrich -Former medical director of the Agency's Office of Scientific Intelligence. Aldrich was a veteran of ARTICHOKE.

E.B. Aleksandrov (Е.Б.Александров)- KGB funded disjointed pseudoscientific closed
developments, related to the problems of communication, weapons, and drug-free impact on humans. In 1986, different groups were consolidated: they have entered into a document of CM (Council of Ministers).

Alekseyev- Studied the speed and intensity of acoustic and visual reactions in subjects exposed to noise from thirty minutes to four hours. Using 70 to 90 db noise intensities in a soundproof chamber, the investigators recorded vocal and motor reaction response times after varying exposure durations. Prolonged (3-4 hour) testing at either db level caused fatigue of the central nervous system, reduced

effective response, and disturbed relation- ships between motor responses and strength of stimulus.

Lieutenant Colonel John B. Alexander - During his time in the army he showed interest in esoteric techniques similar to those explored by Lt. Col. Jim Channon in his First Earth Battalion manual. An example is neuro-linguistic programming with which he hoped to create "Jedi warriors"

A leading advocate for the development of non-lethal weapons and of military applications of the paranormal. "Mind altering techniques designed to impact on an opponent are well advanced. The procedures employed included manipulation of human behaviour through use of psychological weapons affecting sight, sound, smell, temperature, electromagnetic energy or sensory deprivation."

Erik Allardt- University of Helsinki, MK-ULTRA contractor, Study of the interaction between the mentally disturbed and their environment. To gain further insight into additional factors which may influence human behaviour and to achieve further development of the world-wide activities of the Human Ecology fund.

Morse Allen- (CIA)planned on filming as many high government agency officials and heads of academic institutions and foundations as possible, so that later, when the funding for mind-control and radiation started to dwindle, projects would continue.

Morse Allen studied hypnosis, he found that he could not persuade people to do things against their will. Subjects in a trance would refuse to shoot their friends. However, Allen found that he could circumvent resistance by convincing people that the friend was actually a deadly enemy. He had to change their perception of reality—create what he called a "pseudo-reality"—and then let them act naturally. If he could create the right reality, he could manipulate people into doing almost anything.

Gordon Allport- Lazarsfeld's assistants, went on to be the Tavistock Institute's leading representative in the United States.

Richard Alpert aka Ram Dass- International Federation for Internal Freedom Psychedelic Training Center in Zihuatanejo. Mexico.

Dr. Alfred Alschuder- Concord Prison Experiment.

Carlos Alvarado PhD -W as a parapsychologist on the faculty of Atlantic University and the University of Virginia. His research focussed on surveys of psychic experiences and on the history of psychical research. He was a past President (1995; 2002-2003) of the Parapsychological Association.

Dr. Adelbert Ames, Jr.- C ontractor to the Office of Naval Research, created the Ames room, the Ames window, and the Ames chair. project initiated by the Professional Division, Bureau of Medicine and Surgery, and subsidised by the Office Of Naval Research, contract N6onr 27014 with Princeton University and contract Nonr-496 with the Institute for Associated Research, under Navy Medicine's policy of encouraging basic research in perceptual phenomena as they relate to personality theory and social psychiatry.

Barbara Anderson -R eceived Human Ecology Fund. Funds to write an article on 'bereavement as a subject of cross-cultural inquiry'.

Dr. Orlando J. Andy -A t the University of Mississippi Medical School in Jackson. Dr. Andy said he operates "as a last resort" on people—children and adults—who suffer from uncontrollable destructive hyperactivity. O. J. Andy, Director of neurosurgery at the University of Mississippi, was publishing reports on multiple surgical interventions into the brains of approximately 30 to 40 children, aged five to twelve, who were diagnosed as aggressive and hyperactive...most of the children were housed in a segregated Black institution for the developmentally disabled.

James Jesus Angleton- A leader of the British intelligence faction in the American intelligence community, established three goals for the hypnosis program: 1) to induce hypnosis very rapidly in unwitting subjects; 2) to create durable amnesia; and 3) to implant durable and operationally useful post-hypnotic suggestion. Chief of Counterintelligence Staff, CIA. Assassination conspiracies, unauthorised mail opening, collaboration with human rights abusers, infiltration of news organisations, and the MK-ULTRA mind-control experiments.

I.P. Anokhina- The Serbsky Institute reported in 1970 on the effect of LSD on the neuro— transmitter systems of the brain.

Harry Anslinger-T he Commissioner of the Federal Bureau of Narcotics (FBN), to provide them with an agent who was capable

of finding suitable test subjects within the arcane setting of narcotics control. Subjects were to be FBN informants, drug addicts and drug peddlers, prostitutes, pornographers, and other degenerate underworld characters--in other words, people who were already compromised by their deviant behaviours, and would be unable to complain to the police if they were damaged during the LSD experiments. Anslinger selected for the MK-ULTRA job was George Hunter White.

A. G. Arlashin- Telepathic tests vs distance.
E.L. Asatryan- USSR's Academy of Sciences. Telepathic experiments.
John Ashcroft- Had a central role in the approval of the use of torture on specific detainees as chair of the NSC Principals meetings.
Dr Richard Asher -Was an eminent British endocrinologist and haematologist. The senior physician responsible for the mental observation ward at the Central Middlesex Hospital. Also studied the effects of sleep-hypnosis and other forms of hypnosis as well. Was considered an expert in the field.
Alexander R. Askenasy -Includes conducting public opinion polls and research on mass communications and psychological warfare during World War 11. Two of hir recent publications are "A Study of Key Communicators in Urban Thailand" (with M. Jacobs and F. Farzanegan), and "Role of Psychological Operations Within the Military Mission," in Psychological Research in National Defense Today, edited by J. E. Uhlaner. U.S. Army Behavioral Science Research Laboratory.
V.F. Asmus- Study of paranormal phenomena.
Frederick 'Skip' Holmes Atwater. Lt. - Atwater was the first operations officer of the Ft. Meade operational remote viewing unit. W as the Operations and Training Officer for the once highly classified US Army Intelligence remote viewing surveillance program, and played an important role in the program's founding. Working closely with the personnel in the SRI International remote viewing research program, he trained professional intelligence personnel to remote view, then used these highly skilled psychic spies to conduct thousands of remote viewing intelligence collection missions for a variety of US intelligence agencies. For ten years Skip

worked directly with the cadre of remote viewers, helping to hone their skills.

Michael Aquino- Aquino co-authored MindWar – an internal U.S. Army paper about the future of psychological operations. "ELF waves up to 100Hz are naturally occurring, but they can be produced artificially (such as for the Navy's Project Sanguine for submarine communication). ELF-waves are not normally noticed by the unaided senses, yet their resonant effect upon the human body has been connected to both physiological disorders and emotional distortion. Infrasound vibration (up to 20 Hz) can subliminally influence brain activity to align itself to delta, theta, alpha or beta wave patterns, inclining an audience toward everything from alertness to passivity. Infrasound could be used tactically, as ELF-waves endure for great distances; and it could be used in conjunction with media broadcasts as well."

William Sinclair Augerson, M.D.- Commander of the US Army Medical Research and Development Command.

Margaret Austin- MK-ULTRA hypnosis research.

M.V. Avakumov- Efforts toward the aimed telepathic manipulation of human consciousness.

David Ayres- Former Chief of Staff to Attorney General Ashcroft. one of the owners of Mitchell, Jessen and Associates.

Fern J. Cramer-Azima- Graduate of Queens University, Cornell University, and University of Montreal; Associate Professor of Psychiatry, McGill University and Director of the Child and Adolescent Service, Therapy Day Centre at the Allan Memorial Institute/Royal Victoria Hospital. Effects of partial perceptual isolation in mentally disturbed individuals. (Dr. Hassan Azima).

Dr. Hassan Azima- P sychiatrist at Allan Memorial Institute. Consciousness, on homeostasis in schizophrenic patients, anaclitic therapy, perceptual and sensory isolation, on the effects of meprobamate in sustained high dosage, on sleep treatment, on basic science and psychiatry. study on partial perceptual isolation in mentally disturbed individuals.

Cleve Backster- Lab was visited by the National Research Council's Committee on Techniques for the Enhancement of Human Performance. The NRC was evaluating enhancement and parapsychological studies conducted for the Army Cleve Backster, a onetime head of both the OSS and CIA drug interrogation units.

Lieutenant Colonel Alexander Bahlin- Office of the Assistant Secretary of Defence (Research and Development) This Agency's scientists who have been responsible for this research in psych chemicals have maintained close and effective liaison with various research and development groups in the Department of Defense who are aware of our interest and, in varying degrees, of our progress in psycho chemicals.

Dr. Harry Richard Bailey- "It was cheaper to use Niggers than cats, because they were everywhere, and they were cheapexperimental animals." Bailey makes reference to his Tulane University psychosurgery experiments with contractor to MK-ULTRA Subproject 68, Dr. Robert Heath. like most Australian Doctors connected to MK-ULTRA, studied at The University of Sydney. He graduated in 1954 and later that year, he received a 15 month, World Health Organisation fellowship to study the methods of MK-ULTRA Doctors, Ewen Cameron and William Sargant. He had been instructed in Psychosurgery, Electro Convulsive Therapy (ECT) and Deep Sleep Therapy (DST). Harry Bailey was William Sargant's Deep Sleep Therapy protégé and the two maintained contact during Bailey's MK-ULTRA work in Australia. Harry Bailey competed with Sargant by seeing how long he could keep Chelmsford patients in a state of Deep Sleep. Harry Bailey killed at least 28 individuals.

Bailey-claimed deep-sleep therapy cured depressive illnesses and compulsive behaviour such as drug and alcohol addiction. Over a dozen of the patients given deep-sleep therapy at Chelmsford died while in a coma or shortly after their release from the hospital. Other patients at Chelmsford claimed they were inflicted with brain damage and paralysis as a result of the treatment.

Edward Baker- Described the case of a refractory "hysterical triplegic" who had ongoing symptoms for a number of years following a hockey accident. The full details of his treatment are not provided, but the author states that "earlier LSD psychotherapeutic interview" resulted in recovery of two of his limbs, but that he continued to experience "mental amputation" of the leg at the mid-thigh, which did not improve with escalating doses up to 1600 mcg. However, with a final dose of 2000 mcg, he regained full sensorimotor function within 10 minutes of injection after which, "he staggered down the ward, kissing whomever he saw, accepting congratulations." His remission was sustained over 2 years of follow-up.

One hundred of 150 patients with non-psychotic functional psychiatric disorders were benefited by the use of LSD psychotherapy. The dosage of LSD employed was 25 to 2000 micrograms intramuscularly per session for from one to 10 sessions. On this regimen four patients became psychotic and required electroconvulsive therapy. None were permanently harmed.

Dr. George Baker -from the Defence Nuclear Agency. RF Weapons: A Very Attractive Non-Lethal Option.

Ian Baker PhD -A lecturer in Psychology and parapsychologist at the University of Derby. His research has focussed on remote staring.

Dr. Maitland Baldwin- Under CIA supervision, bombarded the brains of lobotomised monkeys with radio waves. Baldwin had done an experiment in which an Army volunteer had stayed in the "box" for 40 hours until he kicked his way out after, in Baldwin's words, "an hour of crying loudly and sobbing in a most heartrending fashion." The experiment convinced Baldwin that the isolation technique could break any man, no matter how intelligent or strong-willed. Finance studies on the effect of physical and chemical agents on the central nervous system of anthropoids (man-like animals) at National Institute of Health and unspecified involvement with "an LSD Project". Neurosurgeon, MK-ULTRA contractor, MKSEARCH contractor.

Theodore X. Barber- Martin Orne, M.D., of Harvard and psychologist T. X. Barber, Ph.D., of the Medfield Foundation, pioneered hypnosis research at their respective organisations.

Barber, T. X., and Calverley, D. S.: Toward a Theory of "Hypnotic" Behaviour : Enhancement of Strength and Endurance. Explains how he was able to help a patient who was not highly susceptible to hypnosis. Video footage shows the doctor using the power of suggestion. Dr. Barber gives the patients tools they will be able to use at a later time. His patient can use this for pain control when the patient is not hypnotised.

Mr. Art Barker- The director of The Seed.

Dr. Elliott T. Barker- President of the Canadian Society for the Prevention of Cruelty to Children.

V.F. Bassin- Efforts toward the aimed telepathic manipulation of human consciousness.

Wouter Basson- Dubbed "Dr Death" by South African media, Basson is accused of supplying drugs for cross-border kidnappings and providing cyanide suicide capsules for specialised military units fighting anti-apartheid activists.

It is also alleged that Project Coast was researching birth control methods to reduce South Africa's black population, directly oppressed by white minority rule until 1994. Project Coast.

Jan Bastiaans -Had worked with narco-analysis since 1946, and continued using this method throughout his career. But for those patients for whom barbiturates were not effective enough to open up their unconscious, he added LSD to his treatment repertoire in 1961. Director of the Psychoanalytic Institute in Amsterdam from 1954 to 1963.

Gregory Bateson- Margaret Mead's former husband. In 1959 Bateson, in turn, helped arrange for Allen Ginsberg to take the drug (LSD) at a research program located off the Stanford campus. Bateson headed a Veterans Hospital in Palo Alto. California where he aided in experiments administering LSD to patients in the hospital. Bateson, a British national, began his career as a student of Norbert Wiener's work in cybernetics, and developed his own theories claiming that schizophrenia and other mental aberrations were all the product of chemical and other physical-mechanical imbalances in the human brain, which could be corrected through the use of psychotropic drugs. Worked with Lilly.

Lt. Col. Alexander Batlin- Office of the Assistant Secretary of Defence, (Research and Development)-Research on Psycho Chemicals. LSD.(Hoch)
Raymond Bauer- Volume on Soviet psychology. Human Ecology Fund, CIA.
Thomas E. Bearden- In a February 1991 interview conducted by Michael Hutchison, editor of Megabrain Report, Bearden revealed that "scalar electromagnetic phenomena" make it possible to construct "thoughtforms to order, and input them directly into the mind and long term memory." This can be done through "a hidden channel to pipe in inputs" and it can be done " surrepticiously , from a distance and without the knowledge and consent of the individual affected," he said further. Bearden calls this "the ultimate mind control. "
Dr. Aaron T. Beck -Is the father of Cognitive Behavioural Therapy (CBT) which was developed with Ellis and helped to form Positive Psychology. Beck was a Military Psychologist at Walter Reed Army Hospital who also went on to influence Seligman and Kidman. He joined the Board (FMSF) in May of 1995 after Martin Orne and Harold Lief informed him of its existence. "I was convinced it was a very valuable enterprise," Dr. Beck said.
Dr. Robert Becker- "Synthetic Telepathy Has applications in covert operations designed to drive a target crazy with voices or deliver undetected instructions to a programmed assassin." 1985.
Stephen Behnke -APA's ethics director. APA officials collaborated with defence department officials "to defeat efforts by the APA's legislative body to introduce and pass resolutions that would have definitively prohibited psychologists from participating in interrogations at Guantanamo Bay and other US detention centres abroad".
Alexander Graham Bell- Helped lead the First International Eugenics Conference in 1912. Bell also published a paper in which he bluntly listed the steps that would prevent the proliferation of the deaf: "(1) Determine the causes that promote intermarriages among the deaf and dumb; and (2) remove them."
Juan Carlos Izpisua Belmonte- Researchers have successfully created the first human-monkey chimaera. The first embryo

containing both human and monkey cells that was cultured for 20 days.

John Beloff -A British psychologist and pioneer parapsychologist who was instrumental in setting up the Koestler Chair of Parapsychology at Edinburgh University. He was also President of the Society for Psychical Research (1974-1976).

Dr. Clemens E. Benda- Radiation experiments on children.

Hans Bender -A pioneering German parapsychologist who established the parapsychological Institut für Grenzgebiete der Psychologie und Psychohygiene (IGPP) in Freiburg, Germany. He is also known for his studies of hauntings and poltergeists, including the famous Rosenheim Poltergeist case.

An outstanding case of political prophecy--two letters written in August 1914 by a Bavarian soldier to his family which contain exact prophecies of World War I, Hitler's fascism, and World War II--was thoroughly investigated by Bender who first reported on his documentation of the authenticity of the letters at the second Conference of the Society for Psychical Research in Cambridge, March 1978.

Loretta Bender- A highly respected child neuropsychiatrist practising at Bellevue Hospital in New York City, experimented extensively with electroshock therapy on children who had been diagnosed with "autistic schizophrenia." In all, it has been reported that Bender administered electroconvulsive therapy to at least 100 children ranging in age from three years old to 12 years, with some reports indicating the total may be twice that number. One source reports that, inclusive of Bender's work, electroconvulsive treatment was used on more than 500 children at Bellevue Hospital from 1942 to 1956, and then at Creedmoor State Hospital Children's Service from 1956 to 1969.

Other physicians whom Dr. Bender consulted about the effects of LSD on children were Drs. Ronald A. Sandison, Thomas M. Ling and John Buckman. These three worked in England at both the Chelsea Clinic in London and Gatwick Hospital in Worcestershire, outside of London.

Dr. Bender is best known and highly regarded in some circles as the creator of the Bender-Gestalt Test, which measures motor skills in children.

Edward Bennett- University of Houston, MK-ULTRA contractor.
James V. Bennett -Said, "It was indicated that we are a large organisation with some 24,000 men in it now, with 31 different types of institutions, and that we have a tremendous opportunity here to carry on some of the experimenting to which the various panellists have alluded. We can manipulate our environment and culture. We can perhaps undertake some of the techniques Dr. Schein discussed.... What I am hoping is that the audience here will believe that we here in Washington are anxious to have you undertake some of these things. Do things on your own--undertake a little experiment with what you can do with the Muslims--undertake a little experiment with what you can do with some of the sociopathic individuals."

Dr. James Bennett, one time Director of the United States Bureau of Prisons, has supported the use of behaviour modification under the following rationale: "If it could be shown empirically that hitting an inmate on the head with a hammer would cure him, I'd do it."
Warren Bennis- Tavistock director. (Eric Trist)
Dr. Theodor Benzinger- Head scientific director of the Naval Medical Research Institute (NMRI) at Bethesda from 1947 to 1970. Operation Paperclip.

Aksel Ivanovich Berg -(Russian: Аксель Иванович)-USSR's Academy of Sciences Telepathic experiments.
Beatrice Berle- The medical condition of Puerto Rican families in New York City during the 50's. Her study addressed the question of why specific geographic or ethnic groups show higher or lower incidences of disease. Human Ecology Fund, CIA.
Louis Berlin -In 1955, administering acid to four graphic artists. Fellow artists found the work they produced on the drug to be more creative than their sober work. (Wolff)
Viola Bernard- The New York City physician performed experiments on children given up for adoption between 1960 and 1978. The multiples were sent to different families without the knowledge of their biological mothers — and the adoptive parents were never told that their new infants had identical siblings.
Edward Bernays- An American theorist, considered a pioneer in the field of public relations and propaganda. In the 1950s, connected with the CIA-orchestrated overthrow of the democratically elected

Guatemalan government in 1954. He worked for dozens of major American corporations including Procter and Gamble and General Electric, and for government agencies, politicians, and nonprofit organisations.

Lippmann and Bernays divided their Committee into nineteen 'divisions', each responsible for a different type of propaganda, and each utilising the expertise of vast numbers of psychologists, advertising experts, media personnel and movie moguls.

Kenneth F. Berrien- Fallout shelters and attitudes toward nuclear war. The Human Ecology Fund, CIA. psychology. $2,500.

Dr. Bill Bibb -Oak Ridge Defence Programs.

Albert D. Biderman- The Manipulation of Human Behavior, researched the brainwashing of American POWs during the Korean War. He worked as Principal Investigator of an Air Force Office of Scientific Research contract studying stresses associated with captivity. Biderman was also Senior Research Associate at the Bureau of Social Science Research.

Dick Bierman PhD -(Universities of Utrecht and Amsterdam) a physicist and parapsychologist who is interested in the relationship between quantum physics and consciousness. He is known for developing true random generators (RNG) and for his involvement in the Global Consciousness Project. The Performance of Healers in PK Tests with Different RNG Feedback Algorithms. The main emphasis was on healers, workshops on hypnosis, psychophysiology, and problems related to observational theory.

Wilfred Bion- Kurt Lewin application of topological psychology. British psychiatrist; Bion's wartime collaborator, Eric Trist. He started working at the Tavistock Clinic in 1932 and studied under JA Hadfield and went with him to the Portman Clinic. Bion was then Tavistock's leading group theoretician, and he had been influenced by Melanie Klein (a protege of Anna Freud), a child psychologist who trained many Tavistock leaders.

Christopher Bird- Served in the Army, specialising in Psychological Warfare. After leaving the military, he worked at the CIA-connected Rand Development Corporation. Later, Time Magazine correspondent in Yugoslavia. 1972 - Co-authored The Secret Life of Plants with ex-OSS agent Peter Tompkins. Was/is the

"Biocommunications Editor/Russian Translator" of Mankind Research Unlimited.

Albert Birdman- S elf-inflicted pain led victims to feel guilt for their own predicament and cooperate more effectively. The goal was therefore to devise methods that would make the prisoners believe that their suffering was self-induced rather than perpetrated by their interrogators. (Irving Janis, Harold Wolff, and Lawrence Hinkle)

J. P. Bisaha- Remote viewing.

Richard M. Bissell Jr- A pproved the Georgetown part of the mind control program.

William C. Black, MD- S elected 23 children more or less at random from his patients and injected them with infected tissues in order to show that disparate symptoms were caused by a single virus, the newly discovered herpes virus.

Ron Blackburn- F ormer microwave scientist and specialist.

Susan J. Blackmore- Prospects for a Psi-Inhibitory Experimenter. Errors and Confusions in ESP. A Study of Memory and GESP in Young Children. (General Extrasensory Perception) A British psychologist, researcher, writer and broadcaster. Her interests include consciousness studies, altered states and parapsychology.

Robert R. Blake- The Experimental Investigation of Interpersonal Influence, by Robert R. Blake and Jane S. Mouton, Professor of Psychology, University of Texas, and Social Science Research Associate, University of Texas, respectively.

W.W. Bledsoe-S tudy of the genetic code. Pattern recognition. Human Ecology Fund, CIA.

Dr. Kurt Blome- Two months after his Nuremberg acquittal, Blome was interviewed at Camp David, Maryland, about biological warfare. In 1951, he was hired by the U.S. Army Chemical Corps to work on chemical warfare. Kurt Blome- Deputy Reich Health Leader, and a Plenipotentiary for Cancer Research in the Reich Research Council. During WW2: he was in charge of all biological warfare sponsored by the SS and the Wehrmacht. The US intervened in his subsequent prosecution for wartime atrocities and hired him. Camp Detrick, Maryland, centre of America's biological warfare program. He was then hired by the US Army Chemical Corps to work on top secret chemical and biological warfare projects.

A.V. Bobrow (А.В.Бобров)- The centre 'Vent' - in different forms – existed until 2005, with funding and active works up to the end of the 90s. According to publications in, the work of the centre has lasted at least until 1995, more recent publications are related to the 'International Institute of Theoretical and Applied Physics'. The peak of research activity associated with instrumental psychotronics, continued until 2002-2003.

Dr. J. Sanbourne Bockoven- LSD research at the Boston Psychopathic Hospital. Dr. Bockoven said he considered the LSD work at the Boston Psychopathic Hospital to have been "a model of superb, excellent research."

Edwin G. Boring- Harvard University, Martin Orne. Vision and perception.

Charles Bovill- He developed 10-30 Hz strobe light which can produce seizures, giddiness, nausea, and fainting.

John Bowlby- Tavistock Clinic in London. R.D. Laing. Spent most of his career at the Tavistock Institute. He did participate in the UK Macy Conferences. Bowlby knew of work by social psychologist Kurt Lewin. Maudsley Hospital as a psychoanalyst. Deputy Director of the Tavistock Clinic. Bowlby closely examined the generational impact of attachment and how it affected behaviour. He believed that attachment behaviours were inherent survival mechanisms designed to protect an infant or child from predators.

Herbert Boyer- A t the University of California, creating a research-based company called Genentech in 1976. Boyer had developed one of the key techniques that opened up the possibility of the transfer of genes from one organism to another. He pioneered the use of restriction enzymes to snip segments of DNA out of cells. (Robert Swanson)

G. J. Bradish- Princeton Engineering Anomalies Research, School of Engineering/Applied Science. Remote viewing.

Dr. Bradley- Department of Experimental Psychiatry at Birmingham University also received substantial funding via the Rockefeller Foundation during the early 1950s for a five-year research programme. Dr Elkes was appointed as head of the programme.

William Braud PhD -A professor of psychology at the Institute of Transpersonal Psychology (now Sofia University). His research in

transpersonal psychology and parapsychology focussed on exceptional human experiences, alternative ways of knowing, and expanded research methods.

Sturmbannführer SS Dr. Wernher von Braun - National Aeronautics and Space Administration (NASA).

Dr. Earl Brian -An advocate of state subsidies for the Center for the Prevention of Violence. Governor Ronald Reagan's Secretary of Health, was adamant about his support for mind-control centres in California. He felt the behaviour modification plan of the Violence Control Centers was important in the prevention of crime.

Harold Bridger- O ne of the 12 founder members of the Tavistock Institute of Human Relations, London. taught the Tavistock Workshop at NTL's Bethel, Maine retreat since 1970, is working with the North American consultant of the genocidal Club of Rome and with the NTL.

Urie Bronfenbrenner- Child rearing in three cultures. Human Ecology Fund, CIA.

Richard S Broughton- An Investigation into the Use of Aversion Therapy Techniques for the Operant Control of PK Production in Humans. A PK Experiment with a Covert Release-of-Effort Test.

P. Brugnoli- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Josephine Hilgard, Kay Thompson, Herbert Spiegel, John Hartland, Per-Olaf Wikstrom, and Erika Fromm.

Richard Broughton PhD- American psychologist and parapsychologist. He is Senior Lecturer in Psychology at the University of Northampton (UK). He was formerly Director of the Institute for Parapsychology (now the Rhine Research Center) and President of Intuition Laboratories, Inc. He is a past President of the Parapsychological Association (1987; 1996) and Society for Psychical Research (2011-2015).

Dr. Charles Brown- "Children were used as subjects because they were more fun to work and cheaper, too." They needed lower profile subjects than soldiers or government people.

Among Dr. Brown's 280 psychosurgery patients have been some prisoners and institutionalised patients. But a proposal to extend this treatment to other prisoners in the California state system was halted.

Courtney Brown- Remote viewing.

Don Brown -T he head psychologist in the Department of Education. Lake Alice psychiatric hospital.
Dr. M. Hunter Brown- Santa Monica, Calif. a neurosurgeon in private practice, specialises in psychosurgery on patients with incurable schizophrenia and violence. He said that so far his operations, which involve up to six sites in the brain, have been successful in more than 90 percent of cases.
Iben Browning- Computer simulation of a simple society. Artificial intelligence. Human Ecology Fund, CIA.

Dr. Ivor Browning -L aboratory was set up in New Mexico, specialising in working with the hypothalamus or "sweet spot" of the brain. Here it was found that stimulating this area could produce intense euphoria.
Dr William Jennings Bryan- Psychologist and reportedly chief of medical survival training for the United States Air Force became a CIA"under long term hypnosis, and, probably drugs". Under that combo , yes you could brainwash a person to just about anything. Bryan was put on probation by the California State Board of Medical Examiners "after having been found guilty of having sexual relations" with four women he had hypnotized. Had Bryan admitted that a hypnotist could manipulate others into doing something against their will or moral code, he might have had to face multiple charges of rape."
Lyn Buchanan- Remote Viewer formerly with the INSCOM/DIA program at Fort Meade and afterwards, from 1984-92. Involved with TREAT (Treatment and Research of Experienced Anomalous Trauma), a series of UFO abduction related workshops.
Dr. John Buckman- Prior to January 1966, Doctor Buckman worked for ten years at the Marlborough Day Hospital in London, one of the first day hospitals in the world and the prototype of community psychiatry. It was in 1956, that Doctor Buckman began his work with hallucinogens, both in psychotherapy and research. These studies included drugs like LSD, mescaline, psilocybin, sernyl, as well as the amphetamines and ritalin.

In 1953, during his last return voyage from Korea, he had a chance to work with some 500 repatriated British prisoners of war and became interested in their experiences of sensory isolation and indoctrination. On leaving the British Army in 1954, he began his

psychiatric training in Epsom Hospitals and later at the Maudsley Hospital in London and the Tavistock Clinic and Institute of Human Relations in London. He received his training in Neurology at the National Hospital, Queens Square, in London.

The President-Elect of the Neuropsychiatric Society of Virginia

Dr. Neil Burch- CIA contractor and co-author with West, Director of the Research Division of the Texas Research Institute of Mental Sciences, co-author with Heath. LSD work.

Graham Burrows -Martin Orne associate.

Prof. Cyril Burt- Tavistock psychiatrist, eugenics activist, a leader of the "psychical research" movement (seances, ESP, ghosts), who was notorious for fraudulent "twins" research.

Colonel Frank Burns- R ecruited and trained a Delta Team of psychics. the basis for the INSCOM Center Lane Project or ICLP.

Dr. William 'Bill' Burr- Oak Ridge Defence Programs. The focus of the Oak Ridge medical work was on cancer treatments, and that ORINS work was consistent. Residents of the Oak Ridge area testified that they were refused medical care by physicians in the area when it was determined that their ailments were the result of chronic radiation exposure.

Sir Frank Macfarlane Burnet- Was a member of the Defence Research and Development Policy Committee in Australia– which planned to develop bio-weapons to wipe out the 'teeming hordes' of Asia. Shortly after Lederberg arrived on his Fulbright Scholarship, Burnet attended a meeting with the Department of Defence to discuss Australia's use of Biological Weapons – not long after returning from Porton Down Chemical and Biological Weapons research centre in the United Kingdom. Burnet epitomised the genocidal intent behind calls for population control: Department of Defence documents declassified in 2003 showed that in 1948, he had advocated preemptive biological warfare against Asian nations, to prevent their population growth from becoming a threat to Australia.

W. D. Burton- Co-author with Burch, Saltzberg, etc.

Konstantin Buteyko- Laboratory of Non-Traditional Treatment at KIEM-took part in several successful ESP experiments. "perfected his method" of ESP. Medical specialists could transmit bioenergy to patients and help them to control and cure their illnesses.

Dr. Eldon Byrd- Work on neuro-influence weapons (Navy). In October, 1973, Byrd did experiments with Uri Geller. Eldon Byrd who worked for Naval Surface Weapons, Office of Non-Lethal Weapons, was commissioned in 1981 to develop electromagnetic devices for purposes including 'riot control', clandestine operations and hostage removal.

Eldon Byrd Published a paper on the telemetry of brain waves in the Proceedings" of the International Telemetering Conference, 1972. Byrd was a physical scientist at the Naval Surface Weapons Center, White Oaks Laboratory, Silver Springs, Maryland.

C

C.P. Cabell- Approved at the Georgetown part of the mind control program.

H.A. Cahn- Astral projection.

David Smith Calverley- An American psychologist. He studied "hypnotic behaviour" with Theodore Xenophon Barber. They measured how susceptible patients were to hypnotic induction. One result of their research was showing that the hypnotic induction was not superior to motivational instructions in producing a heightened state of suggestibility.

Dr. Carlson- Would throw the man into solitary confinement, deprive him of all the normalities of life to which every other prisoner is entitled, and indicate to the prisoner, in no uncertain terms, that he would rot in that darkened, 4 by 6 cell unless he comes to his senses and agrees to volunteer for a program which will "make him a winner in the game of life."' Though such conduct may not be aversive therapy in its clinical meaning, it is most certainly not positive reinforcement.

Donald Ewen Cameron- C reator of the concept of " psychic management" in which the CIA was particularly interested. Cameron wanted to correct schizophrenia by erasing existing memories and reprogramming the psyche . He moved from Albany, New York to Montreal weekly to work at the Allan Memorial Institute of McGill University being paid by the Agency with $69,000 from 1957 to 1964 to do MK ULTRA experiments. Cameron was also a member

of the Nuremberg Medical Tribunal in the biennium 1946-47. Dr. Cameron was president of the American Psychiatric Association (1952-53), Canadian psychiatric Association (1958-59), American Psychopathological Association (1963), Society of Biological Psychiatry (1965), and World Psychiatric Association (1961-66).

Gokse Cansever- Psychological effects of circumcision. Funded by the CIA research front known as the Human Ecology Fund. $500.
Hadley Cantril- W orked with Muzafer Sherif. Cantril studied panic situations. Major contributions in psychology of propaganda; public opinion research; applications of psychology and psychological research to national policy, international understanding, and communication; developmental psychology; psychology of social movements; measurement and scaling; humanistic psychology. Princeton University.
Joseph J. Cappucci -Head of Air Force counterintelligence/Zeta-Diogenes Program.
Etzel Cardeña PhD- A Mexican psychologist and parapsychologist. He is Thorsen Professor of Psychology at Lund University, Sweden. His research focuses on the areas of hypnosis, dissociative states and anomalous experience.
Emily Farrell Carota- Wife and co-author of Martin Orne.
William K. Carr- Anthropological identification of the determinants of Chinese behaviour. Human Ecology Fund, CIA. Joined the staff of the Human Ecology Fund. Spent 1960 at the Academia Sinica in Taiwan.
John B. Carroll- Self-instruction language program. The Human Ecology Fund, CIA. education. $2,456.
Capt. V. L. Carter -VC Injections and subject health status. Aeromedical Research Laboratory, Holloman AFB, New Mexico, and the Aerospace Medical Research Laboratories, Wright-Patterson AFB, Ohio.
Dorwin Cartwright- The Research Center for Group Dynamics relocated to Michigan in 1948. laboratory experiment dealt with the effects of discrimination on group morale and functioning, and the effects of group actions that could overcome discrimination. Another focused on a study of the morale and workers' perceptions of social power within the Michigan Bell Telephone Company. Rensis Likert

and colleagues (Angus Campbell, George Katona, Charles Cannell, and Leslie Kish)

Richard Casey- Australia's Intelligence agencies. ASIO (Australian Security Intelligence Organisation) and ASIS (Australian Secret Intelligence Service).

Robert Van de Castle- A professor of sleep studies who believed in premonitions and sort of the truth of premonitions that come in through your dreams. He brought this team out to SRI to meet Uri Geller and to meet the two scientists at SRI who were doing the work.

Gabriel Casuso- Antecedents of revolution. The Human Ecology Fund, CIA. psychology. $1,500.

Dr. James Cattell- Subjected Mr. Blauer to multiple injections of massive doses of a mescaline derivative whose ingredients they did not even know. exposed unwitting patients to high dose psychedelic drug experiments whose foreseeable risks of brain damage, mental incapacity and death were known.

Charlene Cavanaugh- Center Lane (civilian analyst with INSCOM).

Dr. John Cavanaugh- Acovert contractor for the CIA. Cavanaugh made over 50 trips overseas related to CIA Project Artichoke. Cavanaugh also consulted closely with Drs. Harold Abramson, Harris Isbell and Robert Hyde. In Louisiana, Cavanaugh was especially interested in the CIA-funded work performed by Dr. Robert Heath with placing implants in the heads of a number of federal prison subjects.

Dr. E.L. Chaffee- A method for Remote Control of Electrical Stimulation of the Nervous System", a monograph R.U. Light.

Dr. Wallace Chan- The purpose of this project was to continue the utilisation of Dr. Dr. Wallace Chan who during this period was located at the department of Medicine, Neurology Division, Stanford University School of Medicine. He did clinical testing and evaluation of anti-interrogation drugs, monitored other projects being performed at Stanford, attempted to develop miniature polygraph, reviewed literature, attended and reported on meetings, and acted as a consultant. subproject 71: MK-ULTRA.

Lt. Col. Jim Channon -First Earth Battalion Operations Manual, written in 1979. Develop a Super Warrior capable of Remote Viewing.

A.L.Chigevskiy (А.Л.Чижевский)- R esearch activities, denoted today as unconventional, have been conducted. For instance, these are related to the impact of weak and strong electromagnetic emission on biological objects, quantum entanglement in macroscopic systems, and nonlocal signal transmission based on the Aharonov-Bohm effect, 'human operator'.
Harold Chipman (Alias, "Orwell")- The CIA's main contact in funding SRI's. DIA called this method Target Phenomenology. Chipman had been Chief of Operations of Nha Trang Office called the Combined Studies Detachment, in Vietnam, had previously been stationed in Moscow, Berlin and Miami, and had served in Sumatra (Indonesia), Korea, Philippines and Laos. The CIA station chief was responsible for all mind-control research in the Bay Area in the 70s.
Dr. George Brock Chisholm- T rained as a psychiatrist at the Tavistock Psychiatric Clinic in London, and Tavistock. Canadian Army medical director. The first director of WHO.
Winston Churchill -Advocated for compulsory labour camps for mental defectives in 1911. The year prior to this, Churchill wrote a letter advocating for sterilisation saying, "The unnatural and increasingly rapid growth of the Feeble-Minded and Insane classes ... constitutes a national and race danger which it is impossible to exaggerate."
Dwight Clark- Dr. Friedell told Advisory Committee staff in an interview that he did not order the injection and that it was administered by a physician named Dwight Clark Oak Ridge Army hospital.
Dr. John Clark- Anti-cult network CIA.
Dr. Cleghorn- A ssociate of Cameron and Azima.
L. Cobrinik -LSD experiments on children with Autism.
Dr. Allan Cohen- Concord Prison Experiment.
Dr. Sidney Cohen- Conducted early LSD research in the 1950s and was a noted U.S. public expert on drug abuse from the 1960s to the 1980s. Cohen also conducted a number of very loosely-controlled experiments with LSD, resulting in descriptions of LSD experiences. Cohen provided LSD to Clare Boothe Luce and Bill Wilson, founder of Alcoholics Anonymous, among numerous others. Cohen presentation, The Interaction of LSD and ESP.
Dr. Jon B. Cole- the relative safety and effectiveness of four sedating injectable drugs — haloperidol, midazolam, olanzapine and

ziprasidone — in patients with agitation in the hospital emergency department setting. Hennepin County Medical Center (HCMC) in Minneapolis, Minn. Four trials, which had been conducted from 2014 to 2018. (Dr. Lauren R. Klein)

Dr. Frank Comas -Oak Ridge Defence Programs.

Gion Condrau -And Arthur Stoll observed that people diagnosed as "psychotics" had a stronger tolerance for LSD and that the effects of the drug were similar to the symptoms expressed by psychotics themselves.

Alfred Conlon- Conlon had a belief that the ideas that shape society come from a fairly small elite. Conlon a team: the anthropologist W. E. H. Stanner; the lawyer Julius Stone; a young banker James Plimsoll, later to become head of External Affairs and Governor of Tasmania. The poets James McAuley and Harold Stewart joined as did another anthropologist Camilla Wedgewood, the Mitchell Librarian Ida Leeson. And, of course, John Robert Kerr.

William Boyd Cook - MK-ULTRA contractor. Isolate compounds from natural products which have psychogenic properties. Initially research was done on seeds from the plant Ipomoea sedifolia Choisy, a Mexican and Cuban trailing vine. Rivea Corymbosa and the fungus Amanita Muscaria, a mushroom.

Miles Copeland- A former Agency specialist on the Arab world, claims the Agency uses "really effective truth drugs which automatically lower a person's 'discretion' threshold without his being aware of it." He claims the CIA can administer such drugs through undetectable chemicals and bacteria sprinkled on an ordinary postage letter. He adds the CIA has also developed variations of LSD which can be slipped to public figures to cause them to act irrational or overly emotional (a technique reportedly used on presidential candidate Edmund Muskie in Maine), thereby destroying their public credibility.

Suzanne Corkin, Ph.D. -Hartford Hospital with (William Beecher) Scoville and (Brenda) Milner, then at the Montreal Neurological Institute, and since 1964, at MIT and MGH (Massachusetts General Hospital). A pioneer in the study of the cognitive neuroscience of memory.

John Richard Corkran- Accused of injecting patients aged under 16 at the hospital's child and adolescent unit with paralysing drugs as

punishment, between 1974 and 1977. Lake Alice psychiatric hospital.

Robert Cormack -Children's International Summer Villages Inc.MK-ULTRA contractor Subproject 103 -Study in non-verbal communication to assess communications between 16-year old children at a reunion of those who had attended a Children's International Summer Village at age 11. (A.B. Kristofferson)

Beatrice V. Cossel- Journal: Graphologische Schriftenreihe. The Human Ecology Fund, CIA. $1,470. Three workshops.

Dr. Erminio Costa -W ho made critical discoveries regarding the effect of LSD on the human brain.

Gardner Cowles- Cowles was a donor to the Gardner Cowles Foundation, an executive of the Farfield Foundation, a CIA front.

Lt. General William Creasy -C hief officer of the US Army Chemical Corps during the 1950s, preached a new, LSD-influenced military gospel of "war without death." During Congressional testimony, Creasy called for the testing of hallucinogenic gases on subways in major American cities.

Brigadier General William M. Creasey had earlier told the mayor, Eric Hoyer, that the purpose of the testing would be "to conduct certain meteorological studies regarding the smoke screening of cities from aerial operations." This explanation was itself a smoke screen for the Army's real intent to investigate how fake germs could scatter in a northern city whose climate and geography resembled that of many cities in the Soviet Union.They introduced quinuclidinyl benzilate "BZ" – a super hallucination. It was significantly too strong and lasted for days to weeks. BZ could also be deadly if taken too much. But it also could be released in the air unlike LSD. LSD was the stepping stone to BZ.(Minneapolis)

Francis Crick -Is quoted as saying, "in an attempt to solve the problem of irresponsible people and especially those who are poorly endowed genetically having large numbers of unnecessary children ... sterilisation is the only answer."

Dr Eric Cunningham -A close collaborator of Tavistock operative, Dr William Sargant.

Major Ed Dames- Was assigned to the Army Inscom project CENTER LANE, which was later led under STARGATE. His nickname is "Dr. Doom ".

Clarence Darrow -Had no personal empathy for the disabled, as he addressed the separate problem of deformed children by remarking, "Chloroform unfit children. Show them the same mercy that is shown beasts that are no longer fit to live."

Ram Dass (Born Richard Alpert)- A colleague of Timothy Leary Speaker and teacher at Esalen.

H. David- Publications of International Resources in Clinical Psychology. The Human Ecology Fund, CIA'.

Rabbi Maurice Davis- Citizens Engaged in Reuniting Families. anti-cult networks vintage mid-1970s centred around MK -Ultra-CIA. Rabbi Maurice Davis is another "expert" guarding America from cults as a director of the American Family Foundation. Davis worked at the NIMH Lexington Addiction Research Center as a chaplain, serving victims of the MK-Ultra drug experiments as they were brought into cult participation. Rabbi Davis then moved to Indianapolis and sponsored the career of Rev. Jim Jones, whose followers were murdered with poisoned Kool-Aid in Guyana.

E.Y. Davitashvili- Academy of Sciences commissioned the Institute of Radio Engineering and Electronics, AS USSR – the lead agency of the Academy of Sciences to study weak signals, the program of studying physical fields from biological objects in order to create fundamentally new methods of medical diagnostics.

Charles B. Davenport -A Harvard-trained biologist, spoke directly to philanthropy's contempt for charity, along with the former's yearning to solve problems at their roots. In a booklet published in 1910, Davenport bemoaned the fact that "tens of millions have been given to bolster up the weak and alleviate the suffering of the sick" while "no important means have been provided to enable us to learn how the stream of weak and susceptible protoplasm may be checked." He insisted that "vastly more effective than ten million dollars to 'charity' would be ten millions to Eugenics. He who, by such a gift, should redeem mankind from vice, imbecility and suffering would be the world's wisest philanthropist."

R. C. Davis -P rofessor of Psychology, Indiana University, Physiological Responses as a Means of Evaluating Information.
Dr. Wade Davis- T ravelled through Haiti at the request of Dr. Nathan S. Kline with the motivation to discover what causes Haitian zombies.
Dr. Eric Cunningham Dax- Dax was for decades an associate of Tavistock' s longtime leader and World Federation of Mental Health chairman, Dr. John Rawlings Rees. Beginning with his collaboration with Rees in the late 1930s, Dax, by his own account, had specialised in "brainwashing." In the early I 950s, Rees sent two of his "psychiatric shock troops" to Australia, Dr. Eric Cunningham Dax and Dr. Fred E. Emery.
A. A. Deev (А.А.Деев)- Operator-independent ways to generate and to sense the emission, which was previously detected only by human operators. devices of A.A.Deev were tested at the Institute of Clinical and Experimental Medicine, Academy of Medical Sciences (Director V.P.Kaznacheev) in 1981). The Deev's generator was based on spin-polarised materials.
Melvin DeFleur- University of Indiana, MK-ULTRA contractor.
Deborah Delanoy PhD -An American psychologist and parapsychologist whose research focuses on methods of ESP testing and training, physiological aspects of psi, and direct mental interaction with living systems (DMILS).
Dr. Jose Delgado- Neurosurgeon, professor at Yale. A Spanish professor of physiology at Yale University, famed for his research on mind control through electrical stimulation of the brain. His earliest work was with cats, but he later did experiments with monkeys and humans, including psychiatric patients.
EWJ Demarr- Use of placebos in therapy and in clinical pharmacology. Murphree, H. B.; DeMarr, E. W. J.; Williams, H. L.; Bryan, L. L. Effects of lysergic acid derivatives on man; antagonism between d-lysergic acid diethylamide and its 2-bromo congener. J. Pharmacol. Erp. Ther. 1958. (Eucene W. Demaree)
P. N. Demichev (П.Н.Демичев) – The Secretary of the Central Committee of the Communist Party. The commission was requested to investigate psychic phenomena.
A. J. Derbyshire- Director of the Utica Community Chest. Estabrooks also did experiments on children at St. John's Orphan Asylum and the House of the Good Shepherd, run by the Utica

Community Chest, in Utica, New York. A.J. Derbyshire told Dr (sic) Estabrooks in a letter dated December 7, 1935 that he could supply fifty children aged 9 to 12. This was to be facilitated by Sister Callista.

George Devereux Ph.D. -A psychoanalyst and anthropologist. Crime, sexual delinquency, dreams in non-Western cultures, and cannibalistic drives of parents. Had issues with Margaret Mead.

Dr. Bernard L. Diamond- H ypnotised the Petitioner numerous times while the Petitioner was held at the Los Angeles County Jail awaiting trial. Dr. Diamond went as far as having Petitioner perform whilst under hypnosis ie climbing the bars of his cell (February 8, 1969) or sticking a pin in his hand.

"Dr. Bernard Diamond, who had hypnotised Petitioner on numerous occasions prior to trial, advised defence counsel that 'the jury would not believe that Sirhan had been hypnotically programmed to kill.' ". This statement strongly suggests that the defence team, having witnessed Petitioner under the effect of hypnosis, on numerous occasions, believed that he might, in fact, have been hypno programmed, but due to his conflict of interest, the extremely compromised lead defence counsel Grant Cooper, as discussed infra, chose not to pursue this line of defence. Regarding Sirhan Sirhan.

Henry V. Dicks- Brainwashing and social engineering. Kurt Lewin. Tavistock, topological psychology, method of behaviour modification. Concentrating upon psychological warfare.

Dr. Bruce Dill- Scientific Director, Director Chemical Corps, Medical Laboratory, Army Chemical Center. Research in psych chemicals.

James Dille- 50 students of the University of Washington were given LSD as part of a series of research projects that included a secret Army program to study the possible use of the hallucinogenic drugs in warfare.

David F. Dinges, Ph.D -Co-author with Orne. Studies in sleep deprivation.

Kenneth R. Dirks, M.D .-Brigadier General, MC, Assistant Surgeon General for Research and Development.

Dr. Keith S. Dittman- Research Psychiatrist, UCLA Neuropsychiatric Institute, UCLA Department of Psychiatry. LSD experiments with Sidney Cohen.

Y. H. Dobyns- Response to Hansen, Utts, and Markwick: Statistical and methodological problems of the PEAR remote viewing experiments.
Theodosius Dobzhansky -Was Chairman of the American Eugenics Society.Dobzhansky obtained a fellowship from the International Education Board of the Rockefeller Foundation. Dobzhansky received a Fulbright Research Scholarship in 1959.
Dr Stuart Dodd- As part of Project Revere, the University of Washington dropped millions of leaflets over rural areas of Washington State, Idaho, Montana, Utah, and Alabama. The scholars then surveyed these local communities to understand how, if at all, these messages had diffused throughout the target communities. MK-ULTRA.
James A. Donald- Time Symmetric Thermodynamics and Causality Violation.
Dr. Emmanuel Donchin -Head of Psych. Dept. at Urbana-Champaign's Univ. of IL, worked on thought-controlled machines.
Dr. Lamarque Douyon- W ho headed the Mars and Kline Centre de Psychiatrie et Neurologie in Port-au-Prince and recorded all reports of zombies since 1961. Kline, n 1981 he was contacted by the Haitian-born, Canadian-trained psychiatrist Dr. Lamarque Douyon.
Dr. Downing- Reported on the ongoing work on indoles to the Chemistry Committee in late 1959. He also introduced a paper to the committee in mid-1960 updating the work on indoles and also mentioning work on analogues of tremorine amongst other agents.
James H. Drum- CIA monitor, MK-ULTRA.
W. E. B. Du Bois -W as a leading African-American activist and writer, who called for dividing the black community into four groups. He promoted marriage and reproduction within the most desirable group, the "talented tenth," and wanted to breed out the lowest group, "the submerged tenth."
A. P. Dubrov -Geomagnetic Field, Parapsychology.
I.D. Dubrovski- Efforts toward the aimed telepathic manipulation of human consciousness.
Allen Dulles (CIA)- The director of the CIA, ordered the agency to develop mind-controlling drugs to be deployed against members of the Soviet bloc.
G.N. Dulnev (Г.Н.Дульнев)- Development of a 'psychic line' of Soviet parapsychology.

Gennadiy Nikolaevich Dulnev (Russian: Ду́льнев Генна́дий Никола́евич)- In the 1980s in Russia a group of physics scientists headed by professor G.N. Dulnev conducted many experiments with N.S. Kulagina on the registration of so-called "psycho-kinesis" or movement of physical objects due to psychical influence of the operator. G. N. Dulnev-1994, in St. Petersburg the Energy technology centre.

E

Dr. Clay Easterly- From Oak Ridge National Laboratory lectured on Application of Extremely Low Frequency Electromagnetic Fields to Non-Lethal Weapons. Clay Easterly told the Microwave News that since the conference was closed to anyone without security clearance, he could not discuss the specific effects he referred to in his talk, but he admitted that his presentation dealt with the possibility of developing measures that would affect people.

George Eastman -The founder of Eastman Kodak, Co. A subsidiary of his company, the Tennessee Eastman Corp., was the first operating contractor of the gigantic Y-12 plant in Oak Ridge where enriched uranium was produced.

S.A. Egorov- Psychophysiological research in connection with ergonometric questions, and only peripherally have something to do with parapsychology.

Ira Einhorn- Using his connections with Puharich, he formed what he called the "psychic mafia", which was a collection of researchers bent on bringing psychic and paranormal phenomena into the mainstream. He organised the "Mind Over Matter" conference at Penn State University in late January, 1977. Attendees included Christopher Bird, Andrija Puharich, and Thomas Bearden.

Einhorn led seminars at the Esalen Institute and was involved with the Physics/Consciousness Research Group. He reportedly worked with Congressman Charlie Rose, a large supporter of psychic studies, on classified projects.

Betty Eisner -LSD. The Sequoia Seminars. On November 10, 1955, Betty Eisner became Cohen's first subject in his first LSD study; she worked with Cohen studying LSD for about a year and a half, before moving on to her own psychedelic research. (Harold A Abramson)

Dr Betty Eisner, an American psychotherapist visited Powick in 1958.

Rolf Ejvegaard- Parapsychology and Repeatability.

Paul Ekman- US Army Chief Psychologist, CIA / MK-ULTRA psychologist.

Charmian Elkes -W orked at the National Institute of Mental Health. In 1963, she joined the medical faculty at Johns Hopkins as an associate professor of psychiatry. Study by Joel Elkes and Charmian Elkes, who were married, was the first to report a placebo-controlled trial on the effect of chlorpromazine in psychosis.

Professor Joel Elkes -Professor Joel Elkes (Advisor to Porton Down Labs) British intelligence services. Dr. Elkes helped by raising about $75,000 for the unit's operation. For the next ten years the unit administered over 15,000 doses of LSD to about 900 patients. Dr. Joel Elkes was a CIA covert contractor during the same period who operated the Birmingham clinic, which also received substantial funding through the Rockefeller Foundation. Dr Elkes was also an advisor at Porton Down, the UK's military science park and experimentation facility used extensively by British intelligence services – MI6 in particular. Chairman of the Department of Psychiatry at Johns Hopkins University.

David D. Elliott- Executive Director, Systems research and Analysis Division. SRI. Remote Viewing.

Fred Emery- In 1965, Frederick Emery and Eric Trist developed four models of
organisational environments. Fred Emery, working out of Tavistock and Australia. Senior Research Officer in the Department of Audio Visual Aids at Melbourne University.

Milton Erickson- Psychiatrist and inspiration for Neurolinguistics Programming U.S. intelligence services asked him to meet with other experts in an effort to better understand the psychological and mental factors involved in communications relating to combat. In this capacity, Margaret Mead and Gregory Bateson were among those with whom Erickson worked.

Dr. Frank Ervin- Psychiatrist, Director of Stanley Cobb Laboratories for Psychiatric Research, Harvard Medical School. Psycho-electronic experiments aimed at controlling individual behaviour, ultimately to be used as a means for social control.

Suggested that urban violence, which most African-Americans perceived as a reaction to oppression, poverty and state-sponsored economic and physical violence against us, was actually due to "brain dysfunction, " and recommended the use of psychosurgery to prevent outbreaks of violence.

Dr. George H. Estabrooks -H as acknowledged "the building of Manchurian Candidates," associate of Martin Orne. Dr. Estabrooks conducted experiments on U.S. soldiers to prove his point. Soldiers of low rank and little formal education were placed under hypnotism and their memories tested. Hypnotists were able to control the subjects' ability to retain complicated verbal information.

Experiments on children. He exchanged correspondence with then FBI Director Edgar Hoover about using hypnosis to interrogate juvenile delinquents. He describes experiments to create multiple personalities (DID). In his book Hypnotism, Dr. Estabrooks states that the creation of experimental DID for operational use in military subjects, whom he refers to as super spies, is ethical because of the demands of war. Estabrooks stated: "We know that dual, and even multiple, personality can be both caused and cured by hypnotism. Moreover the Dr. Jekyll and Mr. Hyde combination is a very real one once it is established the key to creating an effective spy or assassin rests in splitting a man's personality, or creating a multiple personality, with the aid of hypnotism. This is not science fiction. . . . I have done it."

W. J. Estelle, Jr.- Director of Texas Department of Corrections.

Dr. Charles Evans- Radiation experiments.

Dr. Everett Idris Evans -And a scientific team working in MCV's burn unit. Funded by grants from the U.S. Army Medical Research and Development Command, Dr. Evans and his team conducted a series of studies involving animal and human subjects to examine the impact of the effects of an atomic blast.

Frederick J. Evans- Co-author with Martin Orne. A student at the University of Sydney, assisted Orne in the 1960 experiment. University of Pennsylvania. Wendy Thorn later collaborated with Fred Evans and Hans Eysenck on MK-ULTRA research at Maudsley Hospital Institute of Psychiatry (IOP) in London. Wendy Thorn and Fred Evans subsequently co-published a paper on hypnotic amnesia in 1966. Able to demonstrate convincingly that hypnotic analgesia was not merely a variant on the placebo response.

Dr. Wayne O. Evans -Director of the U.S. Army Military Stress Laboratory in Natick, Massachusetts.
H.V. Evatt- CSIRO Advisory Council (1965 - 72, under the auspices of Richard Casey and Leonard Huxley. ANU Council (1951 - 72, when Leonard Huxley was ANU Vice-Chancellor).
Dr. Hans J. Eysenck- From the late 50's onward, the IOP was the home of MK-ULTRA Subproject 111. He submitted an application for CIA funds for this subproject shortly after examining Sutcliffe's work – November, 1959. The chief of the CIA's Chemical Branch noted in response that, "Eysenck is one of the most skilful and productive psychologists on the international scene today and a grant to him would add prestige to the Society. MK-ULTRA subcontractor -To study levels of motivation as related to certain personality characteristics and contribute to Technical Services Division's long term interest in indirect assessment. One of the factors in making this grant was "to lend prestige to the Society for the Investigation of Human Ecology, Inc., as a worldwide funding organisation." Eysenck was an influential member of the British Psychological Society and so was an Australian Army Psychologist.

Measurement of motivation. Human Ecology Fund, CIA. (Maudsley)

F

Mark Fallon- A former federal agent and chair of the research committee of President Barack Obama's High-Value Detainee Interrogation Group, which conducts interrogations of high-value terror suspects and sponsors research into interrogation techniques.
Ladislas Farago- A former chief of research and planning in the U.S. Navy's Special Warfare Branch.
Leslie Farber- Psychiatrist CIA, Chestnut Lodge.
G. Faretra -LSD experiments on children with Autism.
Elizabeth Fehr- R e-birthing, Elizabeth Fehr, "Latest Findings (Natal Therapy)," audio letter to R. D. Laing, August 24, 1973.
Carl Feiffer - New Jersey Reformatory at Bordentown (which is inPennsylvania) New Jersey Psychiatric Research Institute, which is where he did the work at Bordentown, he was also the Chairman of

the Department of Pharmacology at one of the major universities in Atlanta ... Emory University.

Dr. Robert Hanna Felix- D irector of the U.S. National Institute of Mental Health. Felix was the immediate senior of Dr. Isbell. served as the first Director of the National Institute of Mental Health (NIMH), 1949-1964, and was an authority on alcoholism and addiction. John C. Lilly, National Institute of Mental Health.

Dr. David Fenimore- The Texas Research Institute of Mental Sciences (TRIMS). Bernard Saltzberg.

Prof. Frank Fenner -"If they can kill rabbits like that, we could get something that killed humans like that, it'd be wonderful. (Laughs) That's the sort of attitude you had to have if you were in that game." on his work at CSIRO. Amember of Nuffield's Australian Advisory Committee and a crusader against population growth.

Marilyn Ferguson- Served on the board of directors of the Institute of Noetic Sciences, and was friends with inventor and theorist Buckminster Fuller and spiritual author Ram Dass. The Aquarian Conspiracy.

Dr Finean- Department of Experimental Psychiatry at Birmingham University also received substantial funding via the Rockefeller Foundation during the early 1950s for a five-year research programme. Dr Elkes was appointed as head of the programme.

'Dr. Fingers'- A hypnotist was recruited from the American Society of Clinical and Experimental Hypnosis. and was selected because his file stated that he would have no qualms about conducting potentially terminal experiments.

Dr. Max Fink- In the early 1950s and beyond, Fink was a CIA Project Artichoke consultant. Who was greatly admired by Bender, is considered the godfather of electroshock therapy in the United States. Paul Gaynor and Morse Allen of CIA's Security Research Service (SRS) oversaw ARTICHOKE. They worked closely with Fink in New York City to thoroughly explore the merits of electroshock techniques for interrogations.

Fritz Ernst Fischer -Was a German medical doctor who, under the Nazi regime, participated in medical experiments conducted on inmates of the Ravensbrück concentration camp.

Dr. Patrick Flanagan- The Neurophone device, developed in 1958 it can convert sound (like words and music) into electrical impulses, which can be transferred through any point on the body directly into

the brain, bypassing the ear and associated hearing mechanisms entirely.

Dr. Flanagan later went to work for Tufts University. As a research scientist at Tufts, he developed a 3-D holographic sound system, which could place sounds in any location in space as perceived by a listener.

Brig. Gen. Don D. Flickinger, ARDC, U.S.A.F. -Air Research and Development Command as the first director of human factors at that command. In this capacity he was responsible for research and development in the human factors area dealing with the biologic, psychologic and sociologic sciences. the Air Force Office of Scientific Research, General Flickinger became the first commander. General Flickinger believes that the projected training program for spaceflight will add significantly to medical knowledge of the chemical and psychological combinations that could indicate a person's ability to face extraordinary stress situations of all kinds.

Luis de Florez- In 1954, as the CIA's chairman of research, de Florez argued against reprimanding those responsible for the then-secret but now controversial MK-ULTRA L.S.D. research program. Study tested and evaluated the effect of LSD and alcohol when administered to individuals falling under various personality categories. Years: 1952-1957. Geschickter Foundation for Medical Research.

Otfrid Foerster- Penfield (who worked with Foerster in Breslau for quite a long time). Together Foerster and Penfield searched for the causes of epilepsy and the surgical methods to treat it. With financial support from the Rockefeller Foundation and the support of the State of Prussia, Foerster was able to open a new Institute of Neurological Research in 1934.

Foerster developed a spinal cord operation that would cut the reflex arc in order to isolate the pathological effects of a lesion. Later on, Foerster extended his operation to the brain in the treatment of epilepsy. Complementary to his surgical interventions, the "plastic" elements of Meynert's reflex system were redeployed in what Foerster called "exercise therapy." Because the nervous system could be shaped by experience, it was possible to establish a new "organisation" of nerves, a process in which certain members of the "reflex community" were recruited for new tasks.

Dr. Sarwer-Foner -Colleague of Azima.

Larry C. Ford -Met with scientists from South Africa's Project Coast in the 1980s to discuss chemical and biological warfare. (Project Coast) connections to the CIA.
Dr. Joel Fort- Founded Project One. Tavistock Institute.
Raymond Fosdick -Recounted that the foundation's investments in natural sciences were still guided by the questions it had begun asking in the 1930s, like whether it was possible to "develop so sound and extensive a genetics that we can hope to breed in the future superior men." 1952, Rockefeller Foundation executive.
Michael Foulkes- (Siegfried Heinrich Fuchs)-Tavistock Clinic. "Northfield Experiments".The Northfield experiments are considered a key moment in the history of psychiatry, group therapy, and organisational studies.
G.M. Frank- Study of paranormal phenomena.
Lawrence Kelso Frank -Was an American social scientist, administrator, and parent educator, particularly known as vice-president of the Josiah Macy Jr. Foundation and together with Frank Fremont-Smith initiator of the Macy conferences.
Fred H. Frankel- He found some phobic patients to be highly hypnotizable and suggestible and thought it likely that the mental mechanisms involved in their symptoms were similar to those responsible for hypnosis. John F. Kihlstrom. Co-author with Martin Orne, Harvard University Medical School.
A.M. Freedman- Gave LSD to 12 children with autism, 10 children and 2 girls, ranging in age from 5 years and 11 months to 11 years and 10 months.
Dr. Daniel X. Freedman- Los Angeles Biomedical Research Institute at Harbor-UCLA Medical Center. Fifteen children with autism were treated with 60 mg d,l-fenfluramine (FEN) or placebo in a double-blind A-B-A protocol followed immediately by double-blind placebo-controlled crossover administration of FEN (total duration 62 weeks).
Dr. Allan Frey- A biophysicist at G.E. 's Advanced Electronics Centre, Cornell Univ. (and a contractor for the office of Naval Research) discovered in 1958 that the auditory system responds to EM energy in a portion of the RF spectrum at low power densities. In his experiments, the subjects were discovered to be able to hear appropriately pulsed microwave radiation, from a distance of a few inches to hundreds of feet from the transmitter. Frey, funded by the

Office of Naval Research and the U.S. Army, was the most active researcher on the bioeffects of microwave radiation in the country. The Frey effect. Occurs when microwaves cause the brain to "hear" ordinary sounds, like loud noises, ringing and even human voices. These can be the result of stealth attacks with sonic weapons.

Dr. Peter Freyd- (Pamela's husband), founder of the Center for the Study of Sex Education in Medicine. Professor emeritus at the University of Pennsylvania. The FMSF was created by Pamela and Peter Freyd. The FMSF officially closed down on December 31, 2019. Received money from the U.S. Office of Naval Research.

Dr. Friedell- Wright Langham, of the Los Alamos Laboratory's Health Division, sent 5 micrograms of plutonium to Dr. Friedell, with instructions for their use on a human subject.

Edward J. ("Fast Eddie") Frischholz, PhD- As a research associate with Dr. Herbert Spiegel, he studied the diagnostic and therapeutic implications of the Hypnotic Induction Profile. Published his first paper at age 23 as the last author with Martin Orne, Ernest Hilgard, Herbert Spiegel, David Spiegel, Helen Crawford, Fred Evans, and Emily Orne.

Charles Fritz- University of Florida, National Research Council, MK-ULTRA contractor Human adaptation to disaster: response to stress and crisis. MK-ULTRA Subproject 126.

Erika Fromm- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Josephine Hilgard, Kay Thompson, Herbert Spiegel, John Hartland, Per-Olaf and Erika Fromm.

Eva Ann Frommer -Early in her career she attracted criticism through association with her senior colleague, the controversial psychiatrist William Sargant, whom she followed for a time in the application of sleep therapy and antidepressant prescription to children. Maudsley Hospital.

Shirley Fry- From Oak Ridge. Assistant director of the ORINS Medical Sciences Division.

Okawa Fukumatsu- A former surgeon at Unit 731, confessed to performing vivisection on a pregnant lady.

David Maxwell-Fyfe- Chemical weapons tests. The coroner's inquest remains secret, citing national security.The sarin gas that killed Maddison.

Carleton Gajdusek- Transmitted a 'kuru like syndrome' into chimpanzees. The results of his experiment were published in Progress Report No.8 of the Special Virus Cancer Program. This program was used as cover for the extension of Project MK-NAOMI at Fort Detrick. He was convicted and sentenced for raping seven boys (of the 56 children) he brought back from PNG to use as live-in sex slaves.

Dr. Ian Gardiner- Chelmsford Private Hospital which used hypnotic drugs, ECT and DST, mostly experimentally and without informed consent. This hospital became Australia's worst psychiatric disaster. (Dr. Harry Richard Bailey).

Karen Gardner -A former senior training official at the FBI Academy. worked for Mitchell, Jessen.

John Gavin Esq - Office of Legal Counsel, US Department of Justice, Washington, DC. Received a letter: "On 26 October, (redacted), an employee of the (redacted), contacted the Office of the Inspector General here at the Agency and related the following information. His wife, whose maiden name is (redacted), was previously married from 1955 until 1960 to (redacted), who was employed by the CIA at that time. In the summer of 1956, according to (redacted), she accompanied her husband to the farm of her husband's supervisor for dinner, drinks and wine. She believes her husband worked for Dr. Gottlieb, who was chief of the Technical Services Staff Chemical Division and heavily involved in MK-ULTRA activities. Her next recollection is receiving electric shock treatment at George Washington University Hospital for some time ..."

Vladimir Gavreau- E xperiments on the biological effects of infrasound.

Paul Gaynor- Of the CIA's Security Research Service (SRS) that oversaw Artichoke, worked closely with Fink in New York City in efforts to thoroughly explore the merits of electroshock techniques for interrogations. An American military officer and Central Intelligence Agency operative. He is best known for his involvement in Project MK Ultra, having overseen and directed its predecessor.

In early January 1953, State Department employee John C. Montgomery, who handled considerable classified material, hanged himself in his Georgetown townhouse after learning of his addition to Gaynor's list. In 1954, U.S. Senator Lester C. Hunt (D-WY) killed himself in his senate office after he was threatened by Republicans, using information provided by Gaynor's staff, to publicly expose his son's homosexuality.

Reinhard Gehlen- Met with the CIA director Allen Dulles. Dulles and Gehlen hit it off immediately. Gehlen was a master spy for the Nazis and had infiltrated Russia with his vast Nazi Intelligence network. Dulles promised Gehlen that his Intelligence unit was safe in the CIA.

A. A. Genkin- Electroencephalogram may serve as one of the objective quantitative measures of suggestibility in man in the wakeful state.

Leonard George- Enhancement of Psi Functioning Through Mental Imagery Training.

Dr. Charles F. Geschikter- The Geschikter Foundation, A Washington foundation that allegedly channelled Central Intelligence Agency funds into research on mind-control drugs is a little-known organisation whose affairs were tightly controlled by its founder, Dr. Charles F. Geshickter. Dr. Charles Geschickter, MK-ULTRA contractor, MKSEARCH contractor

Dulles arranged for a private intelligence facility in West Germany to be established, and named it the Gehlen Organisation. Gehlen promised not to hire any former SS, SD, or Gestapo members; he hired them anyway, and the CIA did not stop him.

Gehlen Org helped more than 5,000 Nazis leave Europe and relocate around the world, especially in South and Central America. There, mass murderers like Klaus Barbie (the butcher of Lyons) helped governments set up death squads in Chile, Argentina, El Salvador, and elsewhere.

De Giacomo -C onfirmed that when subjects with schizophrenia were given large doses of LSD by mouth, they experienced a state of catatonia. He also stated that psychotic patients were more tolerant than healthy patients to LSD, and required higher dosages to produce responses.

Cecil Austin Gibb- Australian National University in Canberra, ACT, headed the department of psychology. Dartmouth College, New Hampshire. E. I. Du Pont de Nemours and Co. employed him. Canberra University College (CUC) and was appointed foundation professor of psychology in 1955.
Willis Gibbons- Technical Services Division, headed in the 1950s.
Dr. Joan Giles- Willowbrook State School. (Dr. Krugman)
John Gill- Chelmsford Private Hospital which used hypnotic drugs, ECT and DST, mostly experimentally and without informed consent. This hospital became Australia's worst psychiatric disaster. (Dr. Harry Richard Bailey).
Allen Ginsberg- The poet who preached the value of the great personal adventure of using LSD, got his first LSD from Sidney Gottlieb.
John Gittinger- Sidney Gottlieb's (US "Dr Death") protégé. Personality Assessment System (PAS). "It was the first systematic effort to evaluate an individual's personality in order to predict his future behaviour" Gittinger concluded that babies were born with distinct personalities which then were modified by environmental factors. Lead psychologist for CIA's MK ULTRA.
David R. Gittinger- Implications of a hypothesised congruence between personality systems. Human Ecology Fund, CIA.
Robert J. Glaser- Trustee and director of medical science, Lucille P. Markey Charitable Trust. Previously, was president of the Henry J. Kaiser Family Foundation. He has served as a top administrator at the Washington University, Colorado and Stanford medical schools.
Henry Goddard- Advocating testing as a method for differentiating who should be permitted to reproduce based on intelligence. Henry Goddard wanted to prove the effectiveness of the intelligence test in differentiating the feeble-minded from the normal population and went to Ellis Island to do so. Goddard's results suggested that, of the immigrants he tested, 80% of the Hungarians, 79% of the Italians, 87% of the Russians, and 83% of the Jews were feeble-minded as indicated by intelligence testing. Lewis Terman and Robert Yerkes.
Dr. E.E. Godik (Э.Э.Годик) -The generator ' Radioson ' can effectively 'treat' the city of about a hundred of square kilometres, plunging its inhabitants into a deep sleep. study of physical fields, USSR.

Dr. Gold- An account of interesting experiments on the gastrointestinal tract it was pointed out that the effect of a drug varies greatly with the patient's mood and that the effect may be significantly altered with a change in the mood. The discussion indicated how such factors might change results in the evaluation of a therapeutic agent.

Joseph Goldberge- Pellagra, he did a study where they changed the diets of federal prisoners, and gave them this terrible, painful condition.

Dr. Goldshe -Radiation experiments, Texas.

Goldstein -"Quantitative Electroencephalographic Analysis of Naturally Occurring (Schizophrenic) and Drug-Induced Psychotic States in Human Males," Leonide, Henry B. Murphree, A. Arthur Sugerman, and Carl C. Pfeiffer.

Col. Aleksandr Viktorovich Golyev- Recounts his education and service in the Directorate of Special Propaganda of the Main Political Directorate of the Soviet Army and Russian Navy (GLAVPUR) and his personal role in overseeing psychological and influence operations in East Germany, Poland and Lithuania in the 1980s.

Dr. Jacqueline Goodnow- At the Walter Reed Army Institute of Research. Shortly after these studies, Jacquline Goodnow and her husband Robert would be working with Dr. John Gittinger at Psychological Assessments Associates (PAA). Specialised in Personality Research and Child Psychology. A Position at Macquarie University in Sydney. Soon after, she would begin work with the School of Behavioural Sciences at Macquarie.

Robert E. Goodnow- Received CIA funds. for the purpose of 'Personality Studies.' a contractor with the CIA's TSS and with the CIA-funded Human Ecology Fund, a front organisation for some MK/ULTRA and other projects. Goodnow was associated with the anesthesiology department at Harvard Medical School and Massachusetts General Hospital.

Dr Daan Goosen- Project Coast's biological research, anti-fertility work carried out at RRL.

F.D. Gorbov- Psychopathological phenomena were absent in the experiments of Soviet cosmonauts in a soundproof chamber.

E. S. Gosney-A self-made philanthropist, created the Human Betterment Foundation, which promoted forced sterilisation in California and reportedly influenced the Nazi eugenics program.
Dr. Jacques S. Gottlieb- Psychiatrist, director of Detroit's Lafayette Clinic, a state-operated centre for research in psychiatry.
Sidney Gottlieb- Head of the agency's secret MK-ULTRA program, which was charged with developing mind control drugs. Chief of Medical Staff, Technical Services Division, CIA. Gottlieb said that the creation of MK-ULTRA was inspired by reports of mind-control work in the Soviet Union and China. He defined it as an investigation into how individual behaviour could be "altered through covert means." Sidney Gottlieb, known as, Joseph Schneider" Doctor Death"
Louis A. Gottschalk- The Use of Drugs in Interrogation, by Louis A. Gottschalk, Assoc. Professor of Psychiatry and Research Coordinator, Cincinnati General Hospital.
Lloyd Gould- Subproject 57: MK-ULTRA: Sleep and Insomnia at GW.
William J. Grace- M.D.-Worked with Harold Wolff and Dennis M. Greenbaum The Laboratory in Clinical Diagnosis M.D. A William , J. GraceM.D., F.C.C.P., Dr. Gold.
Dale Graff- Around late 1976 to 1977, Graff, then a physicist with the Air Force's Foreign Technology Division, gave a small contract to the SRI research team. Graff wanted to replicate some Soviet psi experiments done in submarines, as well as test the Soviet hypothesis that psi was transmitted via ELF (extremely low frequency) electromagnetic waves. These tests were conducted in July, 1977, with the help of Stephan Schwartz.

Graff was stationed at Wright Patterson-Air Force Base, and had taught a class on parapsychology at a local community college. He had also started a small, informal group of remote viewers at the base.
Robert Graves- Graves began corresponding with R. Gordon Wasson (1898-1986) in 1949 and first met him in Mallorca in November 1953. as a mycologist (or mushroom expert) that was of interest to Wasson. Sargant's transition from psychiatrist to populist was aided by his collaboration with the poet Robert Graves.
Dr. Thomas Chivers Graves- Superintendent at two Birmingham mental hospitals simultaneously, Rubery Hill and Hollymoor.

Graves was said to be a frequent visitor to Powick and his influence over Fenton meant that most patients had tonsils, gallbladders and most of their teeth extracted on admission to the hospital. Graves' set-up at Rubery Hill and Hollymoor. The centre comprised an operating theatre and 'treatment rooms', including facilities for colonic lavage.

V.S. Grebennikov (В.С.Гребенников)- Novosibirsk's Branch of the Entomological
Society of AS USSR. The discovered 'effect of hollow structures'.

Dr. Celia Green -Researching ESP and 'out of the body experiences'.

Dr. Christopher Green- Bruce Maccabee's contact with the CIA. attained a Ph.D. in Neurophysiology in 1969 and in1976 received his M.D. (Doctor of Medicine) degree. Green was awarded the CIA's National Intelligence Medal for his work on a 'classified project' from 1979 to 1983.

Herbert Green- Dr Herbert Green's study of cervical pre-cancer took place at the National Women's Hospital in Auckland from the 1960s to the 1980s. An obstetrician-gynaecologist, deliberately withheld treatment of 160 women with abnormal cervical smears in an effort to prove his misguided hypothesis that the cervical abnormalities would not lead to cervical cancer. The women involved underwent numerous procedures designed to observe, rather than treat, their condition. Green enrolled women in the study without their knowledge or consent.

Dr. L. Wilson Greene- The Agency became interested in the potential importance of psychochemicals , primarily because of the enthusiasm and foresight of Dr. L. Wilson Greene, Technical Director of the Chemical and Radiological Laboratories at the Army Chemical Centre. Greene's ideas were included in a report written by him in 1949 entitled "Psychochemical Warfare, a New Concept of War ". Technical Director of the Chemical and Radiological Laboratories at the Army Chemical Center. "Psychochemical Warfare, a New Concept of War".

Dr. Dennis M. Greenbaum- William J. Grace, M.D The Laboratory in Clinical Diagnosis Author links open overlay panel. (Dr. Gold)

Dr. Milton Greenblatt- A ssistant superintendent at Massachusetts Mental Health Center the former Boston Psychopathic. The research

project included experimental use of trifluoperazine on patients at the Waterbury hospital. Hypnosis studies, Martin Orne.
Alan Gregg- Rockefeller Foundation medical director.
Dr. Martin Groder -Founder of Asklepieion. Federal Bureau of Prisons. Was pioneering a new phenomenon, then considered highly successful, by combining Synanon's confrontational techniques, then used in the US prison system, with transactional analysis.
J. J. Groen- Factors that cause individuals to seek medical aid. The Human Ecology Fund, CIA.
Stanislav Grof -Tested the value of LSD in treatment of psychologically ill patients. His goal was to observe the effect of psychedelics on the psychology of terminally-ill cancer patients.Grof would later be involved in research at the Spring Grove Clinic.

Dr. Stanislav Grof, whose vast knowledge of the field is well known. In fact, Grof has administered LSD innumerable times to normal people, neurotics, and psychotics. In many cases, Grof ascertained that his subjects revealed--through vivid images and utterances--many occurrences belonging to their prenatal phases. In some such cases, ESP phenomena have undoubtedly been present. In the last part of the paper, the author reports about a case he treated with psychoanalytic technique using LSD after some time as a help in the treatment. Under LSD, the subject expressed a long series of impres- sions and feelings, all related to his prenatal experiences.

He began his research in Czechoslovakia in 1956, and from 1967 to 1973 he continued his explorations at the Maryland Psychiatric Research Center. He is now associated with the Esalen Institute in Big Sur, California.
Steve Groff- NASA scientist, Dr. Groff wanted to observe how Leary and his clan ran their sessions. They gave him some acid, and he in turn provided samples of a secret drug known only as JB-II8, which the military had developed as an incapacitating agent. Similar to the army's BZ, this potent super hallucinogen simulated a kind of free fall, at the same time triggering bizarre visions.
Mark Grove- First successful unclassified voice to skull experiment in 1974, by Dr. Joseph C. Sharp and Mark Grove, then at the Walter Reed Army Institute of Research.
U.V. Gulyaev- Study of physical fields, USSR.
Robert C. Gunn, PhD- Arbour, Michigan, NSA clinical psychologist currently indicted for

human and Constitutional rights violations of Mind Control.
Doctor E. Manfield Gunn- A CIA doctor, approached Dr. Robert Heath, chairman of the Tulane University department of psychiatry and neurology, a bio psychiatrist who had explored what is described as the pleasure centre of the human brain. Dr. Gunn asked Dr. Heath if he would be interested in exploring the "pain centre" of the brain. Dr. Heath refused, he said in a recent interview, calling the request "abhorrent."
A. W. Guy- Stated that "one of the most widely observed and accepted biologic effects of low average power electromagnetic energy is the auditory sensation evoked inman when exposed to pulsed microwaves."
James F. Guyot- Role conflict in Burma. The Human Ecology Fund, CIA.

H

Von Haagen -Spent much of the war infecting Jewish inmates at the Natzweiler concentration camp with diseases including spotted fever.
Hans van der Haas- Psi Aspects of Self-Recorded Dreams. - Parapsychology, Germany. Research and its impact on our understanding end to An extensive free-of-charge counselling service in regard to personal problems with occultism occupies nearly half of the time of our psychoanalytically-trained collaborator.
General Sir John Hackett- Deputy Chief of the General Staff, told a meeting of the Advisory Council on Scientific Research and Technical Development: "It was very desirable to find a safe incapacitating agent ... General Staff Targets had been issued."
Mr. Haddon -Noted, in a discussion of "(N)ew agents research", that "CDEE now had a directive for the development of incapacitating agents, so they had been right to study these compounds."
Willard James Coppleston "Copse" Hale- Engaged in a larger program of inquiry into
"dissociative states". through the "Society for the Investigation of Human Ecology," The Order of the Third Bird.

Edward T. Hall- The Silent Language." Studies in Intelligence. learning to read the body language of interrogation subjects, which the Human Ecology Fund.

Dr. Robert D. Hall- Worcester Foundation for Experimental Biology.

Dr. James Hamilton- MK ULTRA contractor Miscellaneous research and testing services in behavioural modification. 1. Study the possible synergistic action of drugs which may be appropriate for use in abolishing consciousness through animal experimentation. 2. Survey of methods to enable the administration of drugs to patients without their knowledge.

MK-ULTRA Subproject 140 (at that time renamed MKSEARCH # 3). The letter is requesting a grant to continue research on the "Measurement of Thyroid Function in the Puerperium." 2 (The "puerperium" is defined as the state of a woman while bearing a child or the period immediately thereafter -- i.e., the postpartum period.) The letter notes that the funding will also support "a new series of experiments on 100 prisoner-subjects, in which radio-active iodine uptake of the
thyroid and T-4 uptake of red-cells, and several other measures which we have developed, are related to previously studied variables." Vacaville State Prison, associate of Mead .

Dr. Joseph G. Hamilton -A top radiation biologist at the Atomic Energy Commission (AEC). warned Dr. Shields Warren that the radiation experiments might have "a little of the Buchenwald touch," and that commission officials "would be subject to considerable criticism" for conducting experiments in which human subjects were exposed to potentially harmful doses of radiation.

D. Corydon Hammond, PhD- Psychologist with advanced specialties in neurofeedback (EEG biofeedback), quantitative EEG brain mapping, clinical hypnosis, and marital and sex therapy.

He has been President of the International Society for Neurofeedback and Research and of the American Society of Clinical Hypnosis. With neurofeedback and hypnosis he works with ADD/ADHD, anxiety, depression, insomnia, head injuries, restless legs, OCD, chronic pain, headaches/migraines, IBS, addictions, autism, Aspergers, stroke, PTSD, uncontrolled epilepsy, side effects from chemotherapy, and learning disabilities. Couples therapy work

includes inhibited sexual desire and sexual arousal problems, and marital communication and conflict resolution training.

Alfred Gordon Hammer- Hammer would spend two sabbaticals in Orne's laboratories in the United States during the 60's and 70's. University of Sydney Psychology faculty head, Alfred Gordon Hammer, approved Subproject 84. Gordon Hammer (then APS Chair).

Charles Edward Mark Hansel- Hansel's well-known work is his book ESP: A Scientific Evaluation. In it, he examined the areas of telepathy, clairvoyance, precognition, and psychokinesis and analysed a number of major ESP experiments that claimed to have conclusively demonstrated the phenomenon. Hansel found that all of the research he examined suffered from poor experimental design which allowed for error, misinterpretation and fraud.

The physicist Victor J. Stenger noted that "Hansel succeeded brilliantly in exposing the shoddiness of the experimental procedures of Rhine's laboratory."

F.R. Hantseverov (Ф.Р.Ханцеверов)- Led Association of applied ecology created in 1989 by the Federation of Soviet engineers. Parapsychology.

Erlendur Haraldsson- Confirmation of the Percipient Order Effect in a Plethysmographic Study of ESP.

Kimberly Harless- Former FBI operative worked for Mitchell, Jessen and Associates.

Trevor A. Harley- Can Experimenters Localize Nonrandom Target Sequences in Random Number Tables?

Willis Harman/Willis Harmon - Year before his 1967-69 Stanford Research study, welcomed the "challenge to science" from "extrasensory perception, psychokinesis, mysticism, and consciousness-expanding drugs" (particularly LSD and Mescaline.) He lauded Maslow's "new science" since it would bring to the fore "hypnosis, creativity, parapsychology, and psychedelic experience," and shift scientific concern away from the "outside" world to studying "inner space." The Sequoia Seminars.

Frank Haronian- Physique and psychological functioning. Human Ecology Fund, CIA.

Philip Lawrence Harriman- G. H. Estabrooks. Hypnotism. (1942). The experimental production of some phenomena related to the multiple personality. The Journal of Abnormal and Social

Psychology. U.S. military psychiatrist, "experiments done to create multiple personalities."

Robert Harris- A professor of nutrition at the Massachusetts Institute of Technology, led three different experiments involving 74 Fernald boys, aged 10 to 17. As part of the study, the boys were fed oatmeal and milk laced with radioactive iron and calcium; in another experiment, scientists directly injected the boys with radioactive calcium.

Peter N van Harten- Inappropriate sexual behaviour after acquired brain injury is a severe complication. Evidence for effective treatment is not available. Electrical aversion therapy (EAT) is a behavioural therapeutic option used in persons with intellectual disabilities, which might be suitable for brain-injured individuals for whom other therapies are not effective.

John Hartland- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Josephine Hilgard, Kay Thompson, Herbert Spiegel, Per-Olaf Wikstrom, P. Brugnoli, and Erika Fromm.

Janet A. Hartle- Human Ecology Fund, Craniological Racial Analysis, $948.75.

Vice Admiral Robert Harward- Afghanistan, prisoners there are sometimes subject to tougher interrogation methods than those used elsewhere. Prisoners who passed through the facility reported abuse, like beatings and sexual humiliation.

J.B. Hasted- Paranormal Electrical Effects.

E.K. Haumov (Э.К.Наумов)- Unconventional research in USSR and Russia.

Dr. W. Paul Havens Jr.- Exposed men to hepatitis in a series of experiments, including one using patients from mental institutions in Middletown and Norwich, Conn. Havens, a World Health Organization expert on viral diseases, was one of the first scientists to differentiate types of hepatitis and their causes.

Paul Hawk- Psychiatrist who killed Harold Blauer in 1953 with an injection of supposed mescaline. Paul Hawk worked for the CIA, and is one of the inventors of the term "borderline personality disorder".

Gerald Heard- LSD experiments with Sidney Cohen.

Keith M.T. Hearne- Energy Flow" Between Healer and Patient. visually Evoked Responses and ESP. The Effect on the Subject (In

Waking, SWS, and REM States) of Electric Shocks to the Agent: An "ESP" Experiment.

Dr. Robert G. Heath -Of Tulane Medical University-(doing brain electrode implant research at Tulane) Dr. Heath, a noted bio psychiatrist at Tulane University, said that a C.I.A. doctor had approached him after a symposium in New Orleans in November 1962 and suggested that he might want to explore the brain's "pain system." Dr. Heath has acknowledged agreeing to do one research project for the agency in 1957 after an agent asked him to test a purported brainwashing drug on monkeys and then, if practicable, on prisoners at the Louisiana State Penitentiary in Angola.

Chairman of the Department of Psychiatry and Neurology at Tulane University, placed brain electrodes in a young homosexual man and fitted him with a box. A button on the box could be used to electrically stimulate an electrode implanted in a pleasure centre. During one three-hour period, the patient, referred to as B-19, stimulated himself 1,500 times. "During these sessions, B-19 stimulated himself to a point that he was experiencing an almost overwhelming euphoria and elation, and had to be disconnected, despite his vigorous protests."

Harry Bailey , an Australian doctor who briefly worked with Heath on his electrode studies, accused him of picking out African-Americans for his experiments because, as he put it, "it was cheaper to use n****** than cats... they were everywhere and cheap experimental animals."

Dr. Robert Heath with placing implants in the heads of a number of federal prison subjects.

Dr. Donald O. Hebb- McGill University in Montreal. later president of the American Psychological Association, crafted the first large experiments on sensory deprivation from 1951-53. The CIA mind control program in Canada was 'Experimental Studies of Attitude Changes in Individuals,' with contract X-38. then director of psychology at McGill University, received a grant of $10,000 to study sensory deprivation. He paid a group of his own psychology students to remain isolated in a room, deprived of all senses, for an entire day. In an attempt to determine a link between sensory deprivation and the vulnerability of cognitive ability,

G. W. Arendsen Hein -Started with LSD therapy in 1959, when he was chief psychiatrist at the Salvation Army clinic Groot Batelaar in Lunteren.
Arendsen Hein- Earlier he had experimented with C02-inhalation, narco-analysis with barbiturates, and the administration of methedrine. LSD was for him, at first, only the next drug on the agenda to be tried.

Dr. Heckstrom- Researchers at Vanderbilt University gave radioactive pills to pregnant women during the 1940s, university officials have confirmed. Researchers gave radioactive pills to 751 pregnant women seeking free care at a prenatal clinic run by Vanderbilt University.
Dr. Robert Helliwell- Stanford University's radio science laboratory showed that very low frequency radio waves can vibrate the magnetosphere. A magnetosphere is a highly magnetised region around and possessed by an astronomical object. In the Antarctic, with a 20km antenna and five-kilohertz transmitter, they learned that the magnetosphere could be modulated to cause high-energy particles to cascade into Earth's atmosphere. By turning the signal on or off, they could stop the flow of energetic particles.
Dr. Carl Heller- Reproductive Radiation Tests. experiments on 67 inmates at the Oregon State Penitentiary sponsored by the Pacific Northwest Research Foundation of Seattle. Heller was conducting other tests as well — he gave the prisoners hormone shots and other drugs just to see what they would do to "male reproduction."
Sir David Henderson- Cameron had trained at the Royal Mental Hospital in Glasgow, under eugenicist Sir David Henderson.
William Hermann- Westbrook's control officer, Stanford Research Institute, Rand Corporation.
Dr. John Herron- Chelmsford Private Hospital which used hypnotic drugs, ECT and DST, mostly experimentally and without informed consent. This hospital became Australia's worst psychiatric disaster. (Dr. Harry Richard Bailey).
Caroline M van Heugten- Inappropriate sexual behaviour after acquired brain injury is a severe complication. Evidence for effective treatment is not available. Electrical aversion therapy (EAT) is a behavioural therapeutic option used in persons with intellectual

disabilities, which might be suitable for brain-injured individuals for whom other therapies are not effective.

Lawrence Hinkle- Wolff proposed a partnership with the CIA aimed at mastering the techniques for gaining control over human beings' thought patterns and behaviour patterns. Drs. Wolff and Hinkle obtained permission from Cornell's President and high University officials to conduct these experiments at Cornell on behalf of the CIA. Human Ecology Foundation Director, co-author with Gittinger. The Physiological State of the Interrogation Subject as it Affects Brain Function, by Lawrence E. Hinkle, Jr., Assoc. Professor of Clinical Medicine in Psychiatry, New York Hospital.

Ernest Hilgard- In 1960 Martin Orne hypnotised a man on a TV. The subject hallucinates the host of the show after being told the man is in a different part of the room than he actually is. Professor HIlgard demonstrates the same phenomena with students at Stanford.

In one experiment conducted by the Hilgards, subjects were hypnotised and told they would feel no pain or discomfort when an arm was placed in ice water, or when a tourniquet was tied at the elbow to restrict blood flow to the arm. The subjects reported no pain or discomfort during these procedures.

Josephine Hilgard- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Kay Thompson, Herbert Spiegel, John Hartland, Per-Olaf Wikstrom, P. Brugnoli, and Erika Fromm.

Dr. Edwin V. Hill- Hill-Victor report, Hill and Victor summarised the Japanese data, "Such information could not be obtained in our own laboratories because of scruples attached to human experimentation.

Juhani Hirvas- Mental illness and identity. Human Ecology Fund, CIA.

Dr. Hudson Hoagland, Ph.D. -Executive Director, Worcester Foundation for Experimental Biology.

Paul Hoch- Dr. Paul Hoch, financed by the Army Chemical Centre. A member of the American Eugenics Society. Dr. Paul Hoch and Dr. James Cattell exposed unwitting patients to high dose psychedelic drug experiments whose foreseeable risks of brain damage, mental incapacity and death were known. Their maltreatment caused Henry Blauer's death. Within two years Hoch

was appointed Commissioner of Mental Hygiene of NYS (1955) overseeing 28 hospitals and 100,000 patients.

Harold Hodge- Research into the mechanics and effects of LSD: (l) Develop a specific antidote; (2) a sensitive method for assaying it in urine and in blood; (3) a screening system for psycho chemicals; (4) determine the relationship between chemical structures and biological activity in this type material; (5) study the structural relationship between LSD-25 and other similar materials now available. Sponsors: Eli Lilly Company and Public Health Service.

MK-ULTRA Subproject 148: To provide a mechanism to utilise the services of Blacked out, a recognized authority in the field of toxicology and pharmacology in support of Technical Services Division activity concerned with influencing animal and human behaviour.

Abram Hoffer -CIA-funded research into LSD was also done in Saskatchewan. Osmond.

Albert Hoffman- (Sandoz Pharmaceuticals) Albert Hofmann in Basel, Switzerland, at the Sandoz Chemical laboratories. Hofmann handed Sandison a box of around 600 ampules, each containing 100 micrograms of LSD. Back in England, Sandison shared his psychedelic bounty with associates Drs. Ling and Buckman.

Dr. Holliday- University of Washington in Seattle about 50 students were given LSD as part of a series of research projects that included a secret Army program to study the possible use of the hallucinogenic drugs in warfare.

William C. Hollinger- He attended and taught at George School, Swarthmore, MIT, UI, Williams and Harvard. During his long career as a development economist, he lived and worked in Indonesia, Bangladesh, Pakistan, Liberia and the United States. He retired to Cadenet, France, where he died suddenly on May 14, 2010.

Michael Hollingshead- Concord Prison Experiment.

Oliver Wendell Holmes- Associate Justice of the U.S. Supreme Court from 1902 to 1932, wrote the 1927 Buck v. Bell decision that allowed for compulsory sterilisation of the "unfit" in the U.S., stating, "It is better for all the world, if instead of waiting to execute degenerate offspring for crime or to let them starve for their imbecility, society can prevent those who are manifestly unfit from continuing their kind. ... Three generations of imbeciles are enough."

Chuck Honorton- RNG studies, Indigo Swan.

Dr. Justin Hope- Studying the psychological changes and the change in the brain activity as measured by the EEG in schizophrenic patients under the influence of sodium amytal, benzedrine, and cocaine.
Jack Houck- A researcher of paranormal phenomena. Jack is the originator of Psychokinesis (PK) Parties.
Jean Houston- Philosopher mentored by Margaret Mead. One of the principal founders of the human potential movement. While participating in a US Government sanctioned research project on the effects of LSD, Houston became acquainted with Robert Masters.
Lawrence Houston- Approved the Georgetown part of the mind control program.
J.M. Houtkooper- Relationships Between PK and Physiological Variables in a Gifted Subject. A Hierarchical Model for the Observational Theories: A Study of Subject Identity and Feedback in Repeated Psychokinesis.
Gerd H. Hovelmann- Some Recommendations for the Future Practice of Parapsychology.
Alan Howard- Human Ecology Fund. produced an article entitled 'cultural values and attitudes
toward death'. this paper was chiefly based on Howard's research into bereavement in Rotuma, which was sponsored by the National Institute of Mental Health (NIMH).
Prof. Newton Howard- A Brain and Cognitive Scientist, the former Director of the MIT Mind Machine Project at the Massachusetts Institute of Technology and currently a Professor of Computational Neuroscience and Functional Neurosurgery at the University of Oxford, where he directs the Oxford Computational Neuroscience Laboratory participates in Risk Roundup to discuss "Mind Control Technology".
Dr. Joseph Howland- Army doctor stationed at Oak Ridge. Plutonium experiments.
Lucy Jen Huang- Changing patterns in the Chinese family. Human Ecology Fund, CIA.
Alfred M. Hubbard- Vancouver, Canada, Hubbard was not a physician nor did he have any formal medical training. Hubbard, a jovial character who sometimes worked with the FBI and CIA, was a strong proponent of the use of LSD.

Hubbard later did undercover work for several agencies including the FDA and FBI. He reportedly tried (and failed) to "turn on" J. Edgar Hoover. He introduced LSD to many high-ranking intelligence officers. In the early 1950s, he refused an offer to join the CIA. Hubbard's work at SRI differed, placing him with the Alternative Futures Project which sought to "turn on" the World's political and business leaders.

Kirk Hubbard - CIA's Behavioral Sciences Research. Having brought Mitchell to the CIA, Hubbard later went on to work at Mitchell and Jessen's private company. Hubbard arranged for former APA president Martin Seligman to present a lecture on his theories of "learned helplessness" to a group that included Mitchell and Jessen at the Navy SERE School in San Diego.

Perry Hudson- C ancer study in New York City, in which over a thousand asymptomatic homeless alcoholic men were enrolled to have their prostates biopsied, and then aggressive treatment for prostate cancer was performed if their biopsies were positive for cancer.

D.J. Hufford PhD -Was Professor of Medical Humanities at Penn State College of Medicine. His research focuses on the ethnographic and phenomenological study of spiritual and folk beliefs. He is particularly known for his research on sleep paralysis and the Old Hag tradition as an experiential foundation for belief in the supernatural.

Dr. Valerie V. Hunt- Of UCLA-electromagnetic radiation (EMR)/human effects researcher and Tesla Technologies expert outside of Russia, entered Agnews State Mental Hospital near Stanford University to conduct experiments on mental patients.

Edward Hunter -A CIA contract employee operating undercover as a journalist and – later – a prominent member of the John Birch society. Was investigated by the Bureau in 1949 as an applicant for a position with the CIA. He was described by some persons as a radical; by others, as an anti-communist. He worked for the CIA until 1950. He is credited with popularising the use of the term "brainwashing" in English, and collected a large number of examples of Chinese Communist propaganda targeted at the (largely illiterate) population in the immediate post-revolution period. Hunt began his career as a founding member of the OSS, the precursor of the CIA in the 1940s.

Aldous Huxley- A pet project of Huxley's from the 1930s on, was the creation of what he called the "somatotonic personality": one who would not hesitate to murder. Psychiatrist Humphry Osmond teamed up with Aldous Huxley and Al Hubbard, who ordered 43 cases of LSD from its maker, the pharmaceutical company Sandoz. Associate of Estabrooks.

Leonard G.H. Huxley- Was elected to the Council of the AAS and he became Vice-President the following year. During this time, the headquarters of ASSA were located on the grounds of the ANU in Canberra, which Leonard was the Chairman of. ASSA was also influenced by the Carnegie Corporation and the pro-eugenics UNESCO which Julian Huxley founded..The ASSA council met with the heads of UNESCO Australia in October, 1956 and worked together to decide the direction of their eugenics program in Australia. Leonard G.H. Huxley also supported weaponized anthropology outside of the AAS. In 1965 Huxley was the head of the Australian Fulbright Scholarship program at USEFA, which transferred MK ULTRA doctors between Australia and the USA. Australian National University in Canberra, ACT.

Sir Julian Sorell Huxley- Eugenics strategist. President (1959-62) of the British Eugenics Society. brother of author Aldous Huxley. United Nations Educational, Scientific and Cultural Organization.

Dr. Robert Hyde- P sychiatrist at the Butler Health Center in Providence, R.I. The report said "the first phase of the experiments" by Dr. Hyde 'consisted Of developing a background knowledge of the variables affecting a subject's reactions to LSD." conducted research on drugs designed to produce mental illness in healthy people who volunteered for such studies.

Vermont State Hospital, a public mental facility, revealed that Metrazol was administered to them by CIA contractor Dr. Robert Hyde on numerous occasions in order "to address overly aggressive behaviour." One of these patients, Karen Wetmore, received the drug on a number of occasions for no discernible medical reason. During the same ten-year period in which Metrazol was used by the Vermont State Hospital, patient deaths skyrocketed. In 1982, the FDA revoked its approval of Metrazol.

Ray Hyman- W ith the Department of Defense, investigated psychic claims during the Cold War working at the Stanford Research Institute (SRI) studying Uri Geller, an alleged psychic. He was later

hired by the CIA to investigate psychic claims under the now declassified Project Stargate.

I

G.R. Schme idler- Moods and ESP Scores in Group Testing.
Y. Il'in- Controlled behaviour.
Admiral Bobby Ray Inman- Moved from being director of the DIA to the helm of the NSA. Like Inman, Stubblebine supported the exploration of psychic warfare. Soon after becoming head of INSCOM, Stubblebbine began a program called the "High Performance Task Force ", a series of methods to improve his officer's performance. These ranged from the neuro-linguistic programming of Tony Robbins to the hemi sync tapes of the Monroe Institute, where Stubblebine often sent his officers.
S. M. Intner -(1989). Precognitive remote perception 111: Complete binary database with analytical refinements. PEAR Tech. Report 89002.
Doctor V. Inyushin- Astral projection. Alma-ata.
Harvey J. Irwin- On directional inconsistency in the correlation between ESP and memory. PK and Memory: An Information-Processing Model of Psychokinetic Effects.
Dr. Harris Isbel- MK-ULTRA contractor. "Perhaps the most infamous experiment came when Isbell gave LSD to seven black men for seventy-seven straight days. Isbell's research notes indicate that he gave the men 'quadruple' the 'normal' dosages. The doctor marvelled at the men's apparent tolerance to these remarkable amounts of LSD. Isbell wrote in his notes that 'this type of behaviour is to be expected in patients of this type.'..." Establish whether susceptibility to hypnosis can be increased by use of drugs, such as alcohol, mescaline, scopolamine, LSD, etc. Also, to determine the extent to which various drugs possess specific "hypnosis-like" effects.

Dr. Harris Isbell, director of the Addiction Research Center at the Public Health Service Hospital in Lexington, Kentucky, was paid by MK-ULTRA to perform basic research on psychoactive drugs, including several psychedelics. He drew test subjects from his captive patient population of opiate addicts, offering them heroin in

exchange for "volunteering" for his experiments. Subjects were administered LSD, DMT, mescaline, methamphetamine, psilocybin and other drugs, sometimes in very large doses.5 In one experiment, Isbell administered LSD to seven men for 77 consecutive days.
Ilia Ivanov- Create an invincible breed of Red Army soldiers. He secured support from the Pasteur Institute in Paris who allowed him to use a research station in Guinea, West Africa, for ape-breeding research. He managed to inseminate three chimps with human sperm but none of the beasts fell pregnant. Ivanov reported that African women had been seized to be impregnated with ape sperm, but no pregnancy resulted.
Ivanovich Ivanov- His ultimate goal was to create a hybrid cross between humans and apes. Ivanov used human sperm on female apes. At least five women volunteered. By the time Ivanov was ready to proceed the only adult male left was Tarzan, a 26-year-old orang-utan. Tarzan had a brain haemorrhage. "The orang has died, we are looking for a replacement," Ivanov cabled the woman he had lined up to receive Tarzan's sperm. More chimps arrived in 1930 – but Ivanov fell victim to the widespread purge of scientists and was exiled to Kazakhstan.

Donald D. Jackson, M.D.- LSD experiments. Speaking at an LSD seminar at Napa State Hospital, Imola, California, called attention to the drug's ability to give a patient a "new beginning," explaining that it may bring about "a sudden liberation from ignorance."
J.F.C. Jacobs- Possible Influences of Birth Order on ESP Ability.
Elliot Jacques- Tavistock. Massachusetts Institute of Technology gave birth to the NTL in 1947. With the founding of NTL
Robert Jahn- Was Professor of Aerospace Science and Dean Emeritus at Princeton University. Jahn founded the Princeton Engineering Anomalies Research laboratory (PEAR) in 1979 to explore psychokinetic influences on random event generators (REG). He also carried out research on remote viewing.
Basil James- In the first session, at two-hourly intervals over the course of 30 hours, the patient was injected with apomorphine and given 57 ml of brandy to drink. As nausea set in, the patient was asked to select one of several pictures of nude or near-nude men and

told to fantasise about his current homosexual partner. St James's Hospital in Leeds. James had previously worked at Glenside Hospital in Bristol, where he pioneered chemical aversion therapy techniques.

Larry C. James- Was Chief Psychologist of the Joint Intelligence Group and a
senior member of the Behavioral Science Consultation Team (BSCT) charged with advising on the interrogation and "behaviour management" of the men and children at the Guantánamo Bay detention centre. In 2004, he served as Director of the Behavioral Science Unit at the Abu Ghraib Prison.

Detainee and government reports of abuse during the period of Dr. James' first deployment include beatings, rape threats, religious and sexual humiliation and painful body positions.

Oscar Janiger- University of California-Irvine psychiatrist known for his work on acid, gave an artist an activity box full of crayons and asked him to draw his experiences on LSD.
Janiger's celebrity clientele, including Cary Grant, Anaïs Nin .Andre Previn- and Jack Nicholson'

Janiger had rented a small house in the mid-Wilshire district. Sandoz Laboratories, the Swiss pharmaceutical company that "discovered" LSD, supplied the drug free of charge. In return, Janiger agreed to keep Sandoz informed about the results of his experiments. Unlike many other researchers and major universities, he never accepted funding — covert or overt — from the CIA or the military.

Irving L. Janis- A study by Albert Birdman, Irving Janis, Harold Wolff, and Lawrence Hinkle suggested that self-inflicted pain led victims to feel guilt for their own predicament and cooperate more effectively. The goal was therefore to devise methods that would make the prisoners believe that their suffering was self-induced rather than perpetrated by their interrogators.

Theodore Wagner-Jauregg, Kurt Rarh, and Hans Turnit, who continued their wartime research on super poisons like Sarin and Tabun.

Stephen Jay, M.D- 1964 when he was a medical student. Dr. Jay spent several months at McGill University in Montreal, where he observed the results of a CIA-funded research program, called "MK-ULTRA."

Arthur Jensen -T he University of California, Berkeley, published an infamous article: "How much can we boost IQ and scholastic achievement?" It drew heavily on behaviour genetics to argue that the IQ gap between black and white populations had genetic causes and, as a result, educators could do little to reduce it.
Bruce Jessen- American psychologist who, with James Elmer Mitchell, created the so-called "enhanced interrogation techniques" that were used in the interrogation and torture of CIA detainees.
Dr. Walter W. Jetter- Atomic Energy Commission laboratories.
Martin U. Johnsoh- A Written Academic Exam as a Disguised Test of Clairvoyance. ESP and Subliminality.
Wendell Johnson- A University of Iowa speech expert who set out to unravel the mystery of stuttering by trying to induce the disorder in orphans.
C.B. Scott Jones- President of the Human Potential Foundation. Involved in parapsychology conferences since the mid 70s. Jones has attended conferences in the former Soviet Union, where he was in contact with Christopher Bird. His foundation is also involved with the research of Russian scientist Dr. Igor Smirnov.
Jean Jones- MK-ULTRA hypnosis research.
Sidney Jourard- Fellow at the Tavistock Clinic and former president of the Association for Humanist Psychology.

K

Dr. Ruth Kajander- London Psychiatric Hospital, where she sought the medical superintendent's permission to use chlorpromazine on an experimental basis, to see how it would work, female doctor was the first to use the drug on psychiatric patients in Ontario, credit for this ground-breaking contribution to the field went to psychiatrist Heinz Lehmann, who, unbeknownst to her, was experimenting with the drug in Montreal around the same time.

Allegedly Dr. Ruth Kajander has programmed children at Lakeshore Psychiatric in Toronto, and elsewhere around Canada, including Thunder Bay where she recently celebrated her 50th year in psychiatry and was honoured for her contribution.
Dr. Lothar B. Kalinowsky- A psychiatrist who also consulted closely with the CIA on electroshock matters. Kalinowsky, who was

part Jewish and had fled Germany in 1933, was Fink's close friend and, like Fink, was widely recognized as an expert on electroconvulsive therapy. Kalinowsky met with the CIA's Allen and Gaynor frequently and sometimes was accompanied by Dr. Fink at the New York State Psychiatric Institute, where he worked closely with Dr. Hoch.

Franz J. Kallmann- Kallmann resumed his role as an international player in biological psychiatry and genetics, becoming president (1952) of the American Society of Human Genetics and Director of the New York State Psychiatric Institute in 1955. A student of Ernst Rüdin, one of the architects of racial hygiene policies in Nazi Germany.

His studies at the New York State Psychiatric Institute in New York City, New York, focused on the genetic factors that cause psychiatric disorders. Kallmann was one of the first to use twins to study how a mental disorder is passed on by comparing the occurrence of epilepsy and schizophrenia in both fraternal and identical twins.

In a speech delivered in 1935, while still in Germany, he advocated the examination of relatives of schizophrenia patients with the aim to find and sterilise the " nonaffected carriers" of the supposed recessive gene responsible for the condition.

Kallmann conducted a study of over 1, 000 cases of schizophrenia, in order to assert the claim that the mental disorder was inherited. Kallmann's study was published simultaneously in the United States and Nazi Germany in 1938. He called schizophrenics a "source of maladjusted crooks ... and the lowest types of criminal offenders. Even the faithful believer in liberty ... would be happier without those." Kallmann's scholarly American study was used by the Nazi government's T4 unit as a part of its pretext to begin in 1939 the murder of mental patients and various other "defective" people, many or most of them children.

Yu. I. Kamenskiy- Physicist - ESP.

Samuel Karelitz- Believed that a baby's crying correlated with his or her intelligence. In order to test his theory, in the mid-1950s he developed an experiment in which he and other researchers shot a thick rubber band from a wooden gun at the foot of an infant 10 minutes after birth, and then recorded his or her cries. If the baby

didn't wail for a full 60 seconds, Karelitz and fellow researchers at Long Island Jewish Hospital would repeat the shot as many as seven more times. The National Institutes of Health funded this research.
John Katsufrakis -Of Stanford University's radio science laboratory showed that very low frequency radio waves can vibrate the magnetosphere. A magnetosphere is a highly magnetised region around and possessed by an astronomical object. In the Antarctic, with a 20km antenna and five-kilohertz transmitter, they learned that the magnetosphere could be modulated to cause high-energy particles to cascade into Earth's atmosphere. By turning the signal on or off, they could stop the flow of energetic particles.
Vlail Kaznacheyev/Vlail Kaznacheev- Authority on ESP. Novosibirsk, Siberia, under the aegis of the Russian Academy of Sciences, the Institute for Scientific Research in Cosmic Anthropoecology (ISRICA). n conducting experiments on esoteric aspects of human perception of time and space, specifically investigating telepathic communications not only between human subjects but also between human subjects and inanimate objects and between human subjects on earth and unidentified forces in the cosmos.
James Keehner- CIA psychologist. Gave tests (PAS) to an American nurse to see if she would sleep with an russian.
Barnaby C. Keene- While he was president of Brown University, worked for the CIA's covert operations.
Dr Alan Kehs- Of the US Army Laboratories, discussed the overall RF threat.
M.V. Keldysh (М.В.Келдыш)- President of the USSR's Academy of Sciences academician.
Dr. George Kelley- MK-ULTRA contractor MK-ULTRA Subproject 96: To secure data on European research attitudes and personality information on researchers. The problem of understanding human behaviour. Decision Making-Group Interview Methods.
John Harvey Kellogg- Eugenics movement. The best human "pedigree" was, of course, any genetics that included Nordic, Germanic or Anglo-Saxon blood. One of the top priorities of the eugenics movement was the forcible sterilisation of the poor, disabled and "immoral" (which would include anyone convicted of a

crime). who set up the "Race Betterment Foundation" in Battle Creek, Mich.

Dr. Robert Foster Kennedy -Stood up before the American Psychiatric Association in 1941 and told them, "I am in favour of euthanasia for those hopeless ones who should never have been born-Nature's mistakes."

Dr. Kerth -Radiation experiments, Texas.

Ken Kesey- CIA experiment-Ken Kesey Magic Bus .Leader of the Merry Pranksters and orchestrator of the so-called "Electric Kool-Aid Acid Test." Was invited by Brown in October 1977 to address the governor's staff on the subject of police practices.

Colonel James S. Ketchum- Edgewood Arsenal-He joined the Army in 1956 and left it in 1976-the military's leading expert in a secret Cold War experiment: to fight enemies with clouds of psycho chemicals that temporarily incapacitate the mind. In 1964, Ketchum oversaw an important field test at the Dugway Proving Ground, in Utah. The test, code-named Project DORK, was intended to determine if an aerosol of the delirium-inducing BZ could incapacitate soldiers at distances of 500-1000 yards. Ketchum directed an Army film documenting the effort called "Cloud of Confusion".

John Ketchum- Edgewood Arsenal in Maryland. Began experimenting with BZ and its effects.

Dr. Seymour S. Kety- Chairman of Psychiatry at Johns Hopkins. April 1952, the NIMH's director Seymour Kety suggested that John Lilly should apply for the post of chief of the Section of Cortical Integration, promising a generous salary and an initial research budget of approximately $50,000 a year, as well as 'fairly unlimited facilities and reciprocal stimulation and facilitation among a large number of brilliant scientists'.

Kevanishvili- Low frequency electromagnetic fields.

John Maynard Keynes- Eugenics. Endorsed legalised birth control because the working class was too "drunken and ignorant" to be trusted to keep its own numbers down. Keynes supported eugenics, population control, and migration restrictions as Director of the British Eugenics Society. He asserted that eugenics was, "the most important and significant branch of sociology."

Ancel Keys- University of Minnesota study injected 11 public service employee volunteers with malaria, then starved them for five

days. Some were also subjected to hard labour, and those men lost an average of 14 pounds. They were treated for malarial fevers with quinine sulphate.

A.A. Kharkevich- USSR's Academy of Sciences. Telepathic experiments.

T. Kiang- Sighted Hands: A Report on Experiments with Four Chinese Children to Test Their Ability to See Colour Pictures and Symbols with Their Hands.

Dr. Anthony David Kidman-- Clinical psychologist at the University of Technology. Dr. Antony Kidman MK-ULTRA University of Pennsylvania 1969 LSD.

Kidman and Seligman were also connected by an experiment conducted in 1975 at the Kolling Institute of Medical Research, Royal North Shore Hospital of Sydney, NSW. The Kolling institute is a facility of The University of Sydney. Dr. Antony Kidman was in the Laboratory of Preclinical Pharmacology.

Dr. Ari Kiev- His interest in what he called "transcultural psychiatry" led him to seek out nontraditional practitioners in Africa and Asia, and to explore psychiatry in the Soviet Union.

Started working in private practice with depression pioneer Nathan S. Kline, M.D.

"Kline was the discoverer of marsilid and reserpine, and the developer of lithium and many other early medicines used in psychiatry," Kiev recalled. "He was a brilliant pioneer, and I spent six years with him learning the fundamentals of research in psychopharmacology."

Kiev said that part of Kline's mission was to introduce modern psychiatric clinics in developing countries, an interest that led Kiev to work at one of those clinics in Haiti.

J **ohn Kihlstrom-** Hypnosis research with Martin Orne. Most of that research concerned posthypnotic amnesia.

Colonel E.E. Kirkpatrick -Of the U.S. Atomic Energy Commission issues a secret document (Document 07075001, January 8, 1947) stating that the agency will begin administering intravenous doses of radioactive substances to human subjects.

Lyman Kirkpatrick- Approved at the Georgetown part of the mind control program.

Masaji Kitano- The second commander of Japanese Army Unit 731.

Brig. Gen. Frank Kitson- Tavistock. Tavistock operatives assisted army units in the creation of what were called "gangs" and "counter gangs" in the colonial sector. The technique was laboratory-tested by Brig. Gen. Frank Kitson in the 1950s in Kenya, where brainwashing and torture were used on prisoners in British POW camps to create phony, British intelligence-controlled units of the Mau Mau insurgency.

Jakob Klaesi- Swiss psychiatrist, using barbiturates marketed by the pharma company Roche. Klaesi's first publication on this matter, he acknowledged that three of the 26 patients had died during the study due to broncho-pneumonia or cardiac haemorrhages.

Gerald Klee -LSD University of Maryland Medical School.

Dr. Lauren R. Klein- Assessed the relative safety and effectiveness of four sedating injectable drugs: haloperidol, midazolam, olanzapine and ziprasidone — in patients with agitation in the hospital emergency department setting. Hennepin County Medical Center (HCMC) in Minneapolis, Minn. Four trials, which had been conducted from 2014 to 2018.

Milton Klein- CIA hypnosis expert. CIA consultant Dr. Milton Klein told ABC News that he believes he could make a hypnosis subject carry out violent actions, including murder. Project Artichoke and MK/ULTRA hypnosis-related interrogation and mind control programs.

Nathan Kline- The term "cyborg" was coined in 1960 by Nathan Kline and Manfred Clynes in a study for NASA. In particular, Kline and Clynes thought that through the use of electronic implants they might even be able to modify humans sufficiently to survive in space's harsh environment.

Kline participated in the Central Intelligence Agency's MK ULTRA "mind control" project, which ran for years and included numerous subprojects that involved drugs, electric shock and other means to manipulate human behaviour.

Dr Albert Kligman -F rom 1951 to 1974 conducted a range of medical experiments at the Holmesburg Prison in Pennsylvania.

Dr. Otto Klineberg- A Tavistock-affiliated psychologist specializing in the supposedly racial characteristics of the American Negro.

Clyde Kluckhohn -The Human Ecology Fund, an anthropological funding front used by the Central Intelligence Agency in the 1950s

and 1960s, National Security State sponsored and consumed anthropological knowledge .Clyde Kluckhohn's secret interactions with the FBI, State Department, and CIA.

General Knobel- Project Coast.

N.I. Kobosev (Н.И.Кобозев)- The impact of weak and strong electromagnetic emission on biological objects, quantum entanglement in macroscopic systems, nonlocal signal transmission based on the Aharonov-Bohm effect, 'human operator' phenomena.

Y.B.Kobzarev- D.B.Kobzarev and N.S.Kulagina. The group of academics Gulyaev and
Kobzarev investigated the phenomenon of Kulagina. Telepathic experiments. USSR's Academy of Sciences.

Arthur Koestler- Was a Hungarian writer whose interests extended to mysticism and paranormal phenomena. He investigated evidence for telepathy and psychokinesis. Koestler left a substantial bequest which was used to establish the Koestler Parapsychology Unit at the University of Edinburgh in 1985.

Ippolit Kogan- Director of the Section for Bioinformation on the totally soviet scientific and technical A.S. Popov Institute for Radio technology and Electrical Communication was located.

Koroleva- Reported psychological— subjective findings based on clinical observations of 104 individuals exposed to ultrasound in an industrial environment. The main complaints of the examinees were headache, extremely pronounced fatigability, tiredness and a general weakness. The onset of fatigue in most of the subjects began as early as two to three hours after starting work with simultaneous development of headache.

Korotkin- Changes in auditory thresholds as a result of suggestion during hypnosis.

Koslov -Was working with the Applied Physics Laboratory at Johns Hopkins University, where he continued to study the effects of electromagnetic radiation on humans.

Kosmalinskiy -States that abroad, crueller forms of isolation were imposed and that sensory limitations were created by the most severe means e.g. plaster cast usage.

N.A. Kozyrev (Н.А.Козырев) -The impact of weak and strong electromagnetic emission on biological objects, quantum entanglement in macroscopic systems, nonlocal signal transmission based on the Aharonov-Bohm effect, 'human operator' phenomena.

Y.P. Kravchenko appeared (Ю.П.Кравченко)- Microlepton field.

Shulamith Kreijtler- Psi Transmission of Anger and Its Enhancement 1 Through Meaning.

Stanley Krippner PhD- An American psychologist known as a pioneer of humanistic and transpersonal psychology as well as for his research into hypnosis, dreaming, and parapsychology. He is Professor of Psychology at Saybrook University.

A. B. Kristofferson- Subproject 103 was conducted by Robert Cormack and A.B. Kristofferson at the Children's International Summer Villages Inc.

D. Krmesski- Czechoslovak researcher. the possibility of remote impact to light moving objects. (Robert Pavlita).

William S. Kroger- Hypnosis and Behavior Modification: Imagery Conditioning, In 1979, Kroger authored Hypnosis in Medical Investigation with Richard C. Douce. a FBI special agent and psychology doctoral candidate. Kroger had been consulted for the use of hypnosis in ongoing investigations, and asked the FBI to evaluate the quality of information obtained through hypnosis in producing leads.

Arnold D. Krugman- Studies in the psychology of ageing. Human Ecology Fund, CIA.

Dr. Saul Krugman- Willowbrook State School. In the early 1950s, Dr. Krugman, a former flight surgeon for the U.S. Army Air Corps, went to the Epidemiological Board with a proposition: he wanted to create a vaccine for hepatitis, and knew the perfect place where he could do his research. Willowbrook was overcrowded, already rampant with disease, and at the time it wasn't uncommon to test vaccines on children. Starting in the 1950s, Dr. Saul Krugman would spend a decade "feeding virus-laden stool to mentally retarded, indigent children" at the Willowbrook State School in Staten Island, in an effort to learn more about hepatitis. Many of these children came down with hepatitis with jaundice, leading them to suffer from "fever, vomiting, diarrhea, [and] enlargement of the liver."

Phillip E. Kubazansky- Chief Psychologist, Boston City Hospital, The Effects of Reduced Environmental Stimulation on Human Behavior: A Review.

Lawrence Kubie- Columbia psychiatrist/psychoanalyst. Truth drug committee. Kubie attended the Macy conferences from 1942 to

1953. After 1941 he studied hypnosis, particularly in collaboration with Richard Brickner and Milton Erickson, and it was Kubie who invited Erickson to a Macy conference in 1942. Kubie wrote White a letter within which he "fondly" recalls their time together conducting drug experiments at Bordentown and at a state prison in Baltimore. Wrote Kubie: "I look back fondly on those days. What great fun we had."

Nina Kulagina (Нинель Кулагина)- T elekinesis. In the 1980s in Russia a group of physics scientists headed by professor G.N. Dulnev conducted many experiments on the registration of so-called "psycho-kinesis" or movement of physical objects due to psychical influence of the operator.

Rosa Kuleshova (Роза Кулешова)- 'Dermo-optical perception'.

L.I. Kuproyanovich- Soviet efforts in relating EEG with sleep and memory as well as the areas of photic drive and the synchronisation of flicker frequency and alpha wave rhythm. Describes the equipment and technical means used for improving memory as well as the prospective uses of cybernetics for memory retention.

Dr. Kurland- R eceived FDA approval to continue LSD research, but they were unable to acquire the LSD for clinical study in the United States. (1990s)

Dr. Paul Kurtz- Esalen sponsored a seminar boldly titled "Drug-Induced Mysticism," admitted LSD users had created an MK-Ultra front called the International Foundation for Advanced Studies to conduct their LSD experiments, and Kurtz was a leader of the Theosophist Society for Psychical Research.

H.J.M. Kuyer- Hungarian refugees in the Netherlands. The Human Ecology Fund, CIA. $1,611.

O.N. Kuznetsov- In describing the presence of illusions involving recognition errors in subjects under investigation in the soundproof chamber as a consequence of insufficient information, of a feeling of the extraneous presence of eidetic images, ideas of relationship and over evaluations, do not consider these phenomena to be pathological, and propose calling them pseudo-psychopathological.

Tony Lagouranis- Claims to have observed and took part in a number of interrogation techniques including diet-alteration, the use of military dogs to induce terror, inducing hypothermia (with associated involuntary rectal thermometer readings), sleep deprivation, and the presence of ghost detainees.

Ronald David Laing (R.D. Laing (listed in many places as R.D. Lang) -Senior registrar at the Tavistock Clinic in 1956. He began experimenting with LSD in 1960, and then in 1962 when he became a family therapist at the Tavistock Institute of Human Relations. In 1964 Laing met LSD proponent Timothy Leary. Laing formed the Philadelphia Association. Kingsley Hall.

Kurt Lang- Research on some Aspects of mass Conversion. A study into the mass psychology involved in brainwashing, mass defection, etc. Queen's College, MK-ULTRA contractor

Wright Langham- Los Alamos chemist. Langham would supply the plutonium; the Rochester doctors, the patients at University of Rochester. Dr. Langham wrote and oversaw experiments intended to gauge the effects of exposure to radioactive elements on humans. The experiments involved injecting subjects with radioactive isotopes of polonium, plutonium or uranium without the informed consent of the subject.

Wright Langham, of the Los Alamos Laboratory's Health Division, sent 5 micrograms of plutonium to Dr. Friedell, with instructions for their use on a human subject.

Dr. Nevin Lantz- NLP programming and Remote viewing. (1989). An Effort to Improve Remote Viewing Quality Using Hypnosis. Final Report-Task 6.0.6, Covering Period 1 October 1988 to September 1989, SRI Project 1291, SRI International, Menlo Park, CA.

Dr. Robert Lashbrook -Physician, CIA scientist who was in the hotel room with Olson gave him bourbon and several sedatives.

Harold Laski- Eugenics. Wrote to his friend Supreme Court Justice Oliver Wendell Holmes: "Sterilise all the unfit, among whom I include all fundamentalists."

Harold Lasswell- The Decision Process: Seven Categories of Functional Analysis. Lasswell held the position of Chief of the

Experimental Division for the Study of War Time Communications at the Library of Congress. He analysed Nazi propaganda films to identify mechanisms of persuasion used to secure the acquiescence and support of the German populace for Hitler and his wartime atrocities.

Harry H. Laughlin -At the time a teacher of agriculture with an interest in breeding, to manage the ERO. Laughlin became the world's leading expert on and champion of sterilisation. He compiled the authoritative study of its theory and practice; designed a model sterilisation statute, variants of which came to be adopted by thirty states; and served as an expert eugenics witness testifying before the congressional committee determined to stem the rising tide of new and defective immigrants from southern and eastern Europe, who were deemed biologically inferior to the earlier immigrants from the northern and western parts. In the 1927 Supreme Court case Buck v. Bell, upheld the constitutionality of state sterilisation laws, Laughlin provided a deposition confirming Carrie Buck's feeblemindedness without ever having seen her.

Paul Lazarsfeld- A sociologist and the director of the Bureau of Applied Social Research at Columbia University. Systems theory (ST). d original member of the cybernetics group. Josiah Macy, Jr. Foundation.

Timothy Leary- LSD Research Group Mexico City LSD Research Group Massachusetts

LSD Research Group Los Angeles LSD Research Group New York Mexico City. a clinical psychologist at Harvard University, Leary founded the Harvard Psilocybin Project after a revealing experience with magic mushrooms in Mexico. He led the Project from 1960 to 1962, testing the therapeutic effects of lysergic acid diethylamide (LSD) and psilocybin, which were legal in the U.S., in the Concord Prison Experiment and the Marsh Chapel Experiment.

V.I. Lebedev- In describing the presence of illusions involving recognition errors in subjects under investigation in the soundproof chamber as a consequence of insufficient information, of a feeling of the extraneous presence of eidetic images, ideas of relationship and over evaluations, do not consider these phenomena to be pathological, and propose calling them pseudo psychopathological.

Joshua Lederberg- President of Rockefeller University, a member of the Defence Science Board and the mysterious JASON Group.

Joshua Lederberg from Fort Detrick received a Fulbright to work with Sir Gustav Nossal and Sir Frank Macfarlane Burnet to study Burnets' 'Clonal Selection' Theory Lederberg was a key individual in the creation of bioweapons as he first discovered that bacteria can swap genes. He was connected to Fort Detrick bio-weapon research in 1949 and later became the president of Rockefeller University, a member of the Defense Science Board and the mysterious JASON Group. Lederberg now advises the government on biological weapons and the potential for Bio-terrorism.

Sybil Leek- "There is great danger that within the next ten years the Soviets will be able to steal our top secrets by using out-of-the-body spies. "

Selwyn Leeks- Children were punished with solitary confinement, painful drug injections, beatings, sexual abuse and blasts of electroconvulsive therapy (ECT) to the head, shoulders, legs and even genitals. (Lake Alice)

Dr. Hans Lehmann- Was appointed the Clinical Director of Montreal's Douglas Hospital and from 1971 to 1975, he was the Chair of the McGill University Department of Psychiatry.

"It wasn't a criminal experiment using people as guinea pigs," Heinz Lehmann, a psychiatric colleague of Cameron's, said in a 1984 Montreal Gazette account of his contemporaries efforts. Lehmann taught at McGill and became the Allan Memorial Institute's clinical director in 1958, a position he held until 1971. "It was a heroic, very aggressive treatment based on a certain theory which proved to be wrong." The treatment Cameron's patients received was no secret to Lehmann. "I knew ... and I didn't approve," he said. "But not for moral reasons. I didn't believe in his theory." Lehmann, instead, had his own theories—and performed his own experiments, at times with fatal results.

Herbert Leiderman, M.D- Harvard University.

Alexander H. Leighton- Japanese War Relocation Centre at Poston in the Mojave Desert. Both studies aimed to learn about the concept of feedback which is important in understanding human personality. The role of feedback was discovered in a brainwashing experiment at McCaffrey's Stanford University.

Robert S. Leonard- Director of Radio physics laboratory. Remote Viewing. SRI.

Leonide- "Quantitative Electroencephalographic Analysis of Naturally Occurring (Schizophrenic) and Drug-Induced Psychotic States in Human Males," Goldstein, Henry B. Murphree, A. Arthur Sugerman, and Carl C. Pfeiffer.
A.N. Leontev - Study of paranormal phenomena.
M.A. Leontovich- Study of paranormal phenomena.
Aubrey Levin -During the 1970s to 1980s, the South African Defence Force forced lesbian and gay military personnel to undergo "sex-change" operations. This was part of a secret program to purge homosexuality in the army.
Kurt Lewin- German psychologist one of the creators of the American OSS intelligence network, precursor to the CIA.Kurt Lewin, from Germany, took over as director of the Tavistock Clinic, then went to America to set up the Harvard Psychology Clinic. (Dr. Kurt Lewin, would elaborate on Rees's "discovery" and develop methods for inducing controlled, irrational behaviour by groups of people.

Lewin's three stage theory of change is commonly referred to as Unfreeze, Change, Freeze (or Refreeze). The NRC recruited anthropologist Margaret Mead, along with German-born psychologist Kurt Lewin. Worked on leadership experiments in the United States together with Ronald Lippitt and Ralph White.
Harold Lief - Lief is a director of the Center for Sexuality and Religion, past president of the Sex Information and Education Council. (Professor Ian Stevenson) C oauthor with Dr. Heath Tulane University.
John T. Liell- A restudy of Levittown, New York. The Human Ecology Fund, CIA.
Dr. Robert Lifton- Air Force Psychological Warfare Division. conducted the research in Hong Kong in 1954-1955, followed by four years of analysis in the U.S. He had participated in the "psychiatric evaluation of repatriated American prisoners of war during the exchange operations in Korea known as Big Switch.
R.U. Light- A method for Remote Control of Electrical Stimulation of the Nervous System", a monograph by Dr. E.L. Chaffee.
Rensis Likert- Was introduced to project MK-ULTRA at the University of Michigan.Rensis Likert-During World War II, Likert transitioned to working for the Office of War Information (OWI).

At the OWI, he was appointed head of the United States Strategic Bombing Survey Morale Division (USSBS).

University of Michigan was involved in MK-ULTRA from 1948 to 1974. Most MK-ULTRA records were destroyed in 1973, limiting the scope of MK-ULTRA sub-projects. When Rensis Likert established ISR at Michigan and Henry Murray established PCA at Harvard in 1948, MK-ULTRA testing and experimentation began in the education system.

The Research Center for Group Dynamics relocated to Michigan in 1948 with Dorwin Cartwright as the first director here. Just two years earlier, Rensis Likert and some colleagues (including Angus Campbell, George Katona, Charles Cannell, and Leslie Kish) who had worked at the Bureau of Agricultural Economics during the war had moved to Michigan and established the Survey Research Center.
Dr. John Lilly- Neurophysiologist, at Stanford University. wrote in the late 1950s on the behavioural modification and control of 'human agents'.

Lilly's research, then being carried out at the National Institute of Mental Health. Lilly claimed that the use of sensory isolation, electrostimulation of the brain, and the recording and mapping of brain activity could be used to gain 'push-button' control over motivation and behaviour.

Lilly implies that he left the NIH because of unethical government interference; his Communications Research Institute (founded in 1958 to study dolphins) was partially funded by the Air Force, NASA, NIMH, the National Science Foundation, and the Navy. He was assisted in this work by Gregory Bateson.

Samadhi Tank Co., Inc., sensory deprivation tank.
Dr. James Lin- Microwave Auditory Effects and Applications. Lin mentionsthe Sharp and Grove experiment and comments: "The capability of communicating directly with humans by pulsed microwaves is obviously not limited to the field of therapeutic medicine.

University of Illinois. Electromagnetic Interaction With Biological Systems. Wayne State University-Microwave Auditory Effects and Applications. It explores the possible mechanisms for the phenomenon, and discusses possibilities for the deaf, as persons with certain types of hearing loss can still hear pulsed microwaves (as tones or clicks and buzzes, if words aren't modulated on). Lin

mentions the Sharp experiment and comments, "The capability of communicating directly with humans by pulsed microwaves is obviously not limited to the field of therapeutic medicine."
Julie H. Linden- The strength of hypnosis for accessing resources outside of conscious awareness and use of dissociative language to both support and alter the patient's defence. president for the American Society of Clinical Hypnosis and is the Past President of the International Society of Hypnosis.
Colonel Douglas Lindsey- Edgewood Arsenal, replaced Sim as chief medical officer in 1959. The drugs were being tested for use in "psychochemical warfare"whose goal was to incapacitate mental function.
Dr. Ogden R. Lindsley- He conducted research at at the Atomic Energy Commission laboratories directed by Dr. Walter W. Jetter of Boston University Medical School, and with Skinner founded and directed, from 1953 to 1965, the Behavior Research Laboratory under the auspices of Harvard Medical School. During that time Lindsley conducted extensive behaviour research with human subjects, coined the term "behaviour therapy" and demonstrated that principles of learning discovered in Skinner's animal operant conditioning labs applied with equal power and precision to humans.
Dr Thomas Ling- Powick Hospital in Worcestershire (a psychiatric unit which was closed in 1989) which had a dedicated LSD experimentation unit. And John Buckman. These three worked in England at both the Chelsea Clinic in London and Gatwick Hospital in Worcestershire, outside of London.
Dr. Morris A. Lipton -Involved with chemical warfare during WWII, and went on to conduct the LSD experiments on veterans at the Chicago VA Hospital.
Ronald Lippitt- Lippitt was first a student under, and later a colleague of, Kurt Lewin. They did work together on a study on group dynamics with 3 groups of children under 3 models of leadership.

Cofounder of the National Training Center for Group Dynamics at the Massachusetts Institute of Technology, and again later was a cofounder of the Center on the Research for the Utilisation of Scientific Knowledge at the University of Michigan.
David Litster- Radiation experiments.
Dr. George Litwin- Concord Prison Experiment.

Dr. Elizabeth Loftus- "Memory engineering could be done and could be helpful for people," she told The Vancouver Observer. "It'll probably be a while before you can go as far as things went in Inception, but you can make people believe that they did things or saw things or experienced things that they didn't do or see.

"You can do things to take memories away from people. So we're just on the forefront of trying to understand those processes, where we can apply them – maybe – for the good of people."

B.F. Lomov- The nature of the biological energy field. working on problems of sensory deprivation.

Stanley Lovell- OSS 1943 study on "truth drugs." reported to OSS director William 'Wild Bill' Donovan."

Robert Lowell- Leary gave him LSD in New York. Lowell told Leary, "Now I know what Blake and St. John of the Cross were talking about."

Dr Oliver Lowery -O f Norcross, Georgia, and is described in US Patent #5,159,703,

"Silent Subliminal Presentation System", dated October 27, 1992.

Georgi Lozanov- Creator of suggestology, suggestopedia (or ' suggestopaedia ', an experimental branch of suggestology for use in pedagogy), and integrated psychotherapy. Through extensive research he has discovered laws of suggestion which he has applied in many fields from medicine to education. The suggestopedic method allows an individual to learn five to fifty times faster.

Dr. Ardie Lubin- The Recuperative Effects of REM Sleep and Stage 4 Sleep on Human Performance After Complete Sleep Loss: Experiment 1.

Walter von Lucadou- Development of the System Theoretic Approach to Psychokinesis.

David Luke PhD- A British psychologist and parapsychologist. He is a Senior Lecturer in the Department of Psychology and Counselling at the University of Greenwich. His research has focussed on the psychology of belief in magic, luck and the paranormal, anomalous experiences and altered states of consciousness.

Dr. Lupertz -Radiation experiments, Texas.

A. R. Luria- Soviet advances in. the mapping of the brain. neuropsychology has put us (the Soviets) on a new path in the investigation of how the brain functions. Luria feels that this is likely

to lead the way to substantial changes in the design of psychological research in the future.

Samuel B. Lyerly- Psychiatric rating scales. Human Ecology Fund, CIA. psychology $22,551

M

Dr. Bruce Maccabee- Has been a Research Physicist at the Naval Surface Weapons Center in Silver Spring, Maryland since 1972. His work has centred on high power lasers, underwater sound, and the Ballistic Missile Defense. He holds a Ph.D. in Physics from the American University in Washington, DC. Dr. Maccabee was a member of the National Investigations Committee on Aerial Phenomena.

Dr. Gordon J. F. MacDonald- Science advisor to President Lyndon Johnson – wrote, "Perturbation of the environment can produce changes in behavioural patterns." He was referring to low-frequency EM waves in the ionosphere affecting human brain wave patterns. Specialist in problems of warfare-says accurately-timed, artificially-excited electronic strokes 'could lead to a pattern of oscillations that produce relatively high power levels over certain regions of the Earth... In this way, one could develop a system that would seriously impair the brain performance of very large populations in selected regions over an extended period.

John J. Macisco -Internal migration in Puerto Rico. $1,000. The Human Ecology Fund, CIA.

C.E. Mackinnpn- Experimenting with human subjects since 1952. Some of their work Includes studies on the effects of light and other stimuli on aircraft pilots; it is believed that this research was military oriented.

Harold Macmillan- Committee meeting of May 1963, chaired by Conservative prime minister Harold Macmillan, which agreed to: "an increase in research and development on lethal and incapacitating chemical agents and the means of their dissemination."

Peter Maddock- Can Telepathic Brain States be Artificially Induced and Stabilised by Electromagnetic Means?

Dr. William Malamud- Studying the psychological changes and the change in the brain activity as measured by the EEG in schizophrenic patients under the influence of sodium amytal, benzedrine, and cocaine. The data as yet available do not allow any definite conclusions to be stated with Winfred Overholser, on Multidisciplinary Research In Schizophrenia. Co-author with Overholser.

Magnus Malan- Minister of Defence, South Africa's chemical and biological weapons programme, codenamed Project Coast, was established in 1981. Project Coast brought together research scientists, doctors, veterinarians and other health professionals under a management committee that included high-ranking members of the South African Defence Force. 3 The project officer was Dr Wouter Basson.

H. Weil-Malherbe -Studied the effects of LSD on mental processes and adrenaline in the blood and began characterising the behaviours resulting from LSD administration to patients. They found that "depressive patients," experienced enhanced symptoms, becoming more depressed; while patients with schizophrenia experienced catatonic, or altered, states. They also found that after administering LSD through the patients' veins, adrenaline levels would fluctuate by rising, dropping, and rising, while blood glucose remained unaffected by the drug. Their method of administering LSD through the veins of patients with schizophrenia was adopted in later studies.

Stefan Manczarski- Poland predicts that this new field of telepathy will open up new avenues for spreading propaganda. He feels that the electromagnetic theory is valid and believes, therefore, that telepathy can be amplified like radio waves.

Dr. Alan Mann- Was a steadfast supporter of Cameron's work and even testified on behalf of the CIA in the trial brought on by 9 Canadian citizens who sued them for their illegal experiments.

"Dr. Cameron was the leading psychiatrist in this country in the 1950s," Dr. Alan Mann, psychiatrist in chief at the Montreal General Hospital told the court.

Mann said Cameron, who was killed in a mountaineering accident in 1967, had been a 'commanding presence' in Canadian medicine even though some of his practices were discontinued after his 20-year tenure at the Allan Memorial. Cameron's use of drugs was 'within acceptable limits known at the time,' Mann said.

Richard W. Mansbach- W orking with the CIA using student authored research without their knowledge in studying Berlin, the Soviet Union and other areas of national security interest.
Dr. Vernon Mark- C o-author with Delgado. Dr. Mark and Dr. Ervin after Mr. Kilie's treatment. In the book, the doctors said that a patient later identified as Mr. Kille agreed to the surgery while under the influence of a " stimoceiver ," a remote control device that affects emotions through electronic stimulation of the brain.

Suggested that urban violence, which most African-Americans perceived as a reaction to oppression, poverty and state-sponsored economic and physical violence against us, was actually due to "brain dysfunction, " and recommended the use of psychosurgery to prevent outbreaks of violence.
Dr. Amendeo Marrazzi- A scientist at the Medical Laboratory, Army Chemical Center. Marrazzi prevailed on one of the New York City Medical Examiners with whom he was well acquainted to place all the records (regarding Blauer) in a confidential file in the medical examiners' office. Thus the Medical Examiner was informed that Blauer's death was connected with secret Army experiments, but he was also told that this information was not to be disclosed.

LSD experiments, University of Minnesota, LDS experiments. A scientist at the Medical Laboratory, Army Chemical Center research in psych chemicals.
Deuce Martinez- An American intelligence professional. "Deuce" is not his given first name, but a nickname that was used in the first newspaper article naming him. He was involved at the start of the Central Intelligence Agency's Rendition, Detention and Interrogation program of "high-value detainees," including Abu Zubaydah, Ramzi bin al-Shibh, Abd al-Rahim al-Nashiri, and Khalid Sheikh Mohammed. Martinez eventually left the CIA and went to work for Mitchell Jessen and Associates, a consulting company run by former military psychologists Jim Mitchell and Bruce Jessen.
Abraham Maslow- Brandeis University , the leading exponent of the irrationalist "think force" and founder of AHP in 1957. "departments of psychology for making their classes available to me." Martin Orne.
Max Mason- Rockefeller Foundation president. "The Social Sciences will concern themselves with the rationalisation of social control,... the control of human behaviour."

Joseph Matarazzo- Matarazzo, a psychologist, an emeritus professor at Oregon Health Sciences University and past President of the American Psychological Association. Had business ties to Joseph Mitchell and John Bruce Jessen. Matarazzo, wrote a memo concluding that sleep deprivation did not constitute torture. He served on CIA committees dealing with psychological assessment issues, most recently in 2001-2004.

Richard D. Mattuck- Random Fluctuation Theory of Psychokinesis: Thermal Noise Model. Copenhagen physicist, proposed an observational theory which builds on the work of both Helmut Schmidt and Evan Harris Walker.

Edwin C. May- A nuclear physicist by training, worked as a research scientist on the Cognitive Science Program, better known as Stargate, at Stanford Research Institute and Science Applications International Corporation from 1975 to 1985.

Joined the SRI remote viewing program in 1976. He became head of the program after Hal Puthoff left in 1985. He continued his work as director at SAIC (Science Applications International Corporation) when the research program moved in 1991.

Physicist a nd parapsychologist notable for conducting parapsychological research at the Stanford Research Institute and for his involvement with the Stargate Project on remote viewing. He was President of the Parapsychological Association in 1997 and Executive Director of the Laboratories for Fundamental Research.

Dr. Helen Mayberg- A neurologist at Emory University, who pioneered using deep brain stimulation for treating depression. "They open the door to new ways of viewing and probing the brain to improve our understanding of feelings, thoughts, and actions," she explains.

Dr. John D. McCaffrey- F rom Stanford University McCaffrey's proposed research outlined a visual approach where he would record feedback from Aborigines in the form of their artwork. This study mirrored an unethical MK-ULTRA experiment by U.S. Military Doctor, Alexander H. Leighton.

John J. McCloy- Ford Foundation, The CIA uses philanthropic foundations as the most effective conduit to channel large sums of money to Agency projects without alerting the recipients to their source. He created an administrative unit within the FF specifically to deal with the CIA. McCloy headed a three person consultation

committee with the CIA to facilitate the use of the FF for a cover and conduit of funds.

Kevin McConkey- Orne's lab, President of the APS 1994.

Robert A. McConnell PhD -A n American physicist and parapsychologist. He is known for his experimental studies of PK (using dice tests), and ESP.

Dr. James V. McConnel- H ead of the Department of Mental Health Research at the University of Michigan, said, "The day has come when we can combine sensory deprivation with the use of drugs, hypnosis, and the astute manipulation of reward and punishment to gain almost absolute control over an individual's behaviour. We want to reshape our society drastically." Dr. James V. McConnell was an enthusiastic supporter of Dr. Groder's work. In an April 1970, Psychology Today article entitled: Criminals Can Be Brainwashed.

William McDougall FRS- W as an influential British-American psychologist. He was appointed Professor of Psychology at Harvard University in 1921 and then at Duke University in 1927. At Duke he founded the world's first dedicated parapsychology laboratory (with J.B. Rhine) in 1935 (now the Rhine Research Center), and the Journal of Parapsychology in 1937. He served (1920-1921) as President of the Society for Psychical Research.

Donald W. McElwain- W ho had carried out psychological experiments at Maudsley in the early 50's. McElwain was the President of the Australian Branch of the British Psychological Society at this time (1958-1959).

William McGill- Massachusetts Institute of Technology, Martin Orne.

Thomas McGlashan -Hypnotism with Martin Orne. Able to demonstrate convincingly that hypnotic analgesia was not merely a variant on the placebo response.

Ralph McGuire -Glasgow. electrical aversion therapy.

Paul McHugh- (Chairman of Psychiatry at Johns Hopkins) McHugh, professor of psychiatry at Johns Hopkins University, has been actively working against the medical treatment of trans people since the 1970's. As the university's chief psychiatrist, he was instrumental in closing the Johns Hopkins Gender Program in 1979. Professor of Psychiatry at Cornell University. Dr. McHugh was the

founder and first director of the Bourne Behavioral Research Laboratory of New York Hospital, Westchester Division at Cornell.

At least eight men have been convicted of sexually abusing Maryland children while under treatment at the "sex disorders" clinic McHugh runs at Johns Hopkins University School of Medicine – abuse the doctors did not report, citing client confidentiality. When Maryland law was changed to require that doctors report child molestation, the clinic fought it and advised patients on how to get around the law. The memo to patients suggested that molesters report their pedophilic activities to their lawyers, who could in turn tell staff; attorney-client privilege would then protect the molesters from being reported. This memo was fully approved by the boss – Dr. Paul McHugh…"

Victor A. McKusick- University Professor of Medical Genetics, Institute of Genetic Medicine, Johns Hopkins School of Medicine. One of the founding fathers of medical genetic research, he has been a member of the Johns Hopkins University faculty. A geneticist who worked at Johns Hopkins and worked with blood samples taken from Henrietta Lacks' children and husband.

Ian P. L. McLaren- Awareness of Success in Free-Response Dream ESP Testing with a Single Subject.

J.McMonigla- 'Secrets of remote viewing'.

Robert McNamara- Project 112 was a biological and chemical weapon experimentation project conducted by the United States Department of Defense from 1962 to 1973.

Margaret Mead -W ho was the ex-wife of CIA and MK-ULTRA founder Gregory Bateson A nthropologist, funded by and did work for the OSS/CIA, colleague of Cameron and Wittkower.

The Mead material reviewed consisted of interviews of German and Japanese POWs made during and immediately after WWII and the analyses and conclusions drawn from the knowledge acquired of the German and Japanese cultures.

Russell Targ and Harold E. Puthoff, Mead supported remote viewing.

Ainsley Meares- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Josephine Hilgard, Kay Thompson, Herbert Spiegel, John Hartland, Per-Olaf Wikstrom, P. Brugnoli, and Erika Fromm.

Sarnoff A Mednick- ***(Under two name spellings)*** Identification of individuals prone to schizophrenia. Human Ecology Fund, CIA.
Zarnoff Mednick- with Danish professor Fini Schulsinger, constructing a study of 207 children with schizophrenic mothers, and a control group of 104 children without schizophrenic mothers, including Wennick. He sought to ascertain how many would develop schizophrenia and how it might manifest. Over a third of the participants were orphans. Roughly a quarter of that money flowed from the Human Ecology Fund, a CIA front and outgrowth of QKHILLTOP, one of a cluster of mind control programs launched by the agency in the 1950s to study alleged communist brainwashing techniques and develop interrogation strategies. It was eventually absorbed into the notorious MKULTRA.
Richard Meisch, M.D.- Co-author with Marrazzi .
G. G. Melkumova- Reported psychological subjective findings based on clinical observations of 104 individuals exposed to ultrasound in an industrial environment. The main complaints of the examinees were headache, extremely pronounced fatigability, tiredness and a general weakness. The onset of fatigue in most of the subjects began as early as two to three hours after starting work with simultaneous development of headache.
Malcolm L. Meltzer- Staff Psychologist, District of Columbia General Hospital, Counter Manipulation Through Malingering.
Jack H. Mendelson, MD -Professor of Psychiatry (Neuroscience) at Harvard Medical School and Co-Director of the Alcohol and Drug Abuse Research Center at McLean Hospital.

Studied Sensory Deprivation-Herbert Leiderman, M.D.; Donald Wexler, MD; Philip Solomon, MD, concluded that "sensory deprivation can produce major mental and behavioural changes in man" and recommended its capacity to induce psychosis.
Jonna Mendez -27 years working for the CIA, was in charge of creating advanced disguises - including masks.
Dr V.V. Meriakri- Electro- magnetic radiation.
Dr Ira Merritt -Chief of Concepts Identification and Applications Analysis Division, Advanced Technology Directorate, Missile Defence and Space Technology Centre, Huntsville, Alabama, discussed the proliferation of RF weapons primarily from the former Soviet Union.

Rhoda Métraux - Assisted Wolff and Hinkle's research into the impact of stress among Chinese individuals unable to return to China. When Wolff learned that Rhoda Métraux would not be granted research clearance by the CIA, he lied to her about the nature of their work. Hinkle later admitted that this. The Human Ecology Fund project's secret goal was to recruit skilled CIA intelligence operatives who could return to China as spies.
Dr. Ralph Metzner- Concord Prison Experiment.
Dr. Lester Middlesworth- Injected 7 newborn babies with radioactive iodine in an experiment sponsored by the Atomic Energy Commission at a hospital treating low income people. Six of the babies were African American.
Stanley Milgram- Working under the government's grant showed that anyone is capable of torture. The National Science Foundation gave a $24700 grant to Milgram, by the CIA and the Office for Naval Research.
Emanuel Miller- Was the founder of the Jewish Child Guidance Clinic in the East End of London. By 1937 he was also attached to the Institute of Medical Psychology later the Tavistock Clinic) and London's West End Hospital for Nervous Diseases. He was also a member of the Social Problems Committee of the National Council for Mental Hygiene.
Dr Kenneth Milner- Aston Hall, Derbyshire. Using a drug called sodium amytal on children.
Marvin Minsky- Massachusetts Institute of Technology (MIT) to pursue his interest in using computers to model and understand human thought.

A victim of billionaire Jeffrey Epstein testified that she was forced to have sex with MIT professor Marvin Minsky.
A.L. Mints- S tudy of paranormal phenomena.
A.D. Minz- USSR's Academy of Sciences. Telepathic experiments.
Dr Stanley Mirams- The head of mental health. Lake Alice.
Allan F. Mirsky- Research psychologist at National Institute of Mental Health 1954-1961. Former president of International Neuropsychological Society. "The lobotomy project funded my graduate education at Yale, and Hal Rosvold, with my help, did studies on patients. We would go to state hospitals weekly and study patients who were potential candidates for prefrontal lobotomy, and the notion was that we would do evaluations pre- and post to see

what affects the operation had not only on their symptoms, obviously, but also on cognitive processes."
Juhani Mirvas- University of Helsinki, MK-ULTRA contractor. Study of the interaction between the mentally disturbed and their environment. To gain further insight into additional factors which may influence human behaviour and to achieve further development of the world-wide activities of the Human Ecology fund.
D.G. Mirza (Д.Г.Мирза)- Telepathic experiments. opened a laboratory for the study of parapsychology in 1955. After the death of Turlygin in 1958, D.G.Mirza became a head of the Laboratory. USSR's Academy of Sciences.
John Mischo- A Pilot Study on the Relations Between PK Scores and Personality Variables.
Edgar Mitchell -Made 150 separate attempts to project his thoughts from inside the space capsule back to an individual on earth. Conducted an experiment using star-cross-wave-square-circle psi· cards developed at Duke University. In six sessions, he "transmitted" 25 card images at preset times, while "recipients" recorded their impressions. While the results exceeded statistical probability, they were not overwhelming
James Mitchell- A psychologist who helped the CIA torture people. One of the architects and practitioners of waterboarding, which involves strapping human beings to a gurney, covering their nose and mouth with a rag, and forcing water into their nasal cavity and lungs as they squirm. The technique is intended to break people by subjecting them to the primal terror of drowning. (Seligman)
Mikhail Moiseyev- Unit 10003.
A. I. Monin- Telepathic tests vs distance.
Dr. James Monroe -A former US Air Force officer who had worked on top-secret psychological warfare and propaganda projects, oversaw about 55 top-secret experiments underwritten by the CIA. These projects involved LSD, ESP, black magic, astrology, psychological warfare, media manipulation, and other subjects.
Robert A. Monroe- (1993) "Method for Inducing Mental, Emotional and Physical States of Consciousness, Including Specific Mental Activity in Human Beings", patented by Robert A. Monroe, a practitioner of "remote viewing", founder of the Monroe Institute in Charlottesville, Virginia. Specific states of consciousness can be induced, "through generation of stereo audio signals having specific

wave shapes...human brain waves, in the form of EEGs, are superimposed upon specific stereo audio signals, known as carrier frequencies which are within the range of human hearing." James Monroe studied North Korean brainwashing victims for the Air Force. Later, he became Executive Director of the Human Ecology Society, which was a primary funding conduit for the CIAs MK-ULTRA mind control program, and received 90% of its funds from the agency. James Monroe personally supervised the work of Dr. Ewen Cameron, whose psychic driving and coma "therapy" techniques were among the worst of MK-ULTRA's legacy. Founder and director of the Monroe Institute.

Dr. Russell R. Monroe- A psychiatrist on Heath's research team, became the principal investigator for army contract DA-18-108-CML-5596, a project listed in university records under the title, "Clinical Studies of Neurological and Psychiatric Changes during the Administration of Certain Drugs."

Dr. James Moore- A former chemistry professor he was contracted by the CIA to help develop psychedelic drugs in the 1960s. As a graduate student, Moore had worked alongside scientists who were involved with the Manhattan Project, the creators of the atomic bomb. He made BZ for the CIA.

E.F. Mordinov- The electroencephalogram may serve as one of the objective quantitative measures of suggestibility in man in the wakeful state.

F.D. Mordvinov- Psychophysiological research in connection with ergonometric questions, and only peripherally have something to do with parapsychology.

Major David Morehouse- Military remote viewer with the INSCOM/DIA program. Morehouse served from 1988-90 at Ft. Meade during SUN STREAK.

Kyio Morimoto- LSD study in Boston, a sociologist who was part of the research team.

Col. Toyoaki Morita -Provided details of Japanese development and use of chemical and gas weapons against the Chinese. Included information on Army medical experiments in Shanghai.

Suzanne Moroney- Chelmsford.

Bert Jan ter Mors- Electrical aversion therapy (EAT) is a behavioural therapeutic option used in persons with intellectual

disabilities, which might be suitable for brain-injured individuals for whom other therapies are not effective.

Dr. Thelma Moss- Assistant Professor, UCLA Neuropsychiatric Institute.

Jane S. Mouton- The Experimental Investigation of Interpersonal Influence, by Robert R. Blake and Jane S. Mouton, Professor of Psychology, University of Texas, and Social Science Research Associate, University of Texas, respectively.

Clarence W. Muehlberger- Head of the Michigan Crime Detection Laboratory at East Lansing, was using barbiturates on reluctant suspects, though police work continued to be hampered by the courts' rejection of drug-induced confessions except in a few carefully circumscribed instances.

Heinrich Mueller- Important programmer who went under the code names "Dr. Blue" or "Gog." He apparently has two sons who have carried on the trade.

Caroline Muir- Divine Feminine Awakening, and creator of divine-feminine.com. She has led many Esalen weekends for women.

Morgan Muir- Defended CIA's torture program. After the 6,700 page report was released, Daniel Jones, Senate investigator and lead author of the report, said Muir continued to defend the value of the torture program, using information the CIA later admitted was inaccurate.

John Mulholland- MK-ULTRA Subprojects 4, 15, and 19 are to fund the contractor, a magician, to write a manual on the various aspects of the magicians' art which could be useful in covert operations. The result was Mulholland's Manual, declassified and published in 2009 as The Official CIA Manual of Trickery and Deception.

Henry B. Murphree- Emory University, 1959-1961; resident psychiatry Medical School, Rutgers University, 1972-1976; member graduate faculty psychology, Rutgers University, 1972-1997; research assistant, Johns Hopkins University, Baltimore, 1950; assistant chief neuropharmacology, Bureau Research, Princeton, New Jersey, 1961-1968.

Worked with Carl Curt Pfeiffer.

Quantitative electroencephalography was used to determine differential neuropharmacological effects of barbiturates in chronic schizophrenic men and nonpsychotic male volunteers. The effects of

oral pentobarbital and intravenous thiopental were compared in the two groups.

Quantitative studies in humans on the antagonism of lysergic acid diethylamide by chlorpromazine and phenoxybenzamine.

Gardner Murphy- An American psychologist who specialised in social and personality psychology and parapsychology. His career highlights included serving as president of the American Psychological Association and of the British Society for Psychical Research.

Michael Murphy - Head of the Esalen Institute, established by Huxley and others as the Centre for "sensitivity training" and drug experiments.

Mike Murphy became interested in Russian parapsychology and visited the country to meet experimenters in this field. This led to a close connection between Esalen and some Russian officials, who set up an exchange program. Lasting into the 1980s, this exchange was dubbed "hot-tub diplomacy".

R.C. Murphy- Murphy administered LSD to three children over a period of several months. One of these children was an 8-year-old girl who had a long-standing chronic resistive character disorder. From 1955 to 1956 she was treated for enuresis and had serious sexual conflicts. Routine psychotherapy for one year had resulted in no improvement. She was treated by Dr. Murphy with LSD, with the dose slowly increased to 300 mcg once weekly. Her enuresis stopped after the second LSD session in which she became disoriented and called continually for her mother.

Henry A. Murray- MK-ULTRA Doctor. the wizard of personality assessment who, as OSS chief psychologist, had monitored military experiments on brainwashing and sodium amytal interrogation.

Harvard psychologists, led by Henry A. Murray, conducted a disturbing and what would now be seen as ethically indefensible experiment on twenty-two undergraduates. (Theodore John Kaczynski) Henry Murray's experiment was intended to measure how people react under stress. Murray subjected his unwitting students, including Kaczynski, to intensive interrogation—what Murray himself called "vehement, sweeping, and personally abusive" attacks, assaulting his subjects' egos and most-cherished ideals and beliefs.

J. Ricardo Musso- An ESP Drawing Experiment With A High-Scoring Subject.
V. Mutschall- Efforts toward the aimed telepathic manipulation of human consciousness.
S.P. Mythili- Rigidity and ESP.

N

Edgar Nace- Hypnotism with Martin Orne.
Hans Nachtsheim- Negative pressure experiments were carried out at the von Strughold Institute on six children suffering from epilepsy from a psychiatric clinic in Brandenburg-Görden.
Lt. Comdr. Thomas Narut- in a question and answer session with reporters from many nations, revealed how the Navy was secretly programming large numbers of assassins. He said that the men he had worked with for the Navy were being prepared for commando-type operations, as well as covert operations in U.S. embassies worldwide. He described the men who went through his program as "hitmen and assassins" who could kill on command.
Edward K. Naumov- Center for psychotronics and traditional healing, telepathy experiments which were conducted over the distance of Moscow to Leningrad.
T. Neeme- Estonian physicist He experimentally confirmed an accelerated deposition of colloidal solutions under the impact of human bioenergy.
Ulric Neisser, Ph.D., N.A.S- A ssociate of Shor. Teacher in the psychology department at Cornell University.
Roger Nelson- Director of the Global Consciousness Project. A pioneer of research using Random Event Generators (REG) he was, from 1980-2002, Coordinator of Research at the Princeton Engineering Anomalies Research laboratory (PEAR) at Princeton University.
Vernon Michael Neppe- The Olfactory Hallucination , in the Psychic.
Peter Neubauer- Performed their hush-hush experiments on children given up for adoption between 1960 and 1978. The multiples were sent to different families without the knowledge of

their biological mothers — and the adoptive parents were never told that their new infants had identical siblings.
General Nieuwoudt- Project Coast.
Karl Nikolaev- Telepathy experiments which were conducted over the distance of Moscow to Leningrad.
Anais Nin -Given LSD by Oscar Janiger.
Philip Nogee- Martin Orne, Hypnotism. Boston University.
Sir Gustav Nossal -Director of Walter and Eliza Hall from 1965 until his retirement in 1996.During those years Nossal oversaw an Experimental Vaccine Program whereby babies from various religious run Orphanages were used as guinea pigs for "Herpes" and Polio Vaccines.
Dr. Arthur Nugent- Chief psychiatrist at Vacaville. when he observed that the Anectine treatment gave the "patient" the feelings of suffocation and drowning, of terror and horror, and made him feel "as though he were on the brink of death.

O

Anton Obholzer- Tavistock Clinic. He worked in every department, he is most often associated with the Adolescent Department. Obholzer took charge of the Tavistock Clinic in 1985. In 1994 the Tavistock and Portman clinics merged, and successfully became one NHS trust, while remaining as two separate clinics.
Mr James O'Bryon- Deputy Director of Operational Testing and Director of live fire testing for the Office of Secretary of Defence at the Pentagon, discussed the role of Live Fire Testing and how it plays a role in testing military equipment with RF weapons.
Donald N. O'Connell- Pilot studies, hypnotism, Martin Orne.
Dr. Oscar A. Oeser- Australian Branch of the British Psychological Society. The
foundation Professor of the Psychology Department at the University of Melbourne. Oeser was a former agent of British Intelligence and also the Chairman of the Australian Branch of the British Psychological Society in 1956. This was the same year he was in contact with Richard Casey who helped develop Australia's intelligence organisations with the CIA and MI-6. Casey was the Minister for External Affairs at this time – which meant he had

authority over the USEFA /Fulbright Scheme in Australia until he left office in 1960. Oeser's name appears in the recommendations list for Fulbright Lecturer/Research scholars in 1959. He was a heavily connected psychologist – having employed Tavistock Founder, Dr. Eric Trist, to carry out research in 1935.

Richard Ofshe Ph.D .-Coauthor with Singer, professor at the University of California. (Sociologist)

A.F. Ohatrin (А.Ф.Охатрин)- Psychotronics, microlepton field.

Frank Olson- In November 1953, the project's CIA personnel gave LSD to Olson, an executive of the Army Chemical Corps' Special Operations Division. A highly skilled Army scientist who worked at Fort Detrick in Frederick, Maryland, a top-secret U.S. Army facility that researched biological warfare agents.

Marvin Opler- The Human Ecology Fund provided a travel grant 1964 First International Congress of Social Psychiatry in London. The Wenner-Gren Foundation also provided funds for a 'project in the Cross-Cultural Study of Psychoactive Drugs which was presented at the Congress', where Opler presented a paper under that title.

Brendan O'Regan- Former consultant to the Center for the Study of Social Policy at SRI, associate editor of the International Journal of Psychoenergetic Systems, research coordinator for Buckminster Fuller, and research director of the Institute of Noetic Sciences. Parapsychology.

Emily Carota Orne, B.A.- (Emily Carota). Co-director of the Unit for Experimental Psychiatry and research associate of Psychology in the Department of Psychiatry at the University of Pennsylvania School of Medicine.

Dr. Martin T. Orne- Professor Orne was one of the leading researchers into hypnosis. Professor Orne was receiving funding from the secretive intelligence program MK-Ultra, which was in turn funded by the CIA. Martin Orne, M.D., Ph.D., Institute for Experimental Psychiatry (founder), Institute of the Pennsylvania Hospital, master hypnotist, CIA MK-ULTRA contractor, deceased

The International Journal of Clinical and Experimental Hypnosis was d edited for 30 years by Martin Orne.

Maressa Hecht Orzack- Dr Alan Mirsky. She studied attention-deficit disorder in patients with schizophrenia. Maressa and Dr

Mirsky co-directed a special contract mandated by Congress to look at the retrospective study of the results of different psychosurgery procedures. Dr Jonathan Cole at Harvard University's McLean Hospital, where they tested different psychotropic products for abuse liability.

Frederick H. Osborn- A longtime board member of the Carnegie Corporation of New York, Osborn was a president of the Eugenics Research Association and the author of the book Preface to Eugenics (1940), which launched what Time magazine hailed as a new "eugenics for democracy" that America could pursue without fear of being associated with the abuses of the Third Reich. Osborn was made president of the American Eugenics Society in 1946, and he became the key figure in sustaining philanthropy's enthusiasm for eugenics after its reputation had been tarnished by the Nazis; he did this by successfully rebranding eugenics as medical genetics and "population control."

Osborn joined forces with John D. Rockefeller III to start the Population Council, a group created to pursue many of the same goals as the older eugenics organisations but without the unpleasant odour that had attached itself to eugenics. As late as 1967, when Osborn was in his late seventies, longtime Rockefeller Foundation executive Warren Weaver invited him to write the chapter on "population problems" for an authoritative volume on the history of American foundations.

Charles Osgood- Research in field of cross-cultural meaning systems (emphasis on semantics and communications) in support of agent handling problems and in technical supported political activities. Osgood-Western Psychological Assessment. Subproject 95: MK-ULTRA $83,406 Human Ecology Fund, CIA.

October 7, 1977, the Chancellor of the University of Illinois phoned Charles Osgood, a psychology professor there, to inform him that he had received funding through Human Ecology. The University of Illinois was thus one of the 44 universities to receive documents from the CIA. A CIA memo of March 1960 indicates that the agency saw Osgood's project as "directly relevant to agency problems in (name deleted) and technical support of political activities."

Karlis Osis PhD -A Latvian parapsychologist. He worked as a researcher for several parapsychological organisations, including the Duke University parapsychology laboratory (now the Rhine Research Center), the Parapsychology Foundation, and the American Society for Psychical Research.

Humphrey Osmond -CIA-funded research into LSD was also done in Saskatchewan. Involved a single large dose of LSD alongside psychotherapy. Aldous Huxley consumed the drug in his California home under the direct supervision of psychiatrist Humphry Osmond.

Dr. Winfred Overholser, Sr. - "In the centre of " the OSS mind control network," Chairman of the Scottish Rite Research Committee Board. D r. Overholser was director of St. Elizabeth's Hospital for the Mentally Ill in Washington DC Overholser had worked with the OSS, where he was in charge of a special 1943 study on "truth drugs.".It was a joint effort by OSS and the National Defense Research Council. Overholser and others, like John Whitehorn at Johns Hopkins (who later would serve on the CIA's Human Ecology board), and Columbia psychiatrist/psychoanalyst Lawrence Kubie, worked in secret, "reporting only to Stanley Lovell, who reported to OSS director William 'Wild Bill' Donovan," Winfred Overholser, administered "hallucinogen mescaline to various test subjects."

A.R.G Owen PhD- A British mathematician and geneticist, and lecturer at Cambridge University. He and his wife Iris emigrated to Canada in 1970 where he directed research at the New Horizons Research Foundation in Toronto.

P

Walter Pahnke- The director of clinical science and leader of the Spring Grove research team. (Timothy Leary) Director of Clinical Sciences at the Maryland Psychiatric Research Center in the late 1960s, where he conducted sessions with LSD and DPT on terminal cancer patients, alcoholics, and those diagnosed with severe neurosis. He is well-known for designing and conducting the Good Friday Experiment.

John Palmer PhD- A psychologist and parapsychologist whose research covers ESP, PK, and theoretical and methodological issues.

He has held positions at several universities and at the Rhine Research Center. Hypnosis and Psi: A Research Program Related to the Theory of Kenneth J. Batcheldor.

Adrian Parker PhD- A British clinical psychologist and parapsychologist who pioneered the use of the Ganzfeld technique in parapsychological research. Professor Emeritus at the University of Gothenburg. Some Success at Screening for High Scoring ESP Subjects.

Albert Parry- Emerging socio-political roles of scientists and managers in the USSR. Human Ecology Fund, CIA.

Dr. Talcott Parsons-A ssociate of Mead, Army Intelligence and State Department, recruited Nazis for the US Government.

Dr Satwant Pasricha- Indian clinical psychologist and head of the Department of Clinical Psychology at the National Institute of Mental Health and Neurosciences in Bangalore. Since the early 1970s she has investigated several hundred cases of children who claim to remember previous lives.

Linus Pauling- Stated that individuals with genetic disorders should have a sign tattooed on their forehead in order to prevent two people with genetic disorders from reproducing with each other. Pauling believed that eugenic measures would prevent human suffering.

Dr. C. Alvin Paulsen- Used X-rays on the testicles of 64 prisoners at the Washington State Penitentiary in Walla Walla during the 1960s to find the dose that would make them sterile. Later reports indicated the number of prisoners was 131 — to find the dose that would make them sterile.

Robert Pavlita- In Czechoslovakia. Psychotronics also discovered the accelerated deposition of aqueous suspensions under the influence of bio-energy.

Ivan Pavlov- Pavlov's researchers suggested purchasing orphaned children, and the human experiments began. The child would be put under heavy anaesthetic and the implant was fixed into the orphan's throat. When they awoke they would be tied to a laboratory chair with their hands bound so they would be unable to remove the device and taped their mouths open.

Valentin Pavlov- 10003 military unit. The department was financed according to a specially developed secret program, authored by the Minister of Finance.

Doctor L. Pavlova- Electrophysiologist from the University of Leningrad. Worked with Doctor Genady Sergeyev.
Dr. Douglas Pearce- Experimenting with human subjects since 1952. Some of their work Includes studies on the effects of light and other stimuli on aircraft pilots; it is believed that this research was military oriented.
Godfrey D. Pearlson, M.D.- Professor of Psychiatry and Mental Hygiene, Director, Division of Neuroimaging, Johns Hopkins School of Medicine.
T. T. Peck -A clinic at San Jacinto Memorial Hospital in Baytown, TX. Peck also tried LSD on a 5-year-old girl because she was "completely rebellious about everything." That intervention does not seem to have been successful. T. T. Peck treated five children between the ages of 5 and 14. Macy Foundation.
EW Pelikan- Attempts to introduce curare into therapy met with little success as long as no reliable purified preparation was available.
Dr. Wilder Penfield- Neurosurgeon at McGill, associate of Baldwin. He convinced the Rockefeller Foundation to endow and fund the construction of Montreal Neurological Institute, which opened in 1934 by its founder and first Director, Wilder Penfield, the same year he became a Canadian citizen.

Stimulation anywhere on the cerebral cortex could bring responses of one kind or another, but he found that only by stimulating the temporal lobes (the lower parts of the brain on each side) could he elicit meaningful, integrated responses such as memory, including sound, movement, and colour. These memories were much more distinct than usual memory, and were often about things unremembered under ordinary circumstances. Yet if Penfield stimulated the same area again, the exact same memory popped up -- a certain song, the view from a childhood window -- each time. It seemed he had found a physical basis for memory, an "engram."
Campbell Perry- MK-ULTRA hypnosis research. University of Pennsylvania.
Glenn Perry- Samadhi Tank Company. (Dr. John C. Lilly)
Michael A. Persinger, Ph.D- Laurentian University (Ontario, Canada) 2002. Was an American-Canadian psychology professor who carried out experiments aimed at discovering correlations between consciousness and physical phenomena such as

geomagnetic activity. He was noted in particular for his 'god helmet', a device he claimed could induce paranormal-seeming experiences in the wearer by means of a weak magnetic field.

"On the Possibility of Directly Accessing Every Human Brain by Electromagnetic Induction of Fundamental Algorithms" Persinger feels that he is able to replicate alien abduction and other supernatural phenomena through the use of three solenoids (attached to a modified motorcycle helmet) passing a magnetic pulse through the frontal lobes of the brain.

His work and findings indicate that strong electromagnetic fields can and will affect a person's brain. He is known for his research on the effects of stimulating the brain with complex magnetic fields. This has included parapsychological investigations of telepathy and remote viewing as well as studies that have induced religious and mystical experience.

Dr. Leonas Petrauskas -Is confirmed to have been working at the Concord Military Hospital in Sydney before attending the Australian School of Pacific Administration. ASOPA was heavily connected to early Australian intelligence operations. Leonas Petrauskas graduated with a diploma in Tropical Medicine in 1957. 'Dr. Mark' was an alias for Dr. Petrauskas.

Marion David Pettie- The Finders.

Helen Pettinati- Worked with Martin Orne. Uncovered new features of posthypnotic amnesia.

William L. Pew, M.D.- Co-author with Marrazzi .

Carl Pfeiffer- With Project Mk Ultra started in 1953, Dr. Pfeiffer would find himself in charge of an extensive secret United States LSD and Drug Program. Sub-Project No. 26 is a follow-on from No. 9. Human testing on volunteers of drugs which may aid in the treatment of the schizophrenic patient by either altering his metabolism or producing sedation. University of Illinois

New Jersey Neuropsychiatric Institute, MK-ULTRA contractor, MKSEARCH contractor. Dr. Carl Pfeiffer of Emory University, a pioneer in "orthomolecular psychiatry." Ironically, in the 1970s, it was revealed that Pfeiffer was also one of the scientists who conducted secret research with LSD for the CIA's MK-ULTRA project. Dr. Pfeiffer would start experiments with the government at 'Bordertown Facility' in New Jersey under unknown projects in 1951(possibly under 'Artichoke' or 'Bluebird').

With Project Mk Ultra started in 1953, Dr. Pfeiffer would find himself in charge of an extensive secret United States LSD and Drug Program. Society for the Investigation of Human Ecology.

Capt. Clifford P. Phoebus- Chief, Biological Sciences Division, Office of Naval Research. Research in psych chemical.

Bernard Piché- A doctor who falsely certified the orphans (Duplessis Orphans) as mentally disabled, admitted to not examining any children in 1999. In a statement, Piché said, 'I did it because the nuns asked me to.'

William Leonard Pickard- A former research associate in neurobiology at Harvard Medical School, Harvard fellow in drug policy at the Harvard Kennedy School of Government, and Deputy Director of the Drug Policy Analysis Program at UCLA. His 1996 prediction of the fentanyl epidemic was published by RAND in The Future of Fentanyl and Other Synthetic Opioids.

August Piper, M.D.- Associate of McHugh. Private practice of psychiatry in Seattle, Washington, writes a semi-monthly column for the newsletter as of 2002.

Dr. Dimitrije Pivnicki- Father-in-law of Brian Mulroney, came to Canada on a fellowship in 1954 to do graduate studies at McGill University. His mentor at the Allan Memorial Hospital was Dr. Ewen Cameron, known for his experiments with psychedelic drugs and electroconvulsive therapy. Dr. Dimitrije Pivnicki, father-in-law of Brian Mulroney, came to Canada on a fellowship in 1954 to do graduate studies at McGill University. His mentor at the Allan Memorial Hospital was Dr. Ewen.

Cameron, known for his experiments with psychedelic drugs and electroconvulsive therapy.

Pivnicki became Senior Psychiatrist at the Allan Memorial Hospital and later an assistant professor of psychiatry at McGill University.

As a co-worker of Dr. Cameron, Pivnicki was known to have been involved in unorthodox psychiatric experiments funded by the Central Intelligence Agency. More recently there are revelations that the Canadian military financed Pivnicki's LSD research when he was a consulting physician.

It is believed that Brian Mulroney had all documentation related to Dr. Pivnicki purged from all McGill records.

G.F. Plekhanov (Г.Ф.Плеханов)- Parapsychological.

Bill Plemmons- MONARCH programming, directed mainly by Commander.
Dr Pober- Department of Experimental Psychiatry at Birmingham University also received substantial funding via the Rockefeller Foundation during the early 1950s for a five-year research programme. Dr Elkes was appointed as head of the programme.

Dr. A, Podshibyakin- Electrophysiologist, has found that by charting acupuncture points a correlation exists between the "bio-plasma" and changes on the surface of the sun.
Nikolai Poroskov- "Parapsychology makes it possible to defeat an adversary using non-contact methods,"
Colin Powell- had a central role in the approval of the use of torture on specific detainees as chair of the NSC Principals meetings.
John Poynton- Professor Emeritus in Biology at the University of Natal. He is President of the Society for Psychical Research.
Herman van Praag- Professor at the University of Groningen, who advocated biological psychiatric research with hallucinogens.
Joseph Gaither Pratt -American psychologist and parapsychologist who was one of the leading researchers at the Duke University parapsychology laboratory.
Dr. Madison Presnell- as the medical and psychiatric adviser Concord Prison Experiment.
A.S. Pressman- Cryptologic Aspects Of ESP.
H. Priester- Publications of International Resources in Clinical Psychology. Human Ecology Fund, CIA.
Raymond H. Prince- Treatment of psychiatric disturbances by Yoruba native practitioners. The Human Ecology Fund, CIA. psychiatry $4,060. Psychiatrist Raymond Prince, didn't find out until much later, that his research in Nigeria on "transcultural psychological studies" with the Yoruba people, was funded by the Human Ecology Fund, "to collect psychocultural data on cultures and countries of interest to the CIA for psychological warfare purposes". Additionally he was also to report on the Yaruba's use of drugs, then-unknown to the West. Subproject 121: MK-ULTRA: Witch Doctor study-Dr. Raymond Prince-- McGill University.

Prince will be located in Nigeria carrying out the plan of developing the Human Ecology Fund as a world-wide organisation.

Since Prince will learn the Yoruba language this project offers a potential facility for (deleted by CIA censors) project 95.
Sydney Pugmire -Superintendent of Lake Alice.
Henry "Andrija" Karel Puharich- He was assigned as Chief, Outpatient Service, U.S. Army Dispensary, Army Chemical Center, Edgewood Arsenal, Maryland. By this time he was already presenting papers on the possible military usefulness of paranormal phenomena. During that time, he was in and out of Edgewood Arsenal Research Laboratories and Fort Detrick, meeting with various high-ranking officers and officials, primarily from The Pentagon, CIA, and Naval Intelligence.

A captain in the Army Medical Corps and a parapsychologist interested in extrasensory perception and the clinical application of psychedelic drugs. Puharich participated in a number of secret experiments with Amanita muscaria. The experiments took place at prisons for men in New Jersey and Maryland, as well as at Spring Grove mental hospital in Catonsville, Maryland.

A radio receiver that can be concealed in a tooth was invented by Andria Henry Puharich.

In the mid-70s, Andrija Puharich, ran a complex in Ossining called the Turkey Farm. In the summer of 1975, Dr. Puharich assembled around twenty children from the ages of nine to late teens, called "Gellerlings" or "Space Kids". The DIA (Col. Weigner) and the Wright Patterson Air Force Base ATG took over the Space Kids Program from Andrija Puharich.

After receiving various anonymous threats, had seen his laboratory mysteriously destroyed by arson and, fearing for his life, moved to Mexico. Years later on his return to the US, he refused new CIA sponsorship offers and dedicated himself to privately sponsored research on bio-electromagnetics.
V.N.Pushkin -Unconventional research in the USSR and Russia.
Harold Puthoff- Joined SRI in 1971 as a specialist in laser physics. Worked for the previous eight years in the Microwave Laboratory at Stanford University. Served as an officer in the Navy from 1960-63 at Ft. Meade. Head of the SRI remote viewing program, 1972-85. After he left, Puthoff was replaced with Ed May. Former Naval Intelligence Officer.

R

Dr. Stanley Rachman -W as at the IOP at this time and he had published studies with Seligman that helped to develop his theory. Seligman's work at the IOP was in the same year that Kidman was involved with Learned Helplessness research on sheep in Australia.
Dean Radin, Ph.D- SRI International At SRI he served as a scientist on a highly classified program investigating psi phenomena for the U.S. government. Chief Scientist at the Institute of Noetic Science (IONS) and Associated Distinguished Professor of Integral and Transpersonal Psychology at the California Institute of Integral Studies (CIIS).
Bernard B. Raginsky -Canadian physician, was the founding president of the International Society for Clinical and Experimental Hypnosis, paralleling the Society for Clinical and Experimental Hypnosis (SCEH) which had been founded in 1949 in the United States.

Temporary cardiac arrest induced under hypnosis.
V.L. Raikov- Efforts toward the aimed telepathic manipulation of human consciousness. claimed that hypnotic phenomena can be utilised for what he claims to be "artificial reincarnations." For example, Raikov claims that it is possible to hypnotically suggest to a girl who studies violin that she is the virtuoso violinist Fritz Kreisler.
James Randi- Received a five-year $272,000 grant of the CIA- and State Department-linked MacArthur Foundation for the years 1986-1991.
John Randall- Group ESP Experiments with Schoolboys.
Koneru Ramakrishna Rao- An Indian philosopher, psychologist and parapsychologist. In 1967 he established the Department of Parapsychology at Andhra University. He also held posts at the University of Chicago and the Duke University parapsychology laboratory. In 1977 he was appointed Directory of the Institute for Parapsychology (now the Rhine Research Center).
B.K.Ratnikov (Б.К.Ратников)- Head of Energy and Information Laboratory Russian NAST Academy.

Dr. Elizabeth Rauscher-D irector of Technic Research Laboratory in San Leandro. Dr. Rauscher of UC Berkeley had been doing ELF/brain (Tesla Technologies) research with human subjects for some time. One of the frequencies produces nausea for more than an hour. Another frequency, she calls it the marijuana frequency, gets people laughing. "Give me the money and three months," she says, "and I'll be able to affect the behaviour of eighty percent of the people in this town without their knowing it."
Captain Bill Ray- Center Lane, counterintelligence specialist.
Ronald Reagan- Former President, befriended by L. J. West,personally approved West's UCLA Violence Project.
Dr. Antione Redmond- Paris, electrodes to stimulate directly the pleasure and pain centres in the brain has demonstrated that this method of stimulation on the brain can be applied to the human without help of the neurosurgeon.
Dr. John Rawlings Rees- A member of a group who referred to themselves as the 'invisible college', Tavistock. Consulting psychiatrist to the British army and medical director of the Tavistock Clinic, London. called for the creation of an army of "psychological shock troops," who would become the controllers of a society "where it is possible for people of every social group to have treatment when they need it, even if they do not wish it, without it being necessary to invoke law." In Rees's view, the therapist had the right, and the duty, to impose his judgments and will upon the masses of people who failed to see the value of the proposed therapy.
Brigadier General John Rawlings Reese- Tavistock 'invisible college'. Dr. John Rawlings Rees, who was one of the most brutal of the "doctors" hired by the CIA to conduct mind control experiments under MK-ULTRA.
Dr. Robert Reid- A mentally ill patient who was given LSD by physicians experimenting at the Massachusetts Mental Health Center in the 1950s killed herself within hours of taking the potent psychedelic drug, says a Cambridge, Mass., psychiatrist who had been following her progress at the time. "They gave this patient LSD one morning and when I came back from lunch that day, I was told she had hung herself in the downstairs bathroom," Dr. Robert Reid said yesterday. Dr. Reid said he was not told until after the woman's death that she had been given LSD.

Basson. Van Rensburg- Project Coast's biological research, nti-fertility work carried out at RRL.confirms that underlying Project Coast's fertility research was the idea of creating a vaccine to cause infertility in black South Africans.
C. H. Van Rhijn -One of the Dutch pioneers in LSD therapy. Van Rhijn alone decided to whom he would administer LSD. Van Rhijn was also an experimenter of electroconvulsive therapy.
Joseph Banks Rhine- Parapsychology Laboratory at Duke University, 90,000 experiments, using a wide variety of human subjects. At Duke, he developed experimental methodology for parapsychology, concentrating in the areas of telepathy, psychokinesis, clairvoyance and precognition. The CIA bought ESP cards from him.
Louisa Rhine PhD- Was a botanist, parapsychologist and wife of J.B. Rhine. Her research focussed on the investigation of spontaneous psi experiences.
Dr. Cornelius Rhoads -Under the auspices of the Rockefeller Institute for Medical Investigations – infects human subjects with cancer cells. He later goes on to establish the U.S. Army Biological Warfare facilities in Maryland, Utah, and Panama, and is named to the U.S. Atomic Energy Commission. While there, he begins a series of radiation exposure experiments on American soldiers and civilian hospital patients. "The Porto Ricans (sic) are the dirtiest, laziest, most degenerate and thievish race of men ever to inhabit the sphere... I have done my best to further the process of extermination by killing off eight and transplanting cancer into several more." — Dr. Cornelius Rhoads, Time Magazine's "Cancer-Fighter" hero.
David Rhodes- In 1964 MK-Ultra psychologist David Rhodes, took over executive director duties for the Human Ecology Fund. He was responsible for various psychotic drug experiments, including dosing unsuspecting people with LSD in aerosol form. The victims would be lured from bars, to CIA 'house parties', where they would be drugged and experimented on.
C.W. Rietdipk- The Function of the Paranormal.
Condoleezza Rice- Had a central role in the approval of the use of torture on specific detainees as chair of the NSC Principals meetings.
Alan Richardson- Close assoc. of Taft at UWA, LSD research, founding fellow of APS,
CSIRO.

Allan Richardson- Starting in 1954, Richardson accompanied R. Gordon Wasson, a banker and amateur ethnobotanist, on several expeditions to investigate and photograph the sacred mushroom ceremonies of the indigenous people of Mexico. shamaness Maria Sabina. Wasson and Richardson became some of the first Westerners to participate in the sacred Mazatec ritual called the velada .

John Rickman -Devise what later becomes known as the 'First Northfield Experiment'.Their (Wilfred Bion) attempt to create a 'leaderless' group therapy with soldier patients inspires an entire generation of post-war group therapists, especially among the Tavistock Clinic circles.

Mel Riley- Riley joined the operational unit beginning with Gondola Wish, and continued through Grill Flame until he was reassigned to Wiesbaden, Germany in 1981, where he served in an aerial reconnaissance unit. He returned to the remote-viewing unit in the summer of 1986.

Kenneth Ring PhD -Professor Emeritus of psychology at the University of Connecticut. He is a leading researcher in the area of near-death experience. He was one of the founders of the International Association for Near-Death Studies (IANDS).

Max Rinkel -In 1949, Dr. Max Rinkel organised the first LSD research in North America. Controlled experiments were carried out in Massachusetts, which results were later reported at the Annual Meeting of the American Psychiatric Association. Rinkel announced that LSD produced " a transitory psychotic disturbance" in normal subjects, which meant that mental disorders could potentially be studied in a controlled experimental setting. Rinkel was able to conduct this study due to a donation of LSD made by the vice-president of Sandoz, a Swiss multinational pharmaceutical company. Senior Research Consultant Massachusetts Mental Health Center

Sandra Robson- Chelmsford Private Hospital, Sydney, Australian.

Laurance Rockefeller- Provided original funding to the Human Potential Foundation. Rockefeller funnelled "$194,000 to Mack's Harvard- affiliated 'Center for Psychology and Social Change,' via the Washington, D.C. chartered 'Human Potential Foundation, Inc.' in the 1993-1994 period.

William G. Rodd- Comparative study of Chinese personality. The Human Ecology Fund, CIA. $3,000.

Dr. Ernst A. Rodin- Chief neurologist, psychosurgery, Lafayette Clinic, director of the project.
Ernst Rudin-A Swiss-born German psychiatrist, geneticist, eugenicist and Nazi, rising to prominence under Emil Kraepelin and assuming the directorship at the German Institute for Psychiatric Research in Munich. He argued for, designed, justified and funded the mass sterilisation and clinical killing of adults and children.
Chris Roe PhD- British parapsychologist and Professor in Psychology at the University of Northampton. His areas of research interest focus on psychological factors in anomalous experiences, and the psychology of deception.
Carl Rogers, Ph.D .-A Director of the Society for the Investigation of Human Ecology, a front organisation for the Central Intelligence Agency (CIA) MK-ULTRA Subproject 74 MK-ULTRA contractor. Rogers is on record as saying that he was aware that the Human Ecology Fund was a CIA front for covert funding of psychological research, and that he had no problem working for the CIA. As a board member, Rogers thought the money "was coming from intelligence funds as a cover for secret work that was going on." He said he was asked not to tell people where the money was coming from and saw helping to maintain the cover as part of his duty.
Karla Roman -Graphology research. She became Kurt Lewin's research assistant. She founded the Hungarian Institute for Handwriting Research; and she became the official forensic handwriting expert for juvenile delinquents and later for adult criminal courts.

Under Klara G. Roman - Book: The Psychology of Writing. The Human Ecology Fund, CIA. psychology. $2,000.
Cornelius Van Schaack Roosevelt III- Head of the CIA technical division, supervised Sidney Gottlieb, who brought a biological poison to Congo during the autumn of 1960. To friends and family, he said that his work for the CIA mainly involved creating devices to detect listening devices. He also mentioned that he took part as a subject in the CIA experiments on LSD (part of MK-ULTRA).
Theodore Roosevelt -Was a proponent of the sterilisation of criminals and the supposedly feeble-minded. In 1913, Roosevelt wrote a letter to eugenics supporter and biologist C.B. Davenport, saying that "society has no business to permit degenerates to reproduce their kind."

Dr Peter Roper- W as a psychiatrist employed by the Royal Victoria Hospital and a steadfast disciple of Dr. Ewen Cameron's "psychic driving" treatments which devastated so many lives. Even after Cameron was fired from the hospital, Roper continued the same experiments.

Roper blames "politics" in the psychiatric profession for Cameron's sudden departure "under a cloud" from Allan, in 1964, four years before the end of his contract.

"There was no farewell, no gift, he went - as it were - out the back door without any noise. All his research was tossed out."the Maudsley Institute, London.

Charles D. Rowley- W ho was a founder and principal of the previously mentioned intelligence front, ASOPA.

Callista Roy- A.J. Derbyshire told Dr (sic) Estabrooks in a letter dated December 7, 1935 that he could supply fifty children aged 9 to 12. This was to be facilitated by Sister Callista. Utica Community Chest.

Leonard Rubenstein- An experimenter who was paid directly by the human ecology society and worked with Dr. Cameron. Mr. Rubenstein said he had hoped that brainwashing techniques could speed up treatment of psychiatric patients eliminating bad feelings and attitudes.

Dr. Morton Rubin- T he psychological changes and the change in the brain activity as measured by the EEG in schizophrenic patients under the influence of sodium amytal, benzedrine, and cocaine.

Ernst Rüdin- A Swiss-born German psychiatrist, geneticist, eugenicist and Nazi, rising to prominence under Emil Kraepelin and assuming the directorship at the German Institute for Psychiatric Research in Munich. While he has been credited as a pioneer of psychiatric inheritance studies, he also argued for, designed, justified and funded the mass sterilisation and clinical killing of adults and children.

Donald Rumsfeld- H ad a central role in the approval of the use of torture on specific detainees as chair of the NSC Principals meetings. He approved 17 new techniques including stress positions, isolation, 20 hour interrogations, and nakedness.

Elena Rusalkina- Psychotechnology Research Institute in Moscow.."We worked out a program with (a psychiatric facility) to

study criminals. There's no way to falsify the results. There's no subjectivism."

Lord Bertrand Russell- Eugenics. He suggested the state issue colour-coded "procreation tickets". Those who dared breed with holders of a different-coloured ticket would face a heavy fine.

Charles Rycroft- Tavistock Clinic in London. John Bowlby, D. W. Winnicott.

N.I. Ryzhkov (Н.И.Рыжков)- Perspectives of torsion technologies wrote a resolution:

'Take steps to organise the works'

Dr Ryzl- "Parapsychology in Communist countries and especially the USSR occupies a strong position. We can expect it to be developed with determination." a leading figure in the application of scientific methods to the study of parapsychology. After he arrived in the United States, he worked with Doctor J,,B. Rhine at the Institute of Parapsychology in Durham, North Carolina, There Doctor Ryzl was especially noted for his original research on the influence
of hypnosis on ESP.

S

Maria Sabina-alias "Eva Mendez"- Magic mushrooms. R. Gordon Wasson. CIA who experimented with mushrooms as part of their infamous mind-control program, MK Ultra. Sabina later regretted having introduced Wasson to the practice, but Wasson contended that his only intention was to contribute to the sum of human knowledge, despite being funded by the CIA's mind control project MK-ULTRA.

Mr. Jack Sadler -Subject monitoring and data acquisition. 6571st Aeromedical Research Laboratory, Holloman AFB, New Mexico, and the Aerospace Medical Research Laboratories, Wright-Patterson AFB, Ohio. The research was conducted in support of Project 6302.

Eugene L. Saenger- From 1960 until 1971, Saenger, a radiologist at the University of Cincinnati, led an experiment exposing 88 cancer patients, mostly poor and 60% of whom were black, to whole body radiation. The experiment was funded by the DoD and had

absolutely no potential therapeutic value for the patients. Within a month of radiation, 21 of 88 people in the experiment died.
P. Sailaja- The Role of Test Preparedness in Psi Experiments.
Andrew Saint George- A veteran of the U.S. Army Intelligence, writes in the current edition of Esquire that CIA is expert at administering "chemical lobotomies." Agents have successfully forced "security risks" to ingest a chemical called Reserpine commonly disguised as vitamin capsules. The drug causes a rapid rise in blood pressure causing a person's brain to implode, turning the victim into a vegetable.
Dr. Jonas Salk- A federally funded study begun in 1942 injected experimental flu vaccine in male patients at a state insane asylum in Ypsilanti, Mich., then exposed them to the flu several months later.
Bernard Saltzberg- Ph.D.-Served with the United States Air Force, 1943-1946. Member National Institutes of Health (member of advisory study section), National Institute of Mental Health.Texas Research Institute of Mental Science (TRIMS) for use in research concerned with detecting EEG properties which correlate with particular abnormalities such as uncontrolled violent behaviour, learning disabilities, and epilepsy.
Prof. G.A.Samoilov (Г.А.Самойлов)- International Association for the Study of Psychotronics, Ministry of Internal Affairs. Russia.
Colonel Murray Sanders -A microbiologist and member of America's military centre for biological weapons, arrived in Yokohama, Japan to investigate Japanese biological warfare activity. General Douglas MacArthur made a deal with the Japanese informants, in which the physicians would obtain immunity if they gave only America their data. (Unit 731) Dr. Sanders, an microbiologist, described the information as "extremely helpful" and "obtained at a relatively low cost". Technology created by the Japanese was incorporated in bioweapon facilities such as Fort Detrick.

Sanders utilised protocols non-sanctioned by Independent Ethics Committees and openly administered detoxified snake venom neurotoxin or Modified Neurotoxin (MNT) to patients with poliomyelitis and later used it in Amyotrophic Lateral Sclerosis (ALS).
Ronald Sandison -Met Albert Hoffman, and was introduced to the idea of using LSD at Powick Hospital. Sandison opened the world's

first purpose-built LSD therapy clinic the following year. The unit, located on the grounds of Powick Hospital.

In 2002 the National Health Service agreed to pay a total of £195,000 in an out-of-court settlement to 43 former psychiatric patients whom Sandison had treated.

D. V. Siva Sankar- LSD experiments on Children with Autism.

Ronald Sandison (psychiatrist) - Thomas M. Ling and John Buckman. These three worked in England at both the Chelsea Clinic in London and Gatwick Hospital in Worcestershire, outside of London. Powick's Deputy Superintendent, Dr Ronald Sandison was taken to visit Sandoz Pharmaceutical Laboratories in Basel, where he learned of the research being conducted there with lysergic acid diethylamide (LSD). He was a former trainee at South London's Maudsley Hospital, where William Sargant was working for a time, and at Tavistock Clinic.

Margaret Sanger -Opened the first birth control clinic and she aligned her fight for contraception with the eugenics movement. She stated that "birth control is nothing more or less than the facilitation of the process of weeding out the unfit (and) of preventing the birth of defectives."

A Rockefeller grantee, included a chapter called "The Cruelty of Charity" in her 1922 book The Pivot of Civilization, arguing that America's charitable institutions are the "surest signs that our civilization has bred, is breeding and is perpetuating constantly increasing numbers of defectives, delinquents and dependents."

Donald E. Santarelli- Law Enforcement Assistance Administration. (LEAA) "to the best of our knowledge," his agency had not funded any psychosurgery—a process in which tiny portions of tissue deep in the brain are destroyed through surgery, electricity, radiation or ultrasound to erase symptoms of otherwise uncontrollable behavioural and emotional disorders.

Theodore Sarbin, Ph.D- Co-author with West. "Much of Dr. Sarbin's work has involved hypnosis, for which he has received awards from the International society for Professional Hypnosis, the Society of Clinical and Experimental Hypnosis, and the American Psychological Association." Professor of psychology and criminology at the University of California, Santa Cruz as of 2002.

Jack Sarfatti- Worked with Dr. Andrija Puharich developing "Space Kids" as covert operatives for the U.S. Government. Physics/Consciousness Research Group.
Dr. William Sargant-A t St. Thomas Hospital , London , and at Belmont Hospital ,Surrey, who was also involved with the Intelligence Services and experienced much of his work. Patients without their consent, causing long-term damage. British end of MK-ULTRA. Dr. Sargant was president of the psychiatry section of the Royal Society of Medicine, 1956-57, and was a founding member of the World Psychiatric Association. Sargant used narcosis (sleep treatment) to overcome a patient's refusal of electroconvulsive therapy, or even deliver it without their knowledge. He advocated the eradication of memories from the mind by physical means rather than teasing them out by Freudian analysis.
Carl L. Sargerirt- Experimenter Psi-Effects: I. Retroactive Expectancy Effects. A Covert Test of Psi Abilities of Psi-Conducive and Psi-Inhibitory Experimenters.
David Saunders- Headed within the CIA mind control Project MK-ULTRA, Subproject 130 denominated "Personality Theory." Columbia Univ. John Gittinger.
Dr. Charles Savage- Was appointed by Dr. Theodor Benzinger. It focussed on the identification and testing of drugs for use in the interrogation and the recruitment of agents. The search included laboratory experiments on both animal and human subjects.
Jonas Savimbi -Leader of the National Union for the Total Independence of Angola (UNITA) in the Angolan Civil War. Project Coast, anti-fertility work.
Marshal E.Y. Sawicki- EMFs may cause acoustic hallucination ('radiosound') and reduce
the sensitivity of humans and animals to some other stimuli, to change the activity of the brain (especially the hypothalamus and the cortex).
Dr. Schapitz- Wrote that the spoken words of a hypnotist could be conveyed directly into the subconscious portion of the brain by means of modulated electromagnetic energy. He believed that he could use this method to program the subconscious without employing any technical devices for receiving or transcoding the messages and without the person exposed having any chance to control the information input. This technology, he said, could be

used to induce hypnotic states in subjects at a distance; and by using words modulated on the microwave carrier frequencies, human subjects could be conditioned to perform various acts. He further proposed a research program to develop this technology. He also suggested recording the brain wave patterns induced by various drugs, then beaming these patterns via microwaves at test subjects in an attempt to cause mental disruption in the subject appropriate to the prerecorded drug. Dr. Schapitz's research was funded by the U.S. Department of Defence.

Dr. Edgar Schein- M.I.T. psychology professor. He became one of the western world's foremost authorities on psychological coercion by studying the methods used by the Communist Chinese and North Koreans on American prisoners during the Korean War. Dr. Schein's ideas on human experimentation were put into action and overseen by federal prison psychiatrist Dr. Martin Groder. Suggested using Chinese Thought Reform on prisoners as a policy. (James V. Bennett)

Carl Schleicher (MRU)- Mankind Research Unlimited (MRU) And Mankind Research Foundation (MRF).

Marilyn Schlitz PhD- An anthropologist and researcher into consciousness and healing. She is President and CEO of the Institute of Noetic Sciences (IONS). She is a past President (1999-2000) of the Parapsychological Association. Transcontinental Remote Viewing: A Re judging.

Dr. Elizabeth Schneidhuber- T he psychological changes and the change in the brain activity as measured by the EEG in schizophrenic patients under the influence of sodium amytal, benzedrine, and cocaine.

Fini Schulsinger- Collaborated with Mednick constructing a study of 207 children with schizophrenic mothers, and a control group of 104 children without schizophrenic mothers, including Wennick. He sought to ascertain how many would develop schizophrenia and how it might manifest. Over a third of the participants were orphans.

Mr. John Scott- Supervisor for Mr.Stephen Abrams' Ph.D.

Joseph Schoolar , Ph.D., M.D .-Director of TRIMS.

Sybo A. Schoutjen- Coding of Targets in a Clairvoyance Task.

Dr. Walter Schreiber -Air Force School of Medicine at Randolph Field in Texas. "Schreiber had assigned doctors to experiment on concentration camp prisoners and had made funds available for such

experimentation." Dr. Walter Schreiber, whose experiments on concentration camp inmates "usually resulted in a slow and agonising death." Project Paperclip, Schreiber had been Camp King's chief doctor until he was hired by the Air Force to its School of Aviation Medicine. But in 1952 Drew Pearson exposed Schreiber's Nuremberg sheet listing his crimes, at which point the Joint Intelligence Objectives Agency arranged his visa and a job in Argentina. On May 22, 1952, he was flown to Buenos Aires. Henry Beecher described Schreiber as an "intelligent and helpful" German physician.

Mr David Schriner- Principal Engineer of Directed Energy Studies with Electronic Warfare Associates and recently retired as an engineer with a naval weapons testing facility, talked about the difficulty in building an RF weapon and about the terrorist threat.

Helen Schucman- Comparative learning behaviour of different personality types. Human Ecology Fund, CIA.

Jay Schulman, M.A .-MK-ULTRA contractor-To interview Hungarian refugees regarding Sociology of the Communist system in the throes of revolution.

Dr. John Schwab- F ounder of the Special Operations Division at Fort Detrick, Maryland.

Gary Schwartz PhD- Psychologist and psychical researcher. He is a Professor and Director of the Laboratory for Advances in Consciousness and Health at the University of Arizona.

Stephan A. Schwartz -Senior Samueli Fellow for Brain, Mind and Healing at the Samueli Institute, and a Research Associate of the Laboratories for Fundamental Research. He is a pioneer of research into remote viewing, especially its applications in archaeology. A former Navy officer and psychic researcher. Schwartz helped procure a submarine for a July 1977 experiment with SRI. These experiments included some on behalf of Dale Graff of the Air Force.

Dr. Ralph Schwitzgebel- Concord Prison Experiment.

Dr. George Scott -A staff psychiatrist for the Canadian Federal Corrections. teamed up with shrinks from Allan Memorial Institute, including the notorious Ewen Cameron, to launch a variety of drug, electroshock, sensory deprivation and pain tolerance experiments, using prisoners and patients at mental hospitals as guinea pigs. The LSD for some of the experiments as well as funding for the research was provided by the CIA and the Canadian Defense Department.

Robert A. Scott- Human Ecology Fund. article entitled 'cultural values and attitudes toward death'. This paper was chiefly based on Howard's research into bereavement in Rotuma, which was sponsored by the National Institute of Mental Health (NIMH).
Alden Sears- MK-ULTRA hypnosis. University of Minnesota, University of Denver
Years: 1953-1956 Successful demonstration of "potentialities of hypnosis as a tool of the clandestine services". Research in hypnosis was to determine if: hypnosis could be used as a memory enhancer, a learning aid, a polygraph deceiver, etc. Also,research into susceptibility of certain personality types to hypnosis.
Saul Seels- Creation and publication of: Bioelectrics Directory. The Human Ecology Fund, CIA. biology. $2,500. (Helen F.)
Martin Seligman- University of Pennsylvania for resilience training, or teaching soldiers to better cope with the psychological strain of multiple combat tours. James Mitchell, attended a small meeting at Seligman's house along with Kirk Hubbard, then the CIA's director of Behavioural Sciences Research. The New York Times has described this meeting as "the start of the program." Seligman made a three-hour presentation at the Navy's SERE school in San Diego in the spring of 2002. Fitness Program' in 2008. This program was a blatantly unethical research project that used the guise of a fitness program to hide its true intentions.(effectively threw away the soldiers' right to informed consent and turned them into human-guinea pigs. In this experiment, soldiers were taught how to think and respond more obediently with the aid of Positive Psychology, rather than use their own critical thinking. The U.S. Army admits the purpose of this was an attempt to make an 'indomitable army'.

Dr. Martin Seligman went to the IOP at Maudsley on a 'sabbatical'. It was here he was introduced to Eysenck and worked with IOP staff to study phobias and obsessions while developing his Learned Helplessness theory which later became the basis of the CIA's 2001 torture program.

Seligman is most famous for his work in the 1960s in which he was able to psychologically destroy caged dogs by subjecting them to repeated electric shocks with no hope of escape. The dogs broke down completely and ultimately would not attempt to escape

through an open cage door when given the opportunity to avoid more pain. Seligman called the phenomenon "learned helplessness."

I ntroduced Positive Psychology in his first address as President of the
American Psychological Association with his fellow APA member, Dr. Antony Kidman in
Attendance. Three years later, Seligman would use his life's research to develop the
torture program with the CIA and SERE (Survival, Evasion and Resistance and Escape).SERE is an organisation which was developed using MK-ULTRA research from the Kubark
Manual and the Phoenix Program.U.S. Military paid Seligman over $30 million dollars to create the 'Comprehensive Soldier.

Saul B. Sells- A professor of social psychology, convinced the CIA that he would be able to build a very special electroencephalography machine that would be able to analyse brain waves. Texas Christian University, MK-ULTRA contractor.

N.N. Semenov- Department of Kinetics Chemical and Biological Processes" of the Institute of Chemical Physics, Moscow.

N.N. Seminov- Vice President of the Academy of Sciences. Russia study of paranormal
Phenomena.

G.A. Sergeev (Г.А.Сергеев) -He worked at that time in the Popov Higher Naval Academy of Radio Electronics in the field of hydroacoustics. Microlepton field.

Dr, Genady Sergeyev- Psychokinesis. Believes Kirlian photography may uncover the mechanism of PK. Sergeyev is a prominent mathematician for the Soviet military. Sergeyev has devised important mathematical and statistical methods for analysing the EEG which allowed parapsychologists to follow and depict the actions of telepathy in the brain.

Dr. Joseph C. Sharp- An experimental psychologist at Walter Reed Army Institute of Research, was able to use equipment that had the capacity to convert sound waves into microwave radiation that enabled him to transmit threatening voices into a subject's head. The first un-classified successful transmission of the human voice directly into the skull of a living person was performed by Dr.

Joseph C. Sharp, of the Walter Reed Army Institute of Research in 1974.

George Bernard Shaw- Eugenics. "The only fundamental and possible socialism is the socialisation of the selective breeding of man". Later he mused that "the overthrow of the aristocrat has created the necessity for the Superman ". Shaw described the Jews as "the real enemy, the invader from the East, the ruffian, the oriental parasite".

Peter Sheehan- MK-ULTRA hypnosis research. Sydney Uni, Orne's Lab, Citizens Against False Accusations of Sexual Abuse. Institute of the Pennsylvania Hospital and University of Pennsylvania. Hypnotism experiments with Martin Orne.

Muzafer Sherif- University of Oklahoma, MK-ULTRA contractor-MK-ULTRA Subproject 102: Behaviour of naturally formed groups of adolescent boys in Texas and Oklahoma as a function of group membership and environment. Middle Grove in upstate New York, with Rockefeller Foundation funding. Sherif recruited underprivileged 11-year-old boys from poor families with offers of a free summer camp. Studies of small group behaviour. Human Ecology Fund, CIA.

Doctor Ishii Shiro- Unit 731 Japan human experiments WWII.

Ronald E. Shor, Ph.D. - Hypnosis experiments with M. T. Orne, And D. N. O'connell. The polygraph was used to record data for Dr. Shor on the physiological responses to pain while under hypnosis.

Francisco Silva- (Cuban psychiatrist who allegedly put Lee Harvey Oswald up in his home and got him a job at the hospital where Silva worked prior to the assassination),

Dr. Van Murray Sim- Director of the Army's program of testing drugs on humans for 22 years. Set up the Medical Research Volunteer Program and founded Edgewood Arsenal's psycho chemicals research. served at Edgewood Arsenal with Army Psychiatrist James S. Ketchum. Sim, the "Mengele of Edgewood " was reckless and egocentric. He went on to conduct "practical" interrogation experiments overseas. Was criticised for failing to provide follow-up medical care for the 7,000 soldiers who participated as test subjects. Edgewood project's founder and director.

Dr. Alex Sinclair- Military Psychologist and MK-ULTRA Doctor. Sinclair was sent to PNG to study the psychological effects of Kuru.

He later gave a speech at the Papua New Guinea Scientific Society titled "Forcible Indoctrination". Sinclair was involved with ECT and DST brainwashing methods and he was a supporter of MK-ULTRA Doctor, Harry Bailey.

George Singer- MK-ULTRA hypnosis research.

Margaret Thaler Singer , Ph.D. -Psychiatrist, long-term associate of West and Orne. Adjunct professor emeritus of psychology at the University of California in Berkeley as of 2002.

Ann Sipe -Oak Ridge Defence Programs.

Eliot Slater -Founder of the Psychiatric Genetics Unit at the Institute of Psychiatry in 1959 and also held a post at the Institute of Neurology. Worked with William Sargant, M.D. at the Maudsley Hospital in London. Was the Vice-Chair of the British Eugenics Society and had a long history of working closely with MK-ULTRA Doctor, William Sargant.

P.A. Slobodyanik- Efforts toward the aimed telepathic manipulation of human consciousness.

Igor Smirnov- Soviet-era mind control research as well as an obscure field of human behaviour study he called " psychoecology ". referred to as a father of psychotropic weapons. "create" human-geniuses, who would be capable of becoming great scientists, magnificent inventors. His first top-secret experiment in psycho-reconnaissance was carried out in 1984.

Viktorovich Smirnov (Russian: Абакумов Игорь Викторович, Смирнов Игорь Викторович) A controversial Russian scientist best known for his role in Soviet-era mind control research as well as an obscure field of human behaviour study he called " psychoecology ".

The Moscow Academy of Medicine demonstrated for the U.S. secret services and FBI experts a device which was capable to subliminally implant thoughts in people's minds and in this way control their actions. Dr. Igor Smirnov, a Russian expert on non-lethal weapons, was brought to the US for a series of meetings in Virginia in 1993. The meetings were attended by representatives of the CIA, DIA, FBI, and ARPA, civilians included representatives of the NIMH and GMC's Director of Biomedical Research. Smirnov and his non-lethal weapons technology was brought to Waco during the Branch Davidian Siege in 1993 in hopes of using them on David

Koresh, but a software problem reportedly made this impossible, and Smirnov could not guarantee its safety.

Dr. Frank Fremont- Smith- Co-director of the World Federation with J.R. Rees. Executive with the Josiah Macy, Jr. Foundation, president of British General Rees's World Federation of Mental Health, known together with Lawrence K. Frank as motivators of the Macy conferences. The Use of LSD in Psychotherapy and Alcoholism.

Captain Paul Smith- Center Lane. Joined the operational remote viewing unit at Ft. Meade in 1983. Before joining, he was with an INSCOM operations unit in Germany.

Dr. Robert Smith- TRIMS.

John R. Smythies -Worcester Foundation for Experimental Biology, associate of Pfeiffer. John Smythies and cultivated a keen interest in chemically induced reactions in the human body. With the aid of organic chemist John Harley-Mason, Smythies and Osmond examined the chemical properties of mescaline, the active agent in peyote. Nearly 2 years of research led them to conclude that "mescaline caused symptoms in normal people that were similar to the symptoms of schizophrenia"

Igor V.A. Sokolova (В.А.Соколова) -Describes experiments that were carried out in 1984-1987, which are supervised by the USRR's Ministry of Health.

O. M. Solandt- Chairman of Canada's Defence Research Board. "I knew of the experimental depatterning procedures used by D. Ewen Cameron. In the early 1950s, the wife of one of my associates sought medical treatment from Cameron at the Allan Memorial Institute. She was depatterned and after seeing her I knew that this kind of work was something the Defence Research Board would have no part in. It was my view at the time and continues to be that Cameron was not possessed of the necessary sense of humanity to be regarded as a good doctor. My views of Cameron and the depatterning procedures were known to him, and I let it be known through Dr. Morton that I would not look favourably upon any application by Cameron to the Defence Research Board for psychiatric research. Cameron never applied for Defence Research Board grants to fund psychiatric research and would never have received such support had he applied." -from affidavit on Donald Ewen Cameron and Project

MK-ULTRA at Allan Memorial Institute in conducting unethical human subject research.

Philip Solomon, MD -One of the original researchers in Sensory Deprivation and founded the College Mental Health Center in Boston in 1968.

Peter Van Sommers -A University of Melbourne student who received a 1958 Fulbright Scholarship to become the first student in Experimental Psychology at Harvard's Social Relations Department. At Harvard, Van Sommers placed electrodes in the brains of rats to create lesions used to control their behaviour. Harvard retained Van Sommers until 1961, after his Fulbright scholarship expired, because his research was valuable to DoD (Department of Defence) projects. Van Sommers also spent time at the University of Pennsylvania which offered the world's most cutting-edge psychology research laboratory. In the late 1960s, Van Sommers visited Aldous Huxley's Esalen Institute in Big Sur, California. Van Sommers would go on to become Assoc. Prof. of the School of Behavioural Sciences at Macquarie University – the same year that Dr. Robert E. Goodnow – Dr. John W. Gittingers' close associate, came to Macquarie.

Major General Harry Soyster- Who had a reputation as a much more conservative and conventional intelligence officer. MG Soyster was not amenable to continuing paranormal experiments and the Army's participation in Project Stargate ended during his tenure.

Francis Speed- Human Ecology Fund. Raymond Prince and Francis Speed's film Were ni! he is a madman : a study of the management of psychiatric disorders by the Yoruba of Nigeria which documented the treatment of Yoruba mental disorders .

Dr. Herbert Spiegel- Pioneer in American psychiatry and the field of hypnosis, which he first started using as an army psychiatrist posted at Fort Meade, Maryland. Married to Dr. Marcia Greenleaf. Dr. David Spiegel works at Stanford University in Ca. Stanford is known for its work with the government on mind control projects.

Ernesto Spinelli- The Effects of Chronological Age on GESP. (General Extrasensory Perception)

Randall Spivey- S erved as an executive in the Department of Defense and oversaw all hostage survival training programs for DOD from 1997 to 2002. He was later involved with the Fort Sherman Institute, a short-lived anti-terrorism project at North Idaho

College, and then started a firm called RS Consulting, teaching governments and companies strategies for surviving hostage situations. Aldrich also worked with RS Consulting. (Mitchell, Jessen and Associates)

James Sporleder- Mitchell Jessen and Associates. Sporleder was a former official with the secretive JPRA, which oversees the SERE program for which Mitchell and Jessen both worked.

Joseph Standford- The effect of "normal* vs. relaxed states of consciousness on ESP scoring using a GESP feedback testing device.

Dr. Leo Stanley- Chief Surgeon of the San Quentin State Prison from 1913 to 1951. He was most notable for performing unethical human experiments on inmates during his tenure. He focused on rejuvenating their masculinity through two bizarre methods: sterilisation, and by implanting them with "testicular substances" from executed prisoners or, in some cases, livestock.

B.J. Steilberg- "Conscious Concentration" versus "Visualisation" in PK Tests. Target Preference and Position Effects in a PK Investigation with Ten Subjects.

Ray Stephenson- To interview Hungarian refugees regarding Sociology of the Communist system in the throes of revolution-MK-ULTRA contractor.

Richard M. Stephenson, Ph.D .-A sociology professor at Rutgers, had conducted studies on Hungarian refugees for the CIA.

Ian Stevenson -A Canadian biochemist, psychiatrist and parapsychologist. Prior to his retirement in 2002, he was head of the Division of Perceptual Studies at the University of Virginia. **I** nspired by a meeting with Aldous Huxley, he became a pioneer in the medical study of the effects of LSD. parapsychology. Was a pioneer in research into children remembering previous lives.

Dr. Stone- Berkeley (1) Studies in whole-body radiation of human subjects by external and internal radiation.

(2) Studies on the metabolism of radioactive iodine in animals and man.

(3) Joint studies with Dr. Joseph G. Hamilton to evaluate the therapeutic applications of the fission products and the fissionable elements.

(4) Exploration and therapeutic application of other radioactive elements and compounds.

Shepard Stone- Director of International Affairs at the Ford Foundation, serving from 1952 to 1967, during which time he worked closely with the CIA in funding cultural projects around the world. He also repeatedly initiated support for the Free University in Berlin.

Leon Stover- Aspects of upper class culture among the internationalised elite of Japan. The Human Ecology Fund, CIA. anthropology. $3,000.

Strakhov- Has investigated the effect of high intensity noise (95-100 db , 1500-3000 Hz) on EEG patterns in human subjects.

Dr. Ted Strehlow- Contributed to the 'Aborigines Project' at ASSA with contributions from MK ULTRA Doctors Ronald Taft and John Phillip Sutcliffe. The project was headed by Charles D. Rowley who was a founder and principal of the previously mentioned intelligence front, ASOPA.

H. A. M. Struik -MK-ULTRA contractor.

Myron Stolaroff- Alexander M. Poniatoff founded, in 1944, the Ampex company, using his initials, A.M.P., plus "ex" for "excellence" to create the name. Concentrated on LSD research, founding the International Foundation for Advanced Study, and leading seminars at the Esalen Institute.

Arthur Stoll- O bserved that people diagnosed as "psychotics" had a stronger tolerance for LSD and that the effects of the drug were similar to the symptoms expressed by psychotics themselves.

Werner Stoll- A psychiatrist at the University of Zurich. Stoll administered doses of LSD to a number of subjects, "normal" volunteers (including himself) and patients, among the latter six schizophrenic patients in his clinic. He evaluated the effects of the drug as a delirium of an "acute exogenous reaction type, therefore one of the basic forms of mental illness".

Marie Stopes- Eugenics. She was a life member of the Eugenics Society. In 1921 she founded her own Society for Constructive Birth Control and Racial Progress (CBC). Stopes attended the Third Reich's International Congress for Population Science in Berlin in 1935, two years after Hitler became Chancellor of Germany, and long after his racist and anti-Semitic views had become well-known to the world.

Samuel Stouffer- Chairman of the Laboratory Social Relations group at Harvard University. Led the research branch of the U.S.

Army's information and education division. theory of relative deprivation.

General Albert Stubblebine- In the early 1980s he was responsible for the United States Army Intelligence and Security Command (INSCOM), during which time the remote viewing project in the US Army began. Head of the Electronics Research and Development Command (ERADCOM) became the commanding officer of INSCOM.

Stubblebbine began a program called the "High Performance Task Force ", a series of methods to improve his officer's performance. These ranged from the neuro-linguistic programming of Tony Robbins to the hemi sync tapes of the Monroe Institute, where Stubblebine often sent his officers. Following an incident involving an officer having a psychotic episode at the Monroe Institute, Stubblebine resigned in 1984. He was replaced by Major General Harry Soyster.

Dr. Hubertus Strughold- Worked in MK-ULTRA as well as at NASA. B ecame director of the Physiological Institute at Heidelberg University and also began working on behalf of the US Army Air Force. He was brought to the United States in 1947 as part of Operation Paperclip. a physiologist and medical researcher, headed the German Air Force Institute of Aviation Medicine, known for its torturous medical experiments on inmates from the Dachau concentration camp. Strughold claimed ignorance of any such activity until after the war, yet he appeared among a list of 95 doctors at an October 1942 conference discussing their findings.

A. Arthur Sugerman- "Quantitative Electroencephalographic Analysis of Naturally Occurring (Schizophrenic) and Drug-Induced Psychotic States in Human Males," Goldstein, Leonide, Henry B. Murphree, and Carl C. Pfeiffer.

Robert Suggs- Anthropology $700. The Human Ecology Fund, CIA. Aspects of Marquesan behaviour.

John Philip Sutcliffe -Australia, Prof. John Sutcliffe was the driving force behind MK ULTRA Hypnosis research coming to Australia at The University of Sydney through his connections with Martin Orne. Prior to this, Sutcliffe was in contact with Eysenck who was Director of Subproject 111 at the time. Phil Sutcliffe received the first University of Sydney PhD for his thesis Hypnotic Behaviour:

Fantasy or Simulation? Close assoc. of A.G. Hammer, Harvard, Key hypnosis and multiple personality researcher at Sydney University.

John ("Jock") D. Sutherland- Tavistock Clinic in London. R.D. Laing.

Suvarov- S tudied the speed and intensity of acoustic and visual reactions in subjects exposed to noise from thirty minutes to four hours. Using 70 to 90 db noise intensities in a soundproof chamber, the investigators recorded vocal and motor reaction response times after varying exposure durations. Prolonged (3-4 hour) testing at either db level caused fatigue of the central nervous system, reduced effective response, and disturbed relation- ships between motor responses and strength of stimulus.

A.M, Svyadoshch- Adopted some of Lozanov' s teaching techniques , and appeared to search for more conclusive results in the use of autosuggestion. As a result of a special four month training session, 40 out of 50 people learned how to produce, at will a significant change in their own skin temperature.

Ingo Douglas Swann- T he co-creator, along with Russell Targ and Harold E. Puthoff, of remote viewing, and specifically the Stargate Project.

Robert Swanson -Co-founder of Genentech, the first company to make full use of the new technology of genetic engineering. (Herbert Boyer)

Dr. William Sweet -P articipated in both brain electrode implant experiments and the injection of uranium into medical patients at Harvard University. Neurosurgeon, co-author with Delgado.

T

Ronald Taft -MK-ULTRA Doctor. CIA, Human Ecology Fund, Personality Research.

I.E.Tamm- USSR's Academy of Sciences. Telepathic experiments.

Russell Targ- Targ joined the Stanford Research Institute (SRI) in 1972 where, along with Harold Puthoff and Ingo Swann, he conducted the basic research for what would become the Coordinate Remote Viewing protocol. He later worked with Puthoff on the US Defense Intelligence Agency's Star Gate/Grill Flame project.

Charles Tart- Tart has taught at the California Institute of Integral Studies and has led seminars at the Esalen Institute. He studied electrical engineering at MIT and received a PhD in psychology from the University of North Carolina. He taught humanistic and experimental psychology at the University of California, Davis. Has served as Instructor in Psychiatry at the University of Virginia Medical School, and as Lecturer in Psychology at Stanford University.

His work has dealt with parapsychology, sleep and dreaming, hypnosis, and psychoactive drugs.

V. Tatur (B.Татур)- Axion field.

Karl Tauboeck- A Nazi expert on sterilisation drugs and a chief plant chemist at I.G.
Farben.

Dr. Temple -Radiation experiments, Texas.

George Tenet- Had a central role in the approval of the use of torture on specific detainees as chair of the NSC Principals meetings.

Lewis Terman- The Genetic Studies of Genius. Best known for his pioneering work in individual intelligence tests as well as for his revision of the Stanford-Binet IQ test. joined the Human Betterment Foundation, a Pasadena-based eugenics group founded by E. S. Gosney in 1928 which had as part of its agenda the promotion and enforcement of compulsory sterilisation laws in California. Terman defined the primary benefits of this test, now called the Stanford Binet, as "curtailing the reproduction of feeble-mindedness and in the elimination of an enormous amount of crime, pauperism, and industrial inefficiency"Henry Goddard and Robert Yerkes.

Hans-Lukas Teuber- Was a professor of psychology and head of the psychology department at Massachusetts Institute of Technology. He was one of the founders of neuropsychology and studied perception. He coined the term double dissociation. PhD in social psychology at Harvard University, under the mentorship of Gordon Allport.

Michael A. Thalbourne- Two Long-Distance ESP Drawing Experiments Between Austria and Iceland.

Col. Johan Theron- C ounterintelligence officer in the Special Forces, testified at the Basson trial that he received muscle relaxant pills from Basson in December 1982, and killed approximately 200

SWAPO prisoners, then dumped their bodies from aeroplanes out to sea. (Project Coast)

William N. Thetford, Ph.D. -Co-author with Gittinger, MK-ULTRA contractor. SubProject 130: Personality Theory, while at Columbia University, between 1971 and 1978. His
A colleague on this project was David Saunders.

Comparative learning behaviour of different personality types. Human Ecology Fund, CIA.

Ed Thompson- Assistant Chief of Staff for Intelligence (ACSI), US Army, 1977-81. During this time, he was briefed by SRI on the remote viewing program. After having tried it himself, viewing a Masonic temple near the target train station, Thompson set up Project Grill Flame at Fort Meade.

Kay Thompson- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Josephine Hilgard, Herbert Spiegel, John Hartland, Per-Olaf Wikstrom, P. Brugnoli, and Erika Fromm.

Dr. Samuel Thompson- P sychiatrist, physiologist, pharmacologist, and Navy Commander, the men studied ways in which to produce amnesia in subjects. (Camp King)

Wendy A. Fairfax-Thorn- MK-ULTRA hypnosis research. MK-ULTRA Subproject 84

A student in Phil Sutcliffe's Psychology department, studying hypnosis and multiple personality disorder with Subproject 84 psychologist Frederick J. Evans. Wendy Thorn completed a University of Sydney thesis on posthypnotic amnesia, then presented her paper Hypnosis and Suggestibility to the ABBPS. In 1961, the ABBPS financed a post-graduate research scholarship to ANU (Australian National University) for Wendy Thorn to study the placebo effect. Her resultant 1962 ANU thesis noted: 'This study would have also lacked a great deal without the information, advice and materials supplied by Professor H.J. Eysenck (director of MK-ULTRA Subproject 111).

Edward Tilton - President of Silent Sounds, Inc. "All schematics, however, have been classified by the US Government and we are not allowed to reveal the exact details... ... we make tapes and CDs for the German Government, even the former Soviet Union countries! All with the permission of the US State Department, of course... The

system was used throughout Operation Desert Storm (Iraq) quite successfully."

Dr Todrick- Department of Experimental Psychiatry at Birmingham University also received substantial funding via the Rockefeller Foundation during the early 1950s for a five-year research programme. Dr Elkes was appointed as head of the programme.

Dr. Klare G Toman- Handwriting Analysis – Complete an illustrated psycho-lexicon of writing and the written word. (This study on graphology was then 80% complete, and was later published with acknowledgement of the Society for Investigation of Human Ecology support. Possibly Dr. Klare G Toman. Human Ecology Fund-Handwriting Psycholexicon-Graphology (?)

Dr. I. F. Tomashevsky -On experiments in remote control of the brain.

Dr. Erich Traub -T he former head of Nazi Bioweapons projects. Department of Agriculture's Biological Warfare Labs at Plum Island, N.Y.

Ray Treichler- Develop a temporary incapacitatant drug ("Knockout drug") and to define mechanisms involved in producing involuntary sleep and related unconscious states. Testing was conducted on animals.To provide services of a very sensitive nature to conduct extraction and identification techniques of drugs, toxins and biological entities from human tissues.

Eric Trist- W orked for Tavistock. The University of Pennsylvania's Wharton School. Eric Trist was one of Bowlby's war colleagues. Trist's primary assignment was to expand Tavistock's operations in the United States.

Alexander Trofimov- Novosibirsk, Siberia, under the aegis of the Russian Academy of Sciences, the Institute for Scientific Research in Cosmic Anthropoecology (ISRICA) Experiments on esoteric aspects of human perception of time and space, specifically investigating telepathic communications not only between human subjects but also between human subjects and inanimate objects and between human subjects on earth and unidentified forces in the cosmos.

Dr. Trout- Radiation experiments, Texas.

K.E. Tsiolkovsky- "In the coming era of space flights, telepathic abilities are necessary. While the space rocket must bring men toward knowledge of the grand secrets in the universe, the study of

psychic phenomena can lead us toward knowledge of the mysteries of the human mind. It is precisely the solution of this secret which promises the greatest achievements."

Mary Tudor- An Iowa orphanage. Some call her "the Monster." The experiment was designed by Tudor's professor, Wendell Johnson. Eight of the orphans Tudor badgered about their speech -- even if it was nearly flawless at first -- became chronic stutterers.

S.Y. Turlygin -Turlygin was a well known expert in the field of high frequency EM emission, thus he possessed an excellent understanding of the subject of experiments Turlygin carried out a series of telepathic experiments with D.G.Mirza (Д.Г.Мирза). opened a laboratory for the study of parapsychology in 1955. After the death of Turlygin in 1958, D.G.Mirza became a head of the laboratory.

James Tyhurst -In 1951 had been part of a committee providing oversight on Projects ARTICHOKE and BLUEBIRD. The Canadian Defence Research Board also provided money to Tyhurst, who did research on the effects of LSD on over 300 patients at Hollywood Hospital in Vancouver. Allan Memorial Institute, Hollywood Hospital in Vancouver.

U

Montague Ullman, MD -A n American psychiatrist and psychoanalyst. He was a leading researcher on dreams and dreaming and established a sleep laboratory at the Maimonides Medical Center, New York which investigated telepathic experiences in dreams.

Ralph Underwager -An early member of the group's professional advisory board, let the paedophile agenda slip when he told British reporters that, according to so-called "scientific evidence," 60 percent of all women who were molested as children believed the experience was "good for them." Both he and another advisory board member, Holida Wakefield, have publicly described pedophilia as a positive lifestyle choice.

Jessica Utts PhD - Professor of Statistics at University of California, Irvine. She is known for her contributions to the statistical analysis of parapsychological experiments.She has

published several articles on the application of statistical methods to parapsychological research and has direct experience with the remote viewing research program.

V

Maelor Vallance- Electrical aversion therapy, Ralph McGuire.
Mario Varvoglis PhD -A parapsychologist and Director of the Institut Métapsychique International (IMI) in Paris. His research includes experimental studies of ESP using the Ganzfeld procedure, and of micro-PK using random event generators (REG).
Leonid L. Vasilev- Parapsychological. A professor of physiology at the University of Leningrad wrote in a paper about hypnotism: "As a control of the subject's condition, when she was outside the laboratory in another set of experiments, a radio set was used. The results obtained indicate that the method of using radio signals substantially enhances the experimental possibilities."

Experiments in Distant Influence He also wrote the article "Critical Evaluation of the Hypnogenic Method.

Vasiliev worked as a professor of physiology at Leningrad University. He helped establish the first parapsychology laboratory at Leningrad. Vasiliev conducted experiments with subjects into telepathy and reported successful results.
Dr. Jack Verona, The Raven- W as the head of the DIA's Scientific and Technical Intelligence Directorate, who simultaneously ran a DIA mind-control program called "Sleeping Beauty" that dealt with the offensive use of microwave weapons. Dr. Jack Verona of the United States Defence Intelligence Agency (DIA) placed the patent for the digital Neurophone under a secrecy order as a matter of national security.

Jack Vorona arranged for the unit, Center Lane, to be transferred directly to the DIA's Scientific and Technical Intelligence Directorate when Army funding ran out in late 1985, at which time it was redesignated Sun Streak.
Dr. Von Verschuer- The Kaiser Wilhelm Institute. Mengele sent his twin studies/experiments to Von Verschuer.

Dr. Joseph Victor- Staff pathologist, Camp Detrick. Hill-Victor report. "Such information could not be obtained in our own laboratories because of scruples attached to human experimentation.
Marion Villimek-O wned Newhaven Psychiatric Hospital in Kew, a private facility staffed exclusively by Family cult members and associated MK-ULTRA doctors.
Prof. V.N.Volchenko (В.Н.Волченко)- International committee of the socioscientific human ecology and energy informatics.
Jack Vorona- Former head of the DIA's Scientific and Technical Intelligence Directorate. In this capacity, he oversaw the funding and tasking of Grill Flame. Another project he oversaw, code-named Sleeping Beauty, dealt with researching microwaves and how they affect the human mind. Aviary, codename: Raven.

W

Wendy-Louise Walker- MK-ULTRA hypnosis research.
Anne Warbasse- Self-image and reaction to isolation. The Human Ecology Fund, CIA. psychology $1,058.
James Paul Warburg- Set up a CIA program to experiment with LSD on CIA agents.
Elinor S. Wardwell- Child-rearing antecedents of dependency and affiliation. The Human Ecology Fund, CIA. psychology. $2,525.
Dr. Shields Warren -A senior AEC official who directed human radiation experiments.
Kevin Warwick- A professor of cybernetics and deputy vice-chancellor at Coventry University, who became one of the first people in the world to have an RFID chip surgically implanted into his forearm in 1998.
Gordon Wasson- MK ULTRA contractor. An expedition, headed by Gordon Wasson for the purpose of studying and collecting hallucinogenic species of mushrooms of interest to TSS/CD. Sponsor J . P. Morgan and Co. of New York unwitting of Agency sponsorship. (María Sabina).
Robin Waterfield- Hypnotism. Hidden depths: Waterfield uses the history and controversy surrounding the practice of hypnosis to gain insight into our behaviour and psychology, and considers how

hypnotic techniques have been absorbed into society through advertising, media and popular culture.

Harvey Lee Waterman- Working with the CIA using student authored research without their knowledge in studying Berlin, the Soviet Union and other areas of national security interest.

J. G. Watkins -Followed in Estabrooks steps and induced soldiers of lower rank to commit acts which conflicted not only with their moral code, but also the military code which they had come to accept through their basic training.

John C. Watkins, PhD -The founding secretary of ISCEH . whose initial job was to gather an international community of researchers into the ISCEH fold. 24 countries that were the national divisions of ISCEH . These were: Argentina, Australia, Austria, Brazil, Canada, Chile, Denmark, Finland, France, Germany (west), Great Britain, Hungary, Israel, Italy, Japan, Mexico, Netherlands, Norway, Sweden, Turkey, Union of South Africa, United States, and Venezuela.

In 1947, J. G. Watkins induced criminal behaviour in deeply hypnotised subjects during an army experiment. Watkins suggested a distorted view of reality to his subjects by inducing hallucinations which allowed them to avoid direct conflict with their own moral concepts. He carefully chose his suggestions to be in line with his subjects'.

Peter D. Watson- Hypnotism, Martin Orne.

Prof. Caroline Watt PhD- A British parapsychologist and founder member of the Koestler Parapsychology Unit at the University of Edinburgh. She was President of the Parapsychological Association (2004-2005). In 2016 she was appointed to the position of Koestler Chair of Parapsychology at the University of Edinburgh.

Norman F. Watt- Conceptual development in children and young adults. Psychology, $2,250. The Human Ecology Fund, CIA. $1,000.

Beatrice Webb- Eugenics.

Sidney Webb- Eugenics.

Wilse B. Webb- Review of research on sleep. The Human Ecology Fund, CIA. psychology. $2,500.

Bruno Nikolaus Maria Weber-(21 May 1915 in Trier - 23 September 1956 in Homburg) was a German physician, bacteriologist and Hauptsturmführer (1944), at Auschwitz, in the branch of the Hygiene Institute of the Waffen SS. He was chief of

the Hygienic Institute. He organised experiments involving the interaction of different human blood types in unwilling prisoner-patients. He also conducted experiments using barbiturates and morphine derivatives for mind-control purposes.

Leonard N. Weigner- An unconfirmed memo states that Pettie was trained in counterintelligence; his CIA handler was Colonel Leonard N. Weigner, a career Air Force and CIA operative.

Dr. Gunther Weil- Concord Prison Experiment.

Walter Weiss- On the relationships between mass media of communication and social change. The author also reports on the roles of the mass media in the development of modernised countries.

HG Wells- E ugenics as the first step toward the removal "of detrimental types and characteristics" and the "fostering of desirable types" in their place.

Professor George Wendt- The chairman of the Psychology Department at the University of Rochester, to study a variety of drugs on student volunteers in an attempt to produce amnesia.

Dr. Sidney L. Werkman -A ssociate of Wolff.

Dr. Louis Jolyon-West -Study to perform research in the field of psychology of the dissociated states and of hypnosis. University of Oklahoma Years: 1955-1956. West was a veteran of the CIA's MK ULTRA mind control program, and worked on interrogation techniques using hypnosis and LSD. He was asked to make a study of LSD by Dr. Gottlieb. Sidney J. Gottlieb, who corresponded with West under the name Sherman R. Grifford, or simply "SG". West was paid by the Geschickter Foundation. He performed experiments on unwitting subjects using a combination of LSD, hypnosis, isolation and sleep deprivation. This was part of what was later to be revealed as the C.I.A.'s top secret Project MK-ULTRA. The purpose of these experiments was to develop methods for erasing memories and planting false ones in their place. This could both enhance interrogation and undermine it. The subjects of these experiments were paid volunteers (who did not know what the experiments involved), airmen, (mental health) patients and prisoners. Besides LSD, he dosed his research subjects with other drugs such as amphetamines, chlorpromazine and reserpine.

West officially retired in 1988. However, in the early 1990s he was a member of the medical oversight board for Science

Applications International Corp. remote-viewing research (Project Stargate / Grill Flame).

In 1972, West claimed the riots were tied to genetic and racial factors and those prone to such violence were mostly young black and Hispanic urban males. He called for Black and Hispanic children to be studied for genetic abnormality. Some of the studies that West proposed included the forced administration of a chemical castration drug and the use of remote monitoring techniques to record bioelectrical changes in the brains of human subjects, which required implanting tiny electrodes into the brains of Blacks and Hispanics suspected of violent behaviour.

Colston Westbrook -CIA Psy-War expert who worked at Vacaville Prison with prisoners such as Donald Defreeze.

Bosquet Wev- Convinced that German scientists could help America's postwar efforts. He wrote a memo warning that "the best interests of the United States have been subjugated to the efforts expended in 'beating a dead Nazi horse.'" He also declared that the return of these scientists to Germany, where they could be exploited by America's enemies, presented a "far greater security threat to this country than any former Nazi affiliations which they may have had or even any Nazi sympathies that they may still have."

We've decided to sidestep the problem. Dulles had the scientists dossier rewritten to eliminate incriminating evidence. As promised, Allen Dulles delivered the Nazi Intelligence unit to the CIA, which later opened many umbrella projects stemming from Nazi mad research. (MK-ULTRA / ARTICHOKE, OPERATION MIDNIGHT CLIMAX.

Dr. Donald Wexler- A nd three psychiatrists from Harvard University. Overtly funded by the secret Office of Naval Research. Seventeen volunteers were put in "a tank-type respirator" with low artificial light "designed to inhibit movement and tactile contact." The Harvard psychiatrists -Herbert Leiderman, M.D.; Jack H. Mendelson, MD; Donald Wexler, MD; Philip Solomon, MD,

George White- OSS/CIA officer, MK-ULTRA contractor.

George White (Army Col, CIA, BNDD)- Planned on filming as many high government agency officials and heads of academic institutions and foundations as possible, so that later, when the funding for mind-control and radiation started to dwindle, projects would continue.

Operation Midnight Climax," which was part of the CIA's MK-ULTRA program in the 1950s and 1960s to manipulate human behaviour.

1943 OSS narcotics agent gave the substance its first field test in August "Little Augie" Del Gracio, a drug-dealing New York gangster with connections to mobster Lucky Luciano. Realistic field testing of R and D items of interest to Technical Services Staff. This is the infamous safehouses known as Operation Midnight Climax.

Robert White- "I wish to thank Dr. Robert W. White, Director of the Psychological Clinic of Harvard University, for his help in conducting this study and preparing the material for publication. Without his invaluable advice and guidance this study would not have been possible." The Mechanisms Of Hypnotic Age Regression: An Experimental Study1 By Martin T. Orne.

Dr Lance Howard Whitaker -Using a new psychiatric drug called lysergic acid diethylamide (LSD or LSD-2551). LSD was administered as an adjunct to conventional psychotherapy to expedite the treatment of a variety of psychiatric illnesses.

Dr. John Clare Whitehorn- In 1941, he was appointed Henry Phipps Professor of Psychiatry at the Johns Hopkins University School of Medicine and psychiatrist-in-chief at The Johns Hopkins Hospital. He held these posts until his retirement in 1960. He served on the Maryland State Board of Health and Hygiene, becoming chairman in 1967. Board of directors of Dr. Harold Wolf's Human Ecology Society.

Dr. Anthony. J. Wiener- received a $12,000 grant from the Society for the Investigation of Human Ecology.

Per-Olaf Wikstrom- The International Society of Hypnosis (ISH). Ernest Hilgard, Martin Orne, Ainsley Meares, Josephine Hilgard, Kay Thompson, Herbert Spiegel, John Hartland, P. Brugnoli, and Erika Fromm.

Dr. Harry L. Williams- Administered LSD to Dr. Carl Pfeiffer, chairman of Emory University's Pharmacological Department, in 1955.

Mr. Richard Williams- Subject monitoring and data acquisition. 6571st Aeromedical Research Laboratory, Holloman AFB, New Mexico, and the Aerospace Medical Research Laboratories, Wright-Patterson AFB, Ohio.

D. W. Winnicott- Tavistock Clinic in London. R.D. Lang.

Anna Wise- Who is skilled in using EEGs to measure and train brain waves. In the 1990s, her unique work and sparkling charisma attracted the attention of Jeremy Tarcher, who served on the board of Esalen Institute and invited Anna to teach there.
Dr. Eric Wittkower- McGill, co-author with Azima.
John Winne- Work with CIA and John Gittinger.
Harold Wolff- Dulles recruited Wolff to direct cia-funded research on persuasion and interrogation. Wolff participated in early LSD research and co-authored an article with Louis Berlin, Thomas Guthrie, Arthur Weider, and Helen Goodell examining the effects of mescaline and LSD on creativity. Wolff proposed a partnership with the CIA aimed at mastering the techniques for gaining control over human beings' thought patterns and behaviour patterns. Drs. Wolff and Hinkle obtained permission from Cornell's President and high University officials to conduct these experiments at Cornell on behalf of the CIA.

The Human Ecology Fund was overseen by Cornell University Medical School neurologist Harold Wolff, MD.

Professor of Medicine, Cornell University, MK-ULTRA contractor. Study the role of the human brain in overall adaptive behaviour. Specifically, the relationship of changes in behaviour due to stress to changes in behaviour brought about by loss of cerebral tissues.
R.H. Wood- On the Importance of Correct Mechanics in Paranormal Research.
Douglas 'Pansy' Wright- Canberra facility.
Michael Wynne -Air Force Secretary stated in 2007 that "nonlethal weapons should be tested on U.S. civilians before being used on the battlefield," referring to the use of EM weapons in crowd-control situations.

X

Y

N.B. Yakovets- Area of psychophysiological research in connection with ergonometric questions, and only peripherally have something to do with parapsychology.

Dr. Yensen- R eceived FDA approval to continue LSD research, they were unable to acquire the LSD for clinical study in the United States. (1990s).
Robert Yerkes- Headed a committee that developed the first group intelligence tests, which were used to assess Army recruits. These tests, known as the Army Alpha and Beta tests. Yerkes's analyses led him to conclusions about apparent racial and ethnic differences in intelligence. Harvard professor was biologist Charles Davenport, a leader in the eugenics movement, which held that the human race could be improved through selective breeding . Yerkes began advocating testing as a method for differentiating who should be permitted to reproduce based on intelligence.
John Yoo- Torture.
Dr. Seung-Schik Yoo- From Harvard University, offers a headset to scientists eager to bring FUS into the mainstream.
Dr. Richard York -Colleague of John Gittinger in the development of the PAS.
Major Iijima Yoshio- During the Khabarovsk Trial, admitted that he was personally responsible for subjecting at least 40 Soviet citizens to certain human experiments.
Alan Yu- A former lieutenant colonel in the Taiwan National Defense Department, says that theUnited States has not only developed an operational mind control machine, but has also distributed models for use by allied countries.
Yuganov- Suggested that there be a standardi-zation for admissible limits for high intensity sound. The effect exerted on humans by noise of 114-116 and 125-126 db with an acoustic energy of 500 Hz was studied. The auditory thresholds, blood pressure values and time of response to light stimuli were measured. Sixty-four healthy male test subjects were used in 152 experiments.
Colonel Savin Aleksey Yurievich- Unit 10003 commander, parapsychology.

Z

P V Zagryadski- Psychophysiological research in connection with ergonometric questions, and only peripherally have something to do with parapsychology.

Mark Zborowksi- Established a position at Cornell with Wolff's assistance, where he conducted research for his book examining the cultural mitigation of pain, People in pain.
Karl Zener- Duke University perceptual psychologist, designed cards in the 1930s for experimental ESP research with fellow Duke psychologist J.B. Rhine, PhD.
Zhgenti- Low frequency electromagnetic fields.
Dr. Herbert Zimmer -W as an Assistant Professor of Psychology at Georgetown University. worked at times as a consultant for the Air Force Office of Scientific Research. The Manipulation of Human Behavior was edited by psychologists Albert D. Biderman and Herbert Zimmer.

Psychophysiological analog information by digital computer. The Human Ecology Fund, CIA. psychology. $2,505.
V.P. Zinchenko (В.П.Зинченко)- Special commission established by the order of P.N.Demichev. The Commission recognized the reality of psychic phenomena.
Zubek- Reports the first experimental work on perceptual deprivation began in 1951 at McGill University. Its purpose was to further the understanding of the mechanisms under- lying "brainwashing. indicated that a prolonged period of perceptual deprivation and confinement can produce, in most cases, a considerable disturbance of brain- wave activity.
Leonard M. Zunin - Assistant Chief, Neuropsychiatry, Naval Hospital, Camp Pendleton, California.
Jacobo Grinberg-Zylberbaum- Extraocular Vision.
